

A detailed collage representing the intersection of art and perception. In the center, a magnifying glass rests on a surface, its lens focusing on a vibrant, swirling pattern of orange, red, and yellow. To the left, a painting features several large, realistic eyes. Below the magnifying glass, a spiral-bound notebook with handwritten text is visible. The background is a dense arrangement of various papers, some with sketches and others with text, creating a sense of a busy, creative workspace. The overall color palette is warm, dominated by oranges, yellows, and browns, with a bright light source in the upper left corner.

Parker,J.B. Derégowski,1991-01-14 Perception and Artistic Style explores the role of visual processes in the creation and perception of painting and drawing By looking at the relationship between perception and representation evidence is provided that purely visual processes are a richer source of artistic inspiration than is commonly realised Many of the obvious variations in artistic style are firmly rooted in visual perception and visual cognition This book looks at a range of fundamental visual processes and investigates their contribution to major stylistic features of works of art A wide selection of pictures is considered ancient medieval renaissance nineteenth and twentieth century and primitive and both well known and relatively obscure works are examined The volume includes 86 figures 13 grey scale illustrations of artworks and 43 line drawings This book will be of value to students of perception students of art and art history and since the more technical aspects have been confined to the notes the general reader who wishes to increase his her appreciation and understanding of pictorial art
