Kniffen Book Award from the International Society Landscape Place and Material Culture and the 2023 Abbott Lowell Cummings Award from the Vernacular Architecture Forum Michigan's Keweenaw Peninsula juts into Lake Superior pointing from the western Upper Peninsula toward Canada Native peoples mined copper there for at least five thousand years but the industrial heyday of the Copper Country began in the late nineteenth century as immigrants from Cornwall Italy Finland and elsewhere came to work in mines largely run from faraway cities such as New York and Boston In those cities suburbs had developed to allow wealthier classes to escape the dirt and grime of the industrial center In the Copper Country however the suburbs sprang up nearly adjacent to mines mills and coal docks Sarah Fayen Scarlett contrasts two types of neighborhoods that transformed Michigan's mining frontier between 1875 and 1920 paternalistic company towns built for the workers and elite suburbs created by the region's network of business leaders Richly illustrated with drawings maps and photographs Company Suburbs details the development of these understudied cultural landscapes that arose when elites began to build housing that was architecturally distinct from that of the multiethnic workers within the old company towns They followed national trends and created social hierarchies in the process but also uniquely incorporated pre-existing mining features and adapted company housing practices This idiosyncratic form of suburbanization belies the assumption that suburbs and industry were independent developments Built environments evince interrelationships among landscapes people and power Scarlett's work offers new perspectives on emerging national attitudes linking domestic architecture with class and gender identity Company Suburbs complements scholarship on both industrial communities and early suburban growth increasing our understanding of the ways hierarchies associated with industrial capitalism have been built into the shared environments of urban areas as well as seemingly peripheral American towns
