War, Citizenship, Territory Deborah Cowen, Emily Gilbert, 2024-11-01 For all too obvious reasons war empire and military conflict have become extremely hot topics in the academy Given the

changing nature of war one of the more promising areas of scholarly investigation has been the development of new theories of war and war's impact on society War Citizenship Territory features 19 chapters that look at the impact of war and militarism on citizenship whether traditional territorially bound national citizenship or transnational citizenship The editors argue that while there has been an explosion of work on citizenship and territory Western academia's avoidance of the immediate effects of war among other things has led them to ignore war which they contend is both pervasive and well nigh permanent This volume sets forth a new geopolitically based theory of war's transformative role on contemporary forms of citizenship and territoriality and includes empirical chapters that offer global coverage

Author and Title Index**, 1975 **The Canadian War on Queers** Gary Kinsman, Patrizia Gentile, 2010-03-01 From the 1950s to the late 1990s agents of the state spied on interrogated and harassed gays and lesbians in Canada employing social ideologies and other practices to construct their targets as threats to society and enemies of the state In this path breaking book Gary Kinsman and Patrizia Gentile use official security documents and interviews with gays lesbians civil servants and high ranking officials to disclose not only the acts of state repression that accompanied the Canadian war on queers but also forms of resistance that raised questions about just whose national security was being protected and about national security as an ideological practice This passionate personalized account of how the state used the ideology of national security to wage war on its own people offers ways of understanding and resisting contemporary conflicts such as the so called war on terror Handbook of Critical and Indigenous Methodologies Norman K. Denzin, Yvonna S. Lincoln, Linda Tuhiwai Smith, 2008-05-07 Built on the foundation of their landmark Handbook of Qualitative Research it extends beyond the investigation of qualitative inquiry itself to explore the indigenous and non indigenous voices that inform research policy politics and social justice We Make Our Own History Laurence Cox, Alf Gunvald Nilsen, 2014-08-20 We live in the twilight of neoliberalism the ruling classes can no longer rule as before and ordinary people are no longer willing to be ruled in the old way Pursued by global elites since the 1970s neoliberalism is defined by dispossession and ever increasing inequality The refusal to continue to be ruled like this ya basta appears in an arc of resistance stretching from rural India to the cities of the global North From this network of movements new visions are emerging of a future beyond neoliberalism We Make Our Own History responds to these visions by reclaiming Marxism as a

theory born from activist experience and practice This book marks a break both with established social movement theory and with those forms of Marxism which treat the practice of social movement organising as an unproblematic process It shows how movements can develop from local conflicts to global struggles how neoliberalism operates as a social movement from above and how popular struggles can create new worlds from below *Beyond Colonialism, Development and Globalization* Dominique Caouette, Dip Kapoor, 2015-12-15 Development studies is in a state of flux A new generation of scholars has come to reject what was once regarded as accepted wisdom and increasingly regard development and globalization as part of a continuum with colonialism premised on the same reductionist assumption that progress and growth are objective facts that can be fostered measured assessed and controlled Drawing on a variety of theoretical perspectives and approaches this book explores the ways in which social movements in the Global South are rejecting Western centric notions of development and modernization as well as creating their own alternatives By assessing development theories from the perspective of subaltern groups and movements the contributors posit a new notion of development from below one in which these movements provide new ways of imagining social transformation and a way out of the developmental dead end that has so far characterized post development approaches *Beyond Colonialism Development and Globalization* therefore represents a radical break with the prevailing narrative of modernization and points to a bold new direction for development studies
