Arms Control In A Multipolar World:

Interpreting shadows arms control and defense planning in a rapidly changing multi-polar world ,1999 The focus of arms control is changing It now deals with issues affecting all nations and not just the super powers A new framework for approaching non proliferation of weapons of mass destruction and arms control could focus on a two fold policy initiative The first policy would be a new strategic triad built around conventional capability including rapidly deployable forces regional ballistic missile defense and long range precision strike capability The second policy would employ an information strategy using the current diplomatic initiatives that appear to be the most productive or unilateral and multilateral export controls military assistance in the form of infrastructure and confidence building measures Continued success in arms control requires abandoning Cold War policies Emerging policies will need to appreciate different world views Good intelligence will be a key factor in the success of any policy orientation and its implementation The focus needs to change from arms control involving the superpowers to arms control involving everyone Arms Control in a Multi-polar World James Brown,1996

conferences in shaping global defense strategies and resolving conflicts while acknowledging inherent limitations. These talks from UN Security Council meetings to regional summits serve as vital platforms for dialogue. The book argues that despite their importance, these conferences often fall short due to geopolitical realities and systemic issues, resulting in a gap between intended outcomes and actual impact. One key insight is that divergent interests among participating states frequently hinder the implementation of agreements, challenging the assumption that dialogue alone guarantees solutions to complex security problems. The book explores the evolution of global security talks through the 20th and 21st centuries, referencing landmark events like the Congress of Vienna and summits on nuclear disarmament. It presents case studies to assess the contributions of past and present conferences to conflict prevention and arms control. The book unfolds in three parts, beginning with theoretical underpinnings, progressing to detailed case studies, and concluding with a critical assessment offering strategies for enhancing conference effectiveness. This approach highlights the need for realistic expectations and effective mechanisms to translate dialogue into concrete action.

Conventional Arms Control and East-West Security Institute for East-West Security Studies, 1989. This important and timely work, prepared by the leading researchers, planners, and policymakers from both Eastern and Western alliances, analyzes the major issues in the Vienna talks on conventional forces in Europe involving NATO and Warsaw Pact nations. It is likely to have a significant influence on the course of these negotiations and on emerging debate on conventional arms control. The contributors met in Moscow prior to the Vienna conference to review and compare their analyses and revised them thereafter for publication in this work.

Interpreting shadows: arms control and defense planning in a rapidly changing multi-polar world, 1999. The focus of arms control is changing. It now deals with issues affecting all nations and not just the super powers. A new framework for approaching non-proliferation of weapons of mass destruction and arms control could focus on a two-fold policy initiative. The first policy would be a new strategic triad built around conventional capability, including rapidly deployable forces, regional ballistic missile defense, and long-range precision strike capability. The second policy would employ an information strategy using the current diplomatic initiatives that appear to be the most productive or unilateral and multilateral export controls, military assistance in the form of infrastructure and confidence-building measures. Continued success in arms control requires abandoning Cold War policies. Emerging policies will need to appreciate different world views. Good intelligence will be a key factor in the success of any policy orientation and its implementation. The focus needs to change from arms control involving the superpowers to arms control involving everyone.
