Ethical

Issues in Anthropological Research Subir Biswas, 2014-01-01 Anthropologists criticize some components of bioethics because of their abstract principles derived from arm chair philosophy and lack of cross cultural analysis and ethnocentric view for that they prepare a readymade ethical code of conduct which may differ significantly from culture to culture This volume aims to investigate such area of bioethics which may criticize in the light of anthropological fieldwork The work also finds some area of bioethics to study cultural construct of morality including cross cultural analysis keeping in mind cultural relativism in true sense The present work is an outcome of national seminar entitled Ethical Issues in Anthropological Research organized by Department of Anthropology West Bengal State University during 19 20 January 2012 Hope this work will be of interest not only to anthropologists or scholars of related field but also funding agencies and participant beneficiaries of the said field

Children and Anthropological Research Barbara Butler, Diane Michalski Turner, 2013-11-11 The first time that we the editors of this volume met a chance remark by one of us newly returned from fieldwork in Fiji quickly led to an animated discussion of our experiences doing anthropological research with children Following that occasion we began to seek each other out in order to continue such conversations because we had found no other opportunity to discuss these significant events We knew our experiences were rich sources of cross cultural data and stimuli to rethinking anthropological theory and methods A cursory review of the literature on fieldwork revealed to our surprise that fieldworker s experiences with children were rarely and only briefly mentioned Hostetler and Huntington 1970 are an early exception In order to learn more about research that included the ethnographers children we organized a conference on the topic at Michigan State University on May 1 1982 This volume includes papers from that conference as well as insights and ideas from the formal and informal discussions among the conference participants and audience This volume like the conference which preceded it is intended to be the effects of accompanying children on anthropological an exploration of field research and on the effects of fieldwork on the children themselves Additionally we see this book as part of an anthropological inquiry into research as a cultural process by which is meant the effects of the researchers cultural identity class gender age ethnicity and other characteristics on fieldwork

Cultural Anthropology Ida Magli,2001-02-27 This introductory text examines the formation history function and most significant results of cultural anthropology Special topics include the great ocean voyages of the early explorers theories of progress and adaptation the development of anthropology through the seventeenth eighteenth and nineteenth centuries the study of religion taboo and myth and the classic works of Franz Boas Alfred L Kroeber Robert Lowe and Bronislaw Malinowski Also considered is the influence of anthropological methods and research on psychoanalysis and how anthropology wrought a revolution in historical research *Anthropology* Christoph Wulf,2024-05-31 Originally published in

German Christoph Wulf's *Anthropology* sets its sights on a topic as ambitious as its title suggests: anthropology itself. Arguing for an interdisciplinary and intercultural approach to anthropology that incorporates science, philosophy, history, and many other disciplines, Wulf examines with breathtaking scope all the ways that anthropology has been understood and practiced around the globe and through the years. Seeking a central way to understand anthropology in the midst of many different approaches to the discipline, Wulf concentrates on the human body. An emblem of society, culture, and time, the body is also the result of many mimetic processes: the active acquisition of cultural knowledge. By examining the role of the body in the performance of rituals, gestures, language, and other forms of imagination, he offers a bold new look at how culture is produced, handed down, and transformed. Drawing such examinations into a comprehensive and sophisticated assessment of the discipline as a whole, *Anthropology* looks squarely at the mystery of humankind and the ways we have attempted to understand it.
