Sey,2012-04-19 DIVERSE VISIONS BOOK TWO subtitle DIASPORA INTRODUCTION The inspiration that triggered the poems in Diaspora is the perspective of the African immigrant to Europe or to wherever in the

western world Those immigrants who decided to move or not to move leave behind their nations families and loved ones The reasons vary though for political economic social or religious Diaspora is a dream that may either come true or dissipate into thin air when they arrive to their destinations Great expectations fail and things start falling apart The categories of Diaspora are two or more but the basic are those who come without being literate or any professional qualification These men and women end up working either legally or illegally Most work on construction sites or physical hard labour jobs Thus they are the labour or manpower brain drain The other sector is those who come to further their academic education but eventually stay to work abroad Another subsector of them comes already trained in different fields such as doctors teachers engineers and nurses Their reasons to stay are mostly political or economic For some to go home may signify persecution by corrupt dictatorship governments or regimes Thus I call them the elite brain drain from developing countries to Europe or the west developed and mature democracies Diaspora denotes what these people experience and undergo betwixt an exodus of mass migration By the author Amadou BH Sey *1981-1985 Supplement to Crime Fiction, 1749-1980* Allen J. such as defensive blockhouses in South Africa had been built but the Royal Engineers of the Army were more versed in simple temporary defences suitable for mobile warfare Home defences were a limited number of forts around naval ports and Martello Towers on the east coast It was considered that the Navy was quite able to defend Britain's coasts The Germans on the other hand as with the other continental countries such as France Belgium Italy Holland Poland Austria etc had been constantly renewing and updating border forts for several centuries They had also maintained fortification and siege elements of their armies who were experienced in designing and constructing strong shelters Both German and French armies began the war with a degree of expertise in what was to become a static war with little movement However by 1918 the British were to surpass both enemy and her allies in the design and construction with supply and logistics of such shell proof cover for troops and defensive positions This book gives the history of development and innovation of concrete bunkers pill boxes blockhouses and general concrete constructions during the First World War Many of these structures some showing obvious signs of war damage still exist in France and Belgium today All the existing structures with photograph except for some which are impractical because of dense vegetation are shown within Many entries have contemporary maps showing how they fitted into a defensive system whilst for others the location can be identified from the text GPS coordinates are given for each entry except for a few which are on private land and where privacy has been requested
