*In Another Time* Michael E Tessier, 2007-05 There are no paradoxes in time only looped back versions of history we call alternate realities Under the sands of Egypt and near the Sphinx two amateur archeologists make a most unexpected find Instead of a Pharaohs tomb they uncover an ancient dust choked room filled with books computers and modern equipment The tomb is least five thousand years old Slowly the young spelunkers unravel the mystery of the apparent paradox They also discover a working Time Machine Time itself has taken an alternate course The powerful European Trade Confederation bullies a depressed non nuclear United States The British Empire controls their colonial possessions with an iron fist Time for the young discoverers is running out Global events are slowly colliding where retaining the secret of their discovery is almost impossible A race develops to get the secrets of time travel out of the country

**Space, Time, and Stuff** Frank Arntzenius, Cian Seán Dorr, 2012-01-19 Frank Arntzenius presents a series of radical ideas about the structure of space and time and establishes a new metaphysical position which holds that the fundamental structure of the physical world is purely geometrical structure He argues that we should broaden our conceptual horizons and accept that spaces other than spacetime may exist

*sed & awk* Dale Dougherty, Arnold

Robbins,1997-03-01 sed awk describes two text processing programs that are mainstays of the UNIX programmer s toolbox sed is a stream editor for editing streams of text that might be too large to edit as a single file or that might be generated on the fly as part of a larger data processing step The most common operation done with sed is substitution replacing one block of text with another awk is a complete programming language Unlike many conventional languages awk is data driven you specify what kind of data you are interested in and the operations to be performed when that data is found awk does many things for you including automatically opening and closing data files reading records breaking the records up into fields and counting the records While awk provides the features of most conventional programming languages it also includes some unconventional features such as extended regular expression matching and associative arrays sed awk describes both programs in detail and includes a chapter of example sed and awk scripts This edition covers features of sed and awk that are mandated by the POSIX standard This most notably affects awk where POSIX standardized a new variable CONVFMT and new functions toupper and tolower The CONVFMT variable specifies the conversion format to use when converting numbers to strings awk used to use OFMT for this purpose The toupper and tolower functions each take a presumably mixed case string argument and return a new version of the string with all letters translated to the corresponding case In addition this edition covers GNU sed newly available since the first edition It also updates the first edition coverage of Bell Labs nawk and GNU awk gawk covers mawk an additional freely available implementation of awk and briefly discusses three commercial versions of awk MKS awk Thompson Automation awk tawk and Videosoft VSAwk *Rhetoric*

*Mikhail Bakhtin* Gary Saul Morson,Caryl Emerson,1990 Books about thinkers require a kind of unity that their thought may not possess This cautionary statement is especially applicable to Mikhail Bakhtin whose intellectual development displays a diversity of insights that cannot be easily integrated or accurately described in terms of a single overriding concern Indeed in a career spanning some sixty years he experienced both dramatic and gradual changes in his thinking returned to abandoned insights that he then developed in unexpected ways and worked through new ideas only loosely related to his earlier concerns Small wonder then that Bakhtin should have speculated on the relations among received notions of biography unity innovation and the creative process Unity with respect not only to individuals but also to art culture and the world generally is usually understood as conformity to an underlying structure or an overarching scheme Bakhtin believed that this idea of unity contradicts the possibility of true creativity For if everything conforms to a preexisting pattern then genuine development is reduced to mere discovery to a mere uncovering of something that in a strong sense is already there And yet Bakhtin accepted that some concept of unity was essential Without it the world ceases to make sense and creativity again disappears this time replaced by the purely aleatory There would again be no possibility

of anything meaningfully new The grim truth of these two extremes was expressed well by Borges an inescapable labyrinth could consist of an infinite number of turns or of no turns at all Bakhtin attempted to rethink the concept of unity in order to allow for the possibility of genuine creativity The goal in his words was a nonmonologic unity in which real change or surprisingness is an essential component of the creative process As it happens such change was characteristic of Bakhtin s own thought which seems to have developed by continually diverging from his initial intentions Although it would not necessarily follow that the development of Bakhtin s thought corresponded to his ideas about unity and creativity we believe that in this case his ideas on nonmonologic unity are useful in understanding his own thought as well as that of other thinkers whose careers are comparably varied and productive
