Art As Second Nature:

Second nature, 2017 Second Nature borrows from American philosopher John McDowell's conceptualisation of a second nature in human beings. Second nature consists of conceptual capacities built upon instincts. McDowell contends that the development of these capabilities is facilitated by one's society. Second nature involves the enhancement of one's autonomy and it requires accumulation of experiences. This feature sets second nature apart from first primal nature. Artists as highly autonomous individuals appeal not only to collective experience but also intuition and nature in order to explore humans and their inner selves and their relationship with the outside world. The creation of art requires the combination of human imagination and capability of thinking so as to engage in endless creation. The exhibition is laid out in two exhibition halls. The first hall starts off the exposition by anchoring the content of display on nature and traces of civilisation. The second one exhibits the participating artists' reflections upon the issues they take on through new media interactive pieces and creative modes through which the development of human civilisation can be manifested. Each exhibit is riddled with complexity. The exhibition also raises questions about the root of our nature regardless of our nationalities and communities, the ultimate issue that all of us ponder upon remains the root of the whole human race. The rumination of our past, our history and our expectations for the future are all built upon a shared nature. We reflect upon the intriguing relationship amongst humans, nature and experiences on such common ground. The Younger Goethe and the Visual Arts William Douglas

Robson-Scott, 1981-02-26 This 1981 book tells of the part which the visual arts played in Goethe's life and thought.

Walter Benjamin and the Idea of Natural History Eli Friedlander, 2024-01-16 In this incisive new work, Eli Friedlander demonstrates that Walter Benjamin's entire corpus from early to late comprises a rigorous and sustained philosophical questioning of how human beings belong to nature. Across seemingly heterogeneous writings, Friedlander argues Benjamin consistently explores what the natural in the human comes to, that is, how nature is transformed, actualized, redeemed and overcome in human existence. The book progresses gradually from Benjamin's philosophically fundamental writings on language and nature to his Goethean empiricism, from the presentation of ideas to the primal history of the Paris arcades. Friedlander's careful analysis brings out how the idea of natural history inflects Benjamin's conception of the work of art and its critique, his diagnosis of the mythical violence of the legal order, his account of the body and of action of material culture and technology, as well as his unique vision of historical materialism. Featuring revelatory new readings of Benjamin's major works that differ sometimes dramatically from prevailing interpretations, this book reveals the internal coherence and philosophical force of Benjamin's thought. **Analytical Psychology and German Classical Aesthetics: Goethe,**

Schiller, and Jung Volume 2 Paul Bishop, 2008-07-16 The second volume of *Analytical Psychology and German Classical Aesthetics* builds on the previous volume to show how German classicism, specifically the classical aesthetics associated with Goethe and Schiller, known as Weimar classicism, was a major influence on psychoanalysis and analytical psychology alike.

This volume examines such significant parallels between analytical psychology and Weimar classicism as the methodological similarities between Goethe's morphological and Jung's archetypal approaches which both seek to use synthesis as well as analysis in their attempt to understand the world. It also focuses on the project of the construction of the self which it is argued is not only a personal but also a cultural activity. This book like its previous volume aims to clarify the intellectual continuity between Weimar classicism and analytical psychology. It will be of interest to both students and scholars in the fields of analytical psychology, comparative literature and the history of ideas.

The Future of Modernism Hugh Witemeyer, 1997 Argues for the complex and vital legacy of major modernist authors

Theatricality and the Arts Richard Rushton, Andrew Quick, 2024-04-30 Theatricality and the Arts presents a series of investigations of the notion of theatricality. Primarily theatricality concerns that which pertains to theatre but the term has always carried with it the potentially pejorative associations of exaggeration and fakery. The essays here question and contest such associations. The book is divided into four sections which together provide a comprehensive interrogation of theatricality. The four sections begin with multimedia where theatricality is examined in relation to mixed modes of media: internet art, painting, performance and digital display. A second section takes a philosophical approach to questions of theatricality. A third section looks at art broadly speaking but also at the historical contexts of art: photography and other media, literature, film, music. A final section features reflections on theatre and cinema often in conjunction. Considered as a whole the collection contributes to debates on theatricality in various fields while also enabling a cross examination of approaches to the topic.

Refiguring Woman Marilyn Migiel, Juliana Schiesari, 1991 Refiguring Woman reassesses the significance of gender in what has been considered the bastion of gender neutral humanist thought: the Italian Renaissance. It brings together eleven new essays that investigate key topics concerning the hermeneutics and political economy of gender and the relationship between gender and the Renaissance canon. Taken together they call into question a host of assumptions about the period, revealing the implicit and explicit misogyny underlying many Renaissance social and discursive practices.

Adorno: A Guide for the Perplexed Alex Thomson, 2006-04-24 One of the most influential philosophers and cultural theorists of the twentieth century, Theodor Adorno poses a considerable challenge to students. His works can often seem obscure and impenetrable, particularly for those with little knowledge of the philosophical traditions on which he draws. Adorno: A Guide for the Perplexed is an engaging and accessible account of his thought that does not patronise or short change the reader. Those new to Adorno and those who have struggled to make headway with his work will find this an invaluable resource, clearly written, comprehensive and specifically focused on just what makes Adorno difficult to read and understand.

Friedrich Nietzsche and Weimar Classicism (Studies in German Literature, Linguistics, and Culture) Paul Bishop, Roger H. Stephenson, 2005 The book provides an overview of related scholarly literature, discusses Nietzsche's aesthetic theory in *The Birth of Tragedy*, recounts the composition of *Thus Spoke Zarathustra* and offers an interpretation of the aesthetic gospel in this central work. A

concluding chapter explores the continuities in aesthetic theory from Leucippus to Ernst Cassirer By demonstrating the constitutive function of the aesthetics of Weimar classicism in his philosophy this book opens up a fresh and original perspective on reading Nietzsche BOOK JACKET Blackwood's Edinburgh Magazine ,1859 **Selected Writings:**

1935-1938 Walter Benjamin,Howard Eiland,Gary Smith,1996 This volume offers extensively annotated translations of essays that are key to Benjamin s rewriting of the story of modernism and modernity as well as a diary from 1938 and penetrating studies of Bertolt Brecht Franz Kafka and Eduard Fuchs Radical Romanticism Mark S. Art's Realism in the Post-Truth Era Amanda Boetzkes, Maryse Ouellet, 2024-05-31 Arguing for the necessity of taking art's contribution to contemporary realism seriously this edited collection intervenes on contemporary debates about realism by demonstrating that the arts do not simply illustrate philosophical theories The significance of art's realism in times characterised by the normalisation of fake manipulated and distorted representations of reality can only be fully understood by attending to the ways that the arts mediate visualise and even shape reality Each chapter features a different approach to realism and its aesthetic dimensions not only in the visual arts but also in sound art film scientific imaging and literature

Elective Affinities Lydia Goehr, 2008 As illustrated in Goethe's famous novel of the same name elective affinities are powerful relationships that crystallize under changing conditions In this new book Lydia Goehr focuses on the history of elective affinities between philosophy and music from German classicism romanticism and idealism to the modernist aesthetic theory of Theodor W Adorno and Arthur C Danto Aesthetic theory she argues depends on a dynamic philosophy of history centered on tendencies yearnings needs and potentialities With this in mind she recasts the theses of Adorno and Danto regarding the death or end of philosophy art music and human experience as arguments for continuation and survival *Elective Affinities* tracks the migration of aesthetic and critical theory from Germany to the United States following the catastrophic period of the twentieth century marked by the Second World War **The Museum of Foreign Literature, Science, and Art** Robert Walsh, Eliakim Littell, John Jay Smith, 1838
