The Theological Vision of Reinhold Niebuhr's "The Irony of American History" Scott R. Erwin, 2013-06-13 Reinhold Niebuhr remains at the center of a national conversation about America's role in the world and commentators with divergent political and religious positions draw upon his 1951 work *The Irony of American History* in support of their views In this study Scott R Erwin argues that an appreciation of Niebuhr's theological vision is necessary for understanding the full measure of Irony An appreciation of Niebuhr's theology is important because the majority of individuals reading Irony today fail to acknowledge the central role that his Christian beliefs played in its formulation Niebuhr described his theological vision as being in the battle and above it and in more extensive terms explained it to be a combination of moral resoluteness about the immediate issues with a religious awareness of another dimension of meaning and judgment It was this perspective that led Niebuhr in Irony to assert that America must both take morally hazardous action in combating the aggression of the Soviet Union and engage in critical self evaluation to prevent the country from assuming the most odious traits of its Cold War foe Niebuhr developed this theological vision over the course of the 1930s and 1940s through engagement with Christian doctrine as most readily seen in his academic works such as *The Nature and Destiny of Man* and engagement with current history as seen in his many journalistic writings during this period By focusing primarily on Niebuhr's writings between 1931 and 1951 Erwin traces the development of his Christian interpretation of human nature and history establishes how it informed his theological vision and reveals how that theological vision underlay his writings on current affairs Such excavation is necessary given the fact that Niebuhr became less explicit about the theological nature of his later writings Indeed rather than clearly advance his theological vision in Irony Niebuhr chose to communicate it implicitly through the historical figure of Abraham Lincoln In multiple writings over the course of his career Niebuhr referred to the sixteenth president as both America's greatest statesman and theologian and ultimately portrayed him as the personification of his own religious beliefs Erwin demonstrates that the study of both Niebuhr's theological vision and his application of this vision throughout his life is instructive as the contemporary generation engages with global problems

Arnold J. Toynbee: A Life William H. McNeill, 1989-04-20

One of the most remarkable thinkers of this century Arnold Toynbee won world wide recognition as the author of the monumental ten volume *A Study of History* Its publication and phenomenal success brought him fame and the highest praise as the reading public proclaimed him the most renowned scholar in the world This thought provoking engaging study of Toynbee written by one of today's most eminent historians weaves together Toynbee's intellectual accomplishments and the personal difficulties of his private life Providing both an intimate portrait of a leading thinker and a judicious evaluation of his

work and his legacy for the study of history William H McNeill offers both a biography and a commentary on how to write and understand history Along with an illuminating discussion of the strengths and weaknesses of *A Study of History* and the countless other works written by Toynbee McNeill offers a compelling examination of the responses of other historians including the devastating attack launched by Hugh Trevor Roper and Toynbee's attempts to modify his *Study* to answer these criticisms McNeill also explores his tormented personal life including his troubled marriage to Rosalind Murray and the suicide of his son Anthony In this sympathetic depiction of a life both triumphant and tragic McNeill brings his skills to bear on one of the greatest figures in his field illuminating a career of rare accomplishment Occidentalism Xiaomei Chen,2002

This revised and expanded edition of the first comprehensive study of Occidentalism in post Mao China includes a new preface foreword and chapter on Chinese diaspora writings in the Chinese language Xiaomei Chen offers an insightful account of the unremittingly favorable depiction of Western culture and its negative characterization of Chinese culture in post Mao China since 1978 She examines the cultural and political interrelationship between the East and West from a vantage point more complex than that accommodated by most current theories of Western imperialism and colonialism Going beyond Edward Said's construction in *Orientalism* of cross cultural appropriations as a defining facet of Western imperialism Chen argues that the appropriation of Western discourse what she calls Occidentalism can actually have a politically and ideologically liberating effect on contemporary non Western culture She maintains that simplistic allegations of Orientalism frequently found in current critical discourses seriously underestimate the complexities of intercultural and multicultural relationships Using China as the focus of her analysis Chen examines a variety of cultural media from Shakespearean drama to modernist poetry to contemporary Chinese television and popular fiction She thus places sinology in the general context of Western theoretical discourses such as Eurocentrism postcolonialism nationalism modernism feminism and literary hermeneutics showing that it has a vital role to play in the study of Orient and Occident and their now unavoidable symbiotic relationship Occidentalism presents a new model of comparative literary and cultural studies that reenvisions cross cultural appropriation It will be indispensable to future discussions of Orientalism Occidentalism and postcolonialism as well as subaltern studies Asian studies comparative literature cultural studies and non Western drama *Edgar Cayce's Predictions for the 21st Century* Mark A. Thurston,2004 Edgar Cayce is America's most famous and well respected prophet and mystic Dr Mark Thurston takes an in depth look at the Cayce predictions for earth changes political upheaval and the blossoming of a renewed humanity for the 21st century and beyond Supported by Nostradamus The Hopi Indians and Irene Hughes

Building the Kingdom of God on Earth Martin Erdmann,2005-03-31 In his book *Building the Kingdom of God on Earth* Dr Erdmann deals primarily with John Foster Dulles participation in the ecumenical movement from 1919 to 1945 Dulles role in shaping the religious economic and political policies of the Federal Council of Churches in its support of world order and peace especially in his function as chairman of the Commission on a Just and Durable Peace was crowned with success in the

founding of the United Nations Organisation in 1945 His personal friends Philip Kerr Lord Lothian and Lionel Curtis the principal leaders of the Round Table Group come into the pictures at various times By and large they pursued the same objectives as those of Dulles The book shows the detailed influence of the Round Table Group and its affiliated organisations such as the Royal Institute of International Affairs London and the Council for Foreign Relations New York City on the ecumenical movement using it successfully for their purpose of creating an international community of nations **The Projected Arab Court of Justice** Ezzeldin Foda Licencié en Droit,2013-11-21 *Japan's Options for the 1980s* Radha Sinha,2010-10-18 Japan s economic success since the 1950s created a range of serious domestic and international problems which threaten the stability of the country Within Japan at the start of the 1980s there was a strong mood on the right for remilitarization to give the nation the super power status her economic performance justified Outside Japan there was increasing pressure from the West to make her conform to Western strategic interests Against the background of these crucial issues the book analyzes the economic political and military options open to Japan Focussing on the interconnecting themes of foreign harassment and domestic economic disorder the author points out many areas of similarity between Japan of the 1930s and Japan of the 1980s **The Writing of History in Britain** Charles A. Watson,1982 *Britannia, Europa and Christendom* P. Coupland,2006-10-31 Britannia Europa and Christendom brings to light the webs of influence linking Christian leaders and politicians and shows the conflicting relationships between national identity and Christian universalism and between Britain as a one time world power a European nation and junior partner in the transatlantic alliance
