Dealing with Inequality Marilyn Strathern,1987-12-10 This 1987 volume comprises ten essays by anthropologists who interrogate the nature of social inequality between the sexes in societies mostly in Melanesia

Twentieth Century Mythologies Daniel Dubuisson,Martha Cunningham,2014-12-05 Myths have intrigued scholars throughout history Twentieth Century Mythologies traces the study of myth over the last century presenting the key theories of mythology and critiquing traditional definitions of myth The volume presents the work of influential scholars in mythology the noted Indo Europeanist Georges Dumezil the structuralist anthropologist Claude Levi Strauss and the historian of religions Mircea Eliade Twentieth Century Mythologies is an indispensable resource for scholars of religion and myth and for all those interested in the history of ideas

Encyclopedia of Social History Peter N. Stearns,1993-12-21 A reference surveying the major concerns findings and terms of social history The coverage includes major categories within social history family demographic transition multiculturalism industrialization nationalism major aspects of life for which social history has provided a crucial per

Norbert Elias Richard Kilminster,2007-11-13 Few sociologists of the first rank have scandalised the academic world to the extent that Elias did Developed out of the German sociology of knowledge in the 1920s Elias s sociology contains a sweeping radicalism which declares an academic war on all your houses His sociology of the human condition sweeps aside the contemporary focus on modernity and rejects most of the paradigms of sociology as one sided economic teleological individualistic and or rationalistic As sociologists Elias also asks us to distance ourselves from mainstream psychology history and above all philosophy which is summarily abandoned although carried forward on a higher level This enlightening book written by a close friend and pupil of Elias is the first book to explain the refractory uncomfortable side of Elias s sociological radicalism and to brace us for its implications It is also the first in depth analysis of Elias s last work The Symbol Theory in the light of selected contemporary developments in archaeology anthropology and evolutionary theory

Peasants and Religion Mats Lundahl,Jan Lundius,2012-10-02 This book examines the relationship between economics politics and religion through the case of Olivorio Mateo and the religious movement he inspired from 1908 in the Dominican Republic The authors explore how and why the new religion was formed and why it was so successful Comparing this case with other peasant movements they show ways in which folk religion serves as a response to particular problems which arise in peasant societies during times of stress

Legal Symbolism Jiří Příbáň,2016-04-22 Jir Prib n s book contributes to the field of systems theory of law in the context of European legal and political integration and constitution making It puts recent European legislative efforts and policies especially the EU enlargement process in the context of legal theory and philosophy Furthermore the author shows that the system of positive law has a symbolic meaning reflecting how it also contributes to the semantics of political identity democratic power and moral values as well as the complex relations between law politics and morality

Culture and Anomie Christopher Herbert,1991-10-18 Few ideas are as important and pervasive in the discourse of the twentieth century as the idea of culture Yet culture Christopher Herbert

contains an idea laden from its inception with ambiguity and contradiction In *Culture and Anomie* Christopher Herbert conducts an inquiry into the historical emergence of the modern idea of culture that is at the same time an extended critical analysis of the perplexities and suppressed associations underlying our own exploitation of this term Making wide reference to twentieth century anthropologists from Malinowski and Benedict to Evans Pritchard Geertz and Lévi Strauss as well as to nineteenth century social theorists like Tylor Spencer Mill and Arnold Herbert stresses the philosophically dubious unstable character that has clung to the culture idea and embarrassed its exponents even as it was developing into a central principle of interpretation In a series of detailed studies ranging from political economy to missionary ethnography Mayhew and Trollope's fiction Herbert then focuses on the intellectual and historical circumstances that gave to culture the appearance of a secure category of scientific analysis despite its apparent logical incoherence What he describes is an intimate relationship between the idea of culture and its antithesis the myth or fantasy of a state of boundless human desire a conception that binds into a single tradition of thought such seemingly incompatible writers as John Wesley who called this state original sin and Durkheim who gave it its technical name in sociology anomie Methodologically provocative and rich in unorthodox conclusions *Culture and Anomie* will be of interest not only to specialists in nineteenth century literature and intellectual history but also to readers across the wide range of fields in which the concept of culture plays a determining role **The**

Life and Work of Ernesto De Martino Flavio A. Geisshuesler, 2021-08-09 In *The Life and Work of Ernesto de Martino* Italian Perspectives on Apocalypse and Rebirth in the Modern Study of Religion Flavio A Geisshuesler offers a comprehensive study of one of Italy's most colorful historians of religions The book inserts de Martino's dramatic life trajectory within the intellectual climate and the socio political context of his age in order to offer a fresh perspective on the evolution of the discipline of religious studies during the 20th century Demonstrating that scholarship on religion was animated by moments of fear of the apocalypse it brings de Martino's perspective into conversation with Mircea Eliade Claude Lévi Strauss and Clifford Geertz in order to recover an Italian approach that promises to redeem religious studies as a relevant and revitalizing field of research in the contemporary climate of crisis Ritual Theory, Ritual Practice Catherine

Bell, 1992-01-30 *Ritual studies* today figures as a central element of religious discourse for many scholars around the world *Ritual Theory Ritual Practice* Catherine Bell's sweeping and seminal work on the subject helped legitimize the field In this volume Bell re-examines the issues methods and ramifications of our interest in ritual by concentrating on anthropology sociology and the history of religions Now with a new foreword by Diane Jonte Pace Bell's work is a must read for understanding the evolution of the field of ritual studies and its current state **Global Archaeological Theory** Pedro

Paulo Funari, Andrés Zarankin, Emily Stovel, 2006-04-07 Archaeological theory has gone through a great upheaval in the last 50 years from the processual theory which wanted to make archaeology more scientific to post processual theory which understands that interpreting human behavior even of past cultures is a subjective study This subjective approach

incorporates a plurality of readings thereby implying that different interpretations are always possible allowing us to modify and change our ideas under the light of new information and or interpretive frameworks In this way interpretations form a continuous flow of transformation and change and thus archaeologists do not uncover a real past but rather construct a historical past or a narrative of the past Post processual theory also incorporates a conscious and explicit political interest on the past of the scholar and the subject This includes fields and topics such as gender issues ethnicity class landscapes and consumption This reflects a conscious attempt to also decentralize the discipline from an imperialist point of view to an empowering one Method and theory also means being politically aware and engaged to incorporate diverse critical approaches to improve understanding of the past and the present This book focuses on the fundamental theoretical issues found in the discipline and thus both engages and represents the very rich plurality of the post processual approach to archaeology The book is divided into four sections Issues in Archaeological Theory Archaeological Theory and Method in Action Space and Power in Material Culture and Images as Material Discourse

Rethinking Comparison in Archaeology Joana Alves-Ferreira, Ana Vale, 2017-06-23 Although comparative exercises are used or applied both explicitly and implicitly in a large number of archaeological publications they are often uncritically taken for granted As such the authors of this book reflect on comparison as a core theme in archaeology from different perspectives and different theoretical and practical backgrounds The contributors come from different universities and research contexts and approach themes and objects from Prehistory to the Early Middle Ages presenting case studies from Western Europe the Near East and Latin America The chapters here also relate archaeology with other disciplines like art studies photography cinema computer sciences and anthropology and will be of interest to a wide range of readers not only archaeologists and those interested in the area of social sciences but for all those interested in how we construct the past today

The Racial Discourses of Life Philosophy Donna V. Jones, 2010 In the early twentieth century the life philosophy of Henri Bergson summoned the *lan vital* or vital force as the source of creative evolution Bergson also appealed to intuition which focused on experience rather than discursive thought and scientific cognition Particularly influential for the literary and political N gritude movement of the 1930s which opposed French colonialism Bergson s life philosophy formed an appealing alternative to Western modernity decried as mechanical and set the stage for later developments in postcolonial theory and vitalist discourse Revisiting narratives on life that were produced in this age of machinery and war Donna V Jones shows how Bergson Nietzsche and the poets Leopold Senghor and Aim C saire fashioned the concept of life into a central aesthetic and metaphysical category while also implicating it in discourses on race and nation Jones argues that twentieth century vitalism cannot be understood separately from these racial and anti Semitic discussions She also shows that some dominant models of emancipation within black thought become intelligible only when in dialogue with the vitalist tradition Jones s study strikes at the core of contemporary critical theory which integrates these older discourses into larger critical frameworks and she

traces the ways in which vitalism continues to draw from and contribute to its making
