Baghelkhand, Or, the Tigers' Lair David E. U. Baker,2007 This book explores the concept of region and nation in Indian history through a long term study of Bagelkhand from prehistory up to 1956 It examines the ways in which the region eventually became part of the Indian nation 1947 and then the state of Madhya Pradesh 1956 The author sees region building as a process encompassing a dialogue between the region and external often centralizing states on the one hand and migration on the other While these two forces gave the region its distinct identity they also paradoxically forged political social and economic commonalities with other regions of the country subject to similar influences He pursues the theme of

nation building from prehistory through the centralizing Mauryan Gupta Mughal British Empires to the Indian state. The book assesses the social economic and political impact of various colonialisms rather than merely that of Britain whose very difference colonialism was part of worldwide capitalism. It examines the regional aspects of power which opposed but fell before the centralizing initiatives. Illustrated with rare visuals, this book would appeal to historians, political scientists, sociologists, and anthropologists, particularly those concerned with concepts like region and nation. *Researches in Indian Archaeology, Art, Architecture, Culture and Religion* Phanikanta Mishra, 1995. Contributed articles *Worldly Gurus and Spiritual Kings* Tamara I. Sears, 2014-06-10. This pioneering book is the first full length study of the matha or Hindu monastery which developed in India at the turn of the first millennium. Rendered monumentally in stone, the matha represented more than just an architectural innovation; it signaled the institutionalization of asceticism into a formalized monastic practice as well as the emergence of the guru as an influential public figure. With entirely new primary research, Tamara I. Sears examines the architectural and archaeological histories of six little known monasteries in Central India and reveals the relationships between political power, religion, and the production of sacred space. This important work of scholarship features scrupulous original measured drawings providing a vast amount of new material and a much needed contribution to the fields of Asian art, religious studies, and cultural history. In introducing new categories of architecture, this book illuminates the potential of buildings to reconfigure not only social and ritual relationships but also the fundamental ontology of the world. Tripurī, History and Culture M. C. Choubey, 2006. The book covers not only the political history of Tripuri but throws flood of light on the various aspects of cultural history. No stone has been unturned by the author to make the book as up to date as possible.
