Anthropological Linguistics:

Anthropological Linguistics William A. Foley, 1997-08-04 This is the first comprehensive textbook in anthropological linguistics to be published for very many years. It provides a remarkably complete and authoritative review of research questions which span the disciplines of linguistics and anthropology yet presents a coherent unified biologically based view of this cross disciplinary field. Anthropological linguistics is concerned with the place of language in its social and cultural context with understanding the role of language in forging and sustaining cultural practices and social structures. While anthropological concept of culture its subject matter ranges widely from cognitive or psychologically oriented topics such as linguistic relativity or universals of color terminology to sociocultural issues such as language and gender politeness socialization language contact and linguistic engineering. All these topics and many more are addressed here supported by examples and illustrations from an array of languages especially those of Southeast Asia and the Pacific. Students will find in this book a careful evaluation of current issues and research questions giving them a basic yet well rounded understanding of their importance in a wider field and they will find in each chapter suggestions for further readings allowing them to pursue topics of particular interest to them. *Textbook of Anthropological Linguistics* Kamal K.
