Mitias, 2024-06-04 Michael Mitias presents explains and defends in some detail the

features that make an artwork great magic universality and the test of time Although some aestheticians beginning with Longinus discussed these features during the past two millennia they did not analyze them comprehensively nor did they justify them from the standpoint of a satisfactory conception of the nature of art In this book the author first explains the nature of the features that make an artifact art and then proceeds to establish the validity of his thesis on firm epistemological and ontological foundations In his endeavor to explicate the nature of this foundation the author answers four questions First what is the genesis of the artwork What makes it art He answers this question by advancing a concept of aesthetic depth The essence of this depth is human meaning Second under what perceptual conditions does this depth come to life in the process of aesthetic perception Third what is the role of the concept of aesthetic depth in the analysis of the nature of the great artwork How does the concept of aesthetic depth function as a principle of explanation Fourth how can we justify the attribution of magic universality and the test of time to the great work of art In short an understanding of the genesis of the artwork aesthetic depth aesthetic value and aesthetic perception is indispensable for an adequate conception of greatness in art

Creativity and Aesthetic Theory Michael H. Mitias, 2022-08-02 This book provides a critical systematic analytical and detailed analysis of creativity in art with special emphasis on the activity of artistic creation and the process of aesthetic perception Consciously dismissed from the realm of aesthetic discourse during the past century the book argues that the study of creativity is a primary task of aesthetic theory understanding its dynamics source and the conditions under which it happens is a necessary condition for an adequate analysis of the essential nature of the artistic and the aesthetic

Landscape, Natural Beauty and the Arts Salim Kemal, Ivan Gaskell, 1993 Landscape Natural Beauty and the Arts offers probing studies of the complex structure of aesthetic responses to nature Each chapter refines and expands the terms of discussion and together they enrich the debate with insights from art history literary criticism geography and philosophy To explore the interrelation between our conceptions of nature beauty and art the contributors consider the social construction of nature the determination of our appreciation by artistic media and the duality of nature s determining in gardening Showing that natural beauty is impregnated with concepts derived from the arts and from particular accounts of

nature the volume occasions questions of the distinction and relation between art and nature generally and culminates in a set of philosophical studies of the role of scientific understanding engagement and emotion in the aesthetic appreciation of nature *Encyclopedia of Religion and Nature* Bron Taylor, 2008-08-10 An essential and indispensable reference work covering the fascinating relationship between religion and nature Art History and Education Stephen Addiss, Mary Erickson, 1993 Guided by Stephen Addiss's grounding in art history scholarship and Mary Erickson's expertise in art education theory and practice this volume approaches the issue of teaching art history from theoretical and philosophical as well as practical and political standpoints In the first section Addiss raises issues about the discipline of art history In the second Erickson examines proposals about how art history can be incorporated into the general education of children and offers some curriculum guides and lesson plans for art educators *Art and Cultural Heritage* Barbara T. Hoffman, 2006 Art and Cultural Heritage is appropriately but not solely about national and international law respecting cultural heritage It is a bubbling cauldron of law mixed with ethics philosophy politics and working principles looking at how cultural heritage law policy and practice should be sculpted from the past as the present becomes the future Art and cultural heritage are two pillars on which a society builds its identity its values its sense of community and the individual The authors explore these demanding concerns untangle basic values and look critically at the conflicts and contradictions in existing art and cultural heritage law and policy in its diverse sectors The rich and provocative contributions collectively provide a reasoned discussion of the issues from a multiplicity of views to permit the reader to understand the theoretical and philosophical underpinnings of the cultural heritage debate **HUMAN VALUES AND ETHICS** Nisha, 2023-10-18 Revised Curriculum and Credit Framework of Under Graduate Programme Haryana According to KUK CRS University Syllabus as Per NEP 2020 Published by Thakur Publication Art Education Albert William Levi, Ralph Alexander Smith, 1991 Recommending that art be taught as a humanity this volume provides a philosophical rationale for the idea of discipline based art education Levi and Smith discuss topics ranging over both the public and private aspects of art the disciplines of artistic creation art history art criticism and aesthetics and curriculum proposals featuring five phases of aesthetic learning While there is no consensus on how the various components of aesthetic learning should be presented in order to accomplish the goals of discipline based art education the authors point out that progress toward those goals will require that those who design art education programs bring an understanding of the four disciplines to their work The introductory volume of a five volume series this book will appeal to elementary and secondary art teachers those who prepare teachers at the college level and museum educators *Selected Writings of Richard McKeon, Volume Two* Richard P. McKeon, 1998 Richard McKeon was a philosopher of extraordinary creativity who brought profoundly original ideas to bear on more standard ways of thinking and learning A classicist medievalist and revolutionary intellectual he fashioned an approach to philosophy as a plural conversation among varied traditions of thought epochs and civilizations This second volume of McKeon's selected works

demonstrates his approach to inquiry and practice in culture education and the arts Together the writings in this book show how McKeon reinvented the ancient arts of rhetoric grammar logic and dialectic for the new circumstances of a global culture In essays on creation and criticism for instance rhetoric is distinguished from grammar and shown to be the master art of invention judgment and pluralistic interpretation Writings on themes of culture meanwhile explore the self invention of mankind as justification for the arts the development of the humanities and the organization of the sciences In the closing essays on education and philosophy McKeon considers the implications of his ideas for the future of the liberal arts and higher learning

Thoughts on the Genesis of the Universe, Science, and the Divine Spiritual World Thomas Bridge,2022-08-01 This is a partial summary of the ongoing quest by mankind to understand who he is where he came from how he relates to what his senses tell him about his physical and social environment Does the continuum of change he experiences have a purpose other than what he gives it His methods of inquiry and observations using created instruments and experimentation have allowed him to discover some of the history of the universe since the beginning of space time Also the interpretation of the earth s history recorded in the rocks and rock structures the history of life recorded as fossils in time rock sequences and their relation to present day living forms and associated environments has become more clear as to man s place in the history of space time All these studies have led to a better understanding of how energy drives the forces at work that produce the ever changing present What are changes in the future that are believed by some to be even more remarkable than the amazing physical changes and processes that have been observed in the history of space time

Neurobiology of Human Values Jean-Pierre P. Changeux, Antonio Damasio, Wolf Singer, 2006-03-30 Man has been pondering for centuries over the basis of his own ethical and aesthetic values Until recent times such issues were primarily fed by the thinking of philosophers moralists and theologians or by the findings of historians or sociologists relating to universality or variations in these values within various populations Science has avoided this field of investigation within the confines of philosophy Beyond the temptation to stay away from the field of knowledge science may also have felt itself unconcerned by the study of human values for a simple heuristic reason namely the lack of tools allowing objective study For the same reason researchers tended to avoid the study of feelings or consciousness until over the past two decades this became a focus of interest for many neuroscientists It is apparent that many questions linked to research in the field of neuroscience are now arising The hope is that this book will help to formulate them more clearly rather than skirting them The authors do not wish to launch a new moral philosophy but simply to gather objective knowledge for reflection

Tradition, Modernity, and Postmodernity in

Arabic Literature Issa J. Boullata, Kamal Abdel-Malek, Wael B. Hallaq, 2000 In this collection of essays various manifestations of traditional as well as modern and postmodern themes and techniques in Arabic literature are explored For the first time the tripartite concepts of tradition modernity and postmodernity in Arabic literary works are analyzed in one volume
