Anthropological Theory Today:

Anthropological Theory Today Henrietta L. Moore, 2000-01-12 This important book makes a bold statement about the nature and value of anthropological theory at the beginning of the 21st century Neo Anthropological Theory Gaya Pandey, 2017-01-01 The book *Neo Anthropological Theory* presents the contributions of those great anthropological thinkers who have propounded their theories after Second World War particularly from 1950 onwards About the contributions of great classical anthropological thinkers we have sufficient books But about the contributions of great neo anthropological thinkers we have few books having expressions in foreign English language They lack Indian expressions As a result Indian students and scholars of anthropology are facing a great problem because they do not find reading materials on neo anthropological theory sufficiently and systematically under one cover The sole purpose of the book is to purely contextual written with a view to provide contributions of neo anthropological thinkers under one cover systematically in simple English language with Indian expression The book consists of contributions of neo anthropological thinkers in the following areas Neo evolutionism Cultural ecology and Neo cultural ecology Cultural materialism Neo Psychological anthropology Structuralism Biologised anthropology Cognitive anthropology Symbolic anthropology Interpretive anthropology Critical anthropology Modernism Post modernism Industrialism and post industrialism Globalisation Legacy of two Great thinkers in anthropology Karl Marx *Anthropological Theory* Robert Alan Manners, David Kaplan, Anthropological theory has been much discussed in recent years yet the crucial questions still remain how can it be defined how is it developed how is it to be applied and how can one confirm it The editors of *Anthropological Theory* answer these questions by presenting essays relating to various aspects of anthropological theory Their selections from widely scattered and often difficult to obtain sources present a comprehensive set of writings that describe the current position and issues involved in theory The development of field work in anthropology generated a tremendous emphasis on empirical data and research The plethora of information awaiting collection and the enthusiasm with which the field embraced it so immersed anthropologists that they were unable to relate this new information to the field as a whole Manners and Kaplan believe that this lack of generalization had a profoundly negative effect upon the discipline Therefore they look closely into the relationship between field work and theory in an opening essay and go on to present material that demonstrates the value and the necessity of theory in anthropology Essays by anthropologists and other social scientists deal with explanation evolution ecology ideology structuralism and a number of other issues reflecting throughout the editors conviction that anthropology is a science the goal of which is to produce generalizations about sociocultural phenomena The book provides necessary perspective for examining and evaluating the crucial intellectual concerns of modern anthropology and will therefore be important for the work of every anthropologist Robert A Manners 1913 1996 received his Ph D from Columbia University and carried on field work in the Caribbean among American Indians in the Southwest and in East Africa He wrote numerous articles and reviews

for anthropological journals as well as many books He was professor of anthropology Brandeis University where he started up the department David Kaplan is professor emeritus of anthropology at Brandeis University He has contributed articles and reviews to various journals He has also done field work in Mexico and his areas of specialty include economic anthropology method and theory and peasant culture of Mesoamerica

Anthropological Explorations in Queer Theory Mark Graham,2016-04-15 Anthropological Explorations in Queer Theory offers a wide ranging fusion of queer theory with anthropological theory shifting away from the discussion of gender categories and identities that

have often constituted a central concern of queer theory and instead exploring the queer elements of contexts in which they are not normally apparent Engaging with a number of apparently non sexual topics including embodiment and fieldwork regimes of value gifts and commodities diversity discourses biological essentialisms intersectionality the philosophy of Bergson and Deleuze and the representation of heterosexuality in popular culture this book moves to discuss central concerns of contemporary anthropology drawing on both the latest anthropological research as well as classic theories In broadening the field of queer anthropology and opening queer theory to a number of new themes both empirical and theoretical Anthropological Explorations in Queer Theory will appeal not only to anthropologists and queer theorists but also to geographers and sociologists concerned with questions of ontology materiality and gender and sexuality

Engaging Anthropological Theory Mark Moberg, 2024-09-30 The updated third edition of this book critically reconsiders the history of anthropological theory Covering key concepts and theorists in a lively style Engaging Anthropological Theory examines the historical context of anthropological ideas and the contested nature of anthropology itself The book illustrates how anthropological ideas about human diversity are rooted in historical conditions including the West's relationship with colonized societies and the politics of scholarly inquiry itself Exploring anthropological ideas in context helps students understand how they evolved and how they relate to society and history This new edition pays close attention to non canonical figures and scholars of color whose contributions are too often bypassed in disciplinary histories Students and instructors will also appreciate the open ended review questions for each chapter that stimulate critical thought and discussion Extensively illustrated throughout this engaging text moves away from the dry recitation of past viewpoints in anthropology and shows their continued relevance to modern life

Situating Fertility Susan Greenhalgh, 1995-07-13 This collection addresses the world wide pattern of falling birth rates Fertility has commonly been treated from a specialized demographic perspective but there is today widespread dissatisfaction with conventional demographic approaches which are criticized for neglecting the cultural social and political forces that affect reproductive behavior For their part anthropologists have only recently begun to apply their characteristic approaches to the study of reproduction Drawing on new ethnographic and historical research and on a variety of theoretical approaches the contributors to this book indicate some of the ways in which demography might take into account historical processes political forces and cultural conceptions

The Ethics of Participation in Environmental Field Research Lydia Gibson, Julia Sauma, 2025-07-28 Local participation is increasingly seen as a central and ethical part of environmental research As such many environmental efforts are becoming increasingly participatory Participation as a string of literature has shown has many political economic social and epistemic consequences and ethics is fluid polyvalent and contextual Right is right wrong is wrong is dangerous rhetoric that centres western experiences and forecloses the myriad realities and relations bundled within and forced upon marginalised experiences Both participation and ethics as concepts and praxis cast decades long shadows over field research particularly in anthropology yet much of these discussions are left at the threshold of interdisciplinary spaces where participation traditional and Indigenous knowledge and co production are brought in to sanitise and legitimise environmental actions Where are our lessons learned and what ought we to make of their absence The first half of this volume offers ethnographic examples that allow us to begin to ask whether participation in the capitalist machinery and colonial legacies of academic knowledge is ever even ethical The second half of the book is dedicated to anti solutions refusals to define problems and approaches in fixed closed terms from which equations calculations and solutions can be derived This book provokes important new discussions about ethical participation in environmental field research by bringing to the fore the fluid nature of both ethics and participation The volume aims to provide critical intervention for students and researchers across natural and social sciences whose fieldwork includes engagement with local communities and stakeholders as well as conservation policymakers and practitioners who consult and work with local communities
