ancient warfare by land and sea A Companion to Archaeology John Bintliff, 2008-04-15 A Companion to Archaeology features essays from 27 of the world's leading authorities on different types of archaeology that aim to define the field and describe what it means to be an archaeologist. Shows that contemporary archaeology is an astonishingly broad activity with many contrasting specializations and ways of approaching the material record of past societies. Includes essays by experts in reading the past through art, linguistics, or the built environment, and by professionals who present the past through heritage management and museums. Introduces the reader to a range of archaeologists: those who devote themselves to the philosophy of archaeology, those who see archaeology as politics or anthropology, and those who contend that the essence of the discipline is a hard science.

Ancient Greek Art and European Funerary Art Evangelia Georgitsoyanni, 2019-11-21 This book charts a significant aspect of European heritage: cemeteries. Cemeteries are nowadays considered as formal cultural sites and open-air museums attracting a great number of visitors. While cemetery records, memorial monuments, epitaph inscriptions, and symbols provide useful data attracting the interest of an increasing number of scholars from various disciplines and backgrounds, this collective volume consists of selected papers presented at the ASCE Association of Significant Cemeteries in Europe Conference, Ancient Greek Art and European Funerary Art, organized by the Harokopio University of Athens, Greece, on October 5-7, 2017, aiming to highlight various cultural aspects of cemeteries. The authors present funerary art and its classical origin, investigate theoretical and historical approaches, plan cultural and educational routes, design technological applications concerning the use of cemeteries as cultural sites, and propose multiple ways for promoting cemetery heritage and public engagement, while the majority of the papers is based on field and archival research and is accompanied by original images. The multicultural character of death heritage is highlighted through the variety of case studies presented in this volume, introducing different perspectives and interpretations on art history, heritage, and cultural tourism, laying the groundwork for the public discussion on our common heritage as appeared in cemeteries appealing to both the wider public and the academic community.
