G. Bayroff, 1963 The Armed Forces Qualification Test the screening test used by all the services must provide both a measure of general military trainability and measures of specific aptitudes Following the research design for previous forms experimental test items in four content areas developed by the separate services were administered to 3000 Armed Forces personnel for item analysis and item selection Final forms were then administered to standardization samples representative of the mobilization population as a basis for conversion of test scores to percentile norms AFQT 7 and 8 correlated substantially with preceding operational forms $r = .89$ $.90$ and are satisfactory alternate forms for screening Correlation of AFQT 7 8 with years of formal education $r = .53$ was slightly less than for the previous forms Because of the high degree of equivalence of the two forms $r = .94$ established in samples totaling 600 cases a single conversion table was established for AFQT 7 and 8 Based on experimentation instructions for administering AFQT 7 and 8 have been made shorter and simpler than for previous forms with no loss in test effectiveness Author **Mental Qualification Tests for Women of the Armed Forces** Jane McReynolds, 1956 **Development of the Armed Forces Qualification Test, Forms 5 and 6** United States. Seeley, 1965 Since operational conversion tables for the Armed Forces Women's Selection Test AFWST 5 and 6 based on a 1961 Air Force standardization appeared to be scaled somewhat high for WAC potential enlistees research was undertaken to bring the norms up to date The tests were restandardized on a sample of 400 WAC enlisted women going through basic training at the WAC Center and the new norms instituted As a further evaluation the basic trainee sample was doubled by including 400 women entering basic training in succeeding classes and norms were again computed this time on the larger group Data were also obtained on 1000 examinees processed at Armed Forces Examining Stations in order to include rejected applicants and norms were computed on the wider range sample At the same time data were obtained by which to analyze the effectiveness of the AFWST as predictor of performance in basic training and in a clerical training course In the conversion based on the first WAC basic training sample percentile scores for a given raw score were higher than in the earlier Air Force conversion and permitted acceptance of a larger percentage of

applicants The two subsequent conversions based on WAC samples were almost identical with the first The AFWST was found to be an effective predictor of academic grade in basic training With respect to the clerical course prediction was substantial both for academic grade and for total grade **The Armed Services Vocational Aptitude Battery** Abram Gustavus Bayroff,Edmund F.
