Arms Control Myth Versus Reality:

Arms Control Richard Felix Staar, 1984 Bidrag i forbindelse med Hoover Institution konferencen der dækker mange aspekter af bestrebelserne på at effektivisere kontrollen med våbenfremstilling og våbenfordeling **Arms Control At Sea** J. Richard Hill, 2024-04-01 Originally published in 1989 this book reviews the history of maritime control measures from before the First World War and provides a critical examination of both the objectives of maritime power and the concepts of disarmament peace zones parity verifiability and peaceful co existence It argues that the objectives of maritime power are not necessarily incompatible with international security and that strategic deterrence can contribute to improved security Limitation measures it is argued can in some cases be double edged endangering other security fields and having a destabilizing effect The book stresses the need for non absolute solutions in order to achieve a reasonable level of security and makes proposals for both structural and confidence building measures along those lines **The Arms Control, Disarmament, and Military Security Dictionary** Jeffrey M. Elliot, Robert Reginald, 2007-09-01 This facsimile reprint of the 1989 edition is according to Library Journal a wonderfully concise and comprehensive resource on a very important topic In 268 detailed entries the authors provide a wealth of information on such topics as the arms race conventional and nuclear weapons nuclear strategy and disarmament The entries are cross referenced and there is an index Of great value to general readers as well as specialists **Weapons Proliferation and World Order** Brad Roberts, 2023-09-29 With the end of the Cold War the subject of weapons proliferation has acquired new interest and prominence So too have questions about the nature of the world order that will succeed the structure of the last fifty years This study explores the connections among these topics It describes the prevailing conceptual model of nuclear proliferation evaluates proliferation's changing technical features considers economic and political factors bearing on its future rate and character and speculates about proliferation's implications on the post cold war world order It also considers the role of international public policy in meeting proliferation's challenges Arguing that updated approaches are needed the analysis emphasizes cooperative over coercive approaches to order It concludes with an assessment of progress to date in meeting these new challenges arguing that the new agenda is only slowly coming into focus **Soviet Deception at MBFR** Richard Felix Staar, 1986 [Air University Library Index to Military Periodicals](#) , 1989 **Problems of Communism** , 1987 *Nuclear Arms Control in Peril* Thomas D. Grant, 2024-12-10 In this book a former US Department of State senior arms control official critically analyses two pivotal nuclear arms control treaties the established Treaty on the Non Proliferation of Nuclear Weapons NPT and the rising Treaty on the Prohibition of Nuclear Weapons TPNW The book offers a concise and critical analysis of the two illuminating both their strengths and shortcomings The author acknowledges the idealistic goal of the TPNW but argues that its immediate abolitionist stance lacks a roadmap for achievement Instead the book advocates realistic progress within the NPT framework It provides twelve key negotiation topics for fostering meaningful dialogue among nuclear weapon states while emphasizing

the urgency of concrete action in a world facing growing nuclear threats **Reader's Guide to Military History** Charles Messenger, 2013-10-31 This book contains some 600 entries on a range of topics from ancient Chinese warfare to late 20th century intervention operations Designed for a wide variety of users it encompasses general reviews of aspects of military organization and science as well as specific wars and conflicts The book examines naval and air warfare as well as significant individuals including commanders theorists and war leaders Each entry includes a listing of additional publications on the topic accompanied by an article discussing these publications with reference to their particular emphases strengths and limitations *The Geopolitics Of Super Power* Colin S. Gray, 2021-10-21 What is Soviet American competition all about Is the Soviet Union a security problem that the United States must solve Or is it an insecurity condition with which the U S must learn to live and if so on what terms What kind of a player is the United States in the great game of power politics In *The Geopolitics of Super Power* one of our most respected strategic theorists answers these and other questions In geopolitical terms Colin Gray sees the Soviet American antagonism as an enduring contest between a continental empire and a maritime coalition each with its distinctive character and purposes Gray explores the roots of the American style in foreign policy and strategy and how that style relates to defense options He identifies four broad alternatives for U S national security policy passive and active means of containment disengagement from foreign security commitments and the rollback of the Soviet empire Gray argues vigorously for active containment for the systematic deemphasis of nuclear weapons and for the intelligent use for deterrence and defense purposes of the West's great competitive strengths in the political economic and technological spheres Strategic Review , 1985 dedicated to the advancement and understanding of those principles and practices military and political which serve the vital security interests of the United States **Rethinking national security** Frances Scott, 1990 **Johnson, McNamara, and the Birth of SALT and the ABM Treaty 1963-1969** John M. Clearwater, 1996-12 The purpose of this book is to examine the birth of bilateral strategic arms control between the United States and the Soviet Union during the Johnson Administration from 1964 to 1969 It is about the time and the place of the birth of bilateral strategic arms control as it came about in the United States through the efforts of President Lyndon Johnson and Secretary of Defense Robert McNamara in the 1960s This is the time of the birth of what quickly came to be known as SALT or the Strategic Arms Limitation Talks This inquiry firstly considers whether the move towards bilateral strategic arms control was institutional or personal It then looks for the motivating factors both theoretical and substantive As few things have only a single cause it is likely that we shall find that the birth of strategic arms control was influenced by both nuclear weapons employment theory and by a substantive incident or reality such as the ever increasing number and sophistication of nuclear weaponry Lastly we must look for an immediate precipitating factor such as the move towards deployment of a potentially destabilizing ABM system by both the USA and USSR Therefore it must be borne in mind when examining the people and their theories the institutions the prevailing realities and major precipitating factors that they all come together

to form the basis for the birth of bilateral strategic arms control This book shall therefore strive to reveal the extent of personal input the objective basis for that personal commitment and examine the major precipitating factors namely Anti Ballistic Missiles ABM and to a lesser extent Multiple Independently Targeted Re Entry Vehicles MIRV Although barely discussed at the time the MIRV would turn out to be a major arms control problem far greater than the hotly contested ABM system which spurred so many debates The unique aspect of this research is that other writers have concentrated almost totally on the people and events surrounding the Nixon Administration when studying SALT While it is true that the talks did not get underway during the Johnson years this study will show that all of the theoretical and preparatory work was done in the Johnson years and conclude by showing that many of the same people appear in the Nixon years Without the input of McNamara and his team there would have been no movement on strategic arms control until possibly the 1970s To add to the historical value of the work I have included in the annexes complete texts of the initial arms control proposal which the US team was to present to the Soviet Union in the autumn of 1968 In addition presented here for the very first time are the full instructions to the negotiating team and the initial presentation paper to be read by the team leader on the opening day of the talks When this final material is tied in with the history of the push for the talks the story is indeed exciting and meaningful For the first time we are presented with the almost complete picture of the formulation of an arms control proposal There is of course a fluke of history which brought this all to light As the Johnson material was never directly used in the formal SALT talks it was not subject to the same stringent security classifications as those of Nixon Ford Carter Reagan Bush and Clinton materials Therefore the documents started to be declassified in the late 1980s with the bulk coming to light in 1991 through 1994 Here then is the story of the origins of strategic arms control

Soviet Military Policy: Since World War II William T. Lee, 1986 *Reagan's First Four Years* John David Lees, Michael Turner, 1988 **USSR Foreign Policies After Détente** Richard F. Staar, 2013-09-01 Based largely on primary sources in the Russian language this succinct volume cover the following aspects of Soviet foreign policy world outlook personalities and structures of the decisionmaking process implementation of objectives and a discussion of practices toward geographic regions as well as specific countries *Does Defense Beggar Welfare?* James L.
