## **Anthropology And Photography 1860-1920:**

**Anthropology and Photography, 1860-1920** Elizabeth Edwards, 1992 Traces the use of photography in British anthropological expeditions and discusses the photograph as document [Anthropology and Photography, 1860-1920](#) Elizabeth Edwards, 1992 Since its beginnings photography has been a valuable resource for anthropologists in the recording of ethnographic data This book published in conjunction with the Royal Anthropological Institute RAI London looks at the significance and relevance of still photography in British anthropology from about 1860 until 1920 It examines how photography provides evidence of the past and how this evidence is used in conjunction with more traditional forms of anthropological information And it considers the reflexive and critical nature of the photographic way of seeing within anthropology The book opens with five substantial essays on the nature of photography visual perception theoretical and historical approaches to anthropological photography and the photograph as a document These are followed by twenty shorter essays by leading anthropologists and historians with special interest in visual representation The essays examine the content and historical contexts of a range of 157 remarkable photographs drawn mainly from RAI collections many reproduced for the first time The book as a whole establishes the intellectual and anthropological frameworks for the analysis of specific photographs and articulates a body of ideas about photography and the way in which it was perceived in anthropology The volume encompasses many ways of thinking from the theoretical to the ethnographic and from the historical to the post modern This pluralist approach stresses the complex nature of the photographic message and its interpretation within anthropology in a way that is as relevant to modern material as it is to the historical *Anthropology and Photography, 1860-1920* Elizabeth Edwards, 1992 **Anthropology & Photography 1860-1920** Elizabeth Edwards, 1994 [Photography, Anthropology and History](#) Elizabeth Edwards, 2016-04-22 Photography Anthropology and History examines the complex historical relationship between photography and anthropology and in particular the strong emergence of the contemporary relevance of historical images Thematically organized and focusing on the visual practices developed within anthropology as a discipline this book brings together a range of contemporary and methodologically innovative approaches to the historical image within anthropology Importantly it also demonstrates the ongoing relevance of both the historical image and the notion of the archive to recent anthropological thought As current research rethinks the relationship between photography and anthropology this volume will serve as a stimulus to this new phase of research as an essential text and methodological reference point in any course that addresses the relationship between anthropology and visibility [Photography](#) Mary Warner Marien, 2006 Each of the eight chapters takes a period of up to forty years and examines the medium through the lenses of art science social science travel war fashion the mass media and individual practitioners Back Cover [Viewpoints](#) Mary Strong, Laena Wilder, 2013-05-01 Early in its history anthropology was a visual as well as verbal discipline But as time passed visually oriented professionals became a minority among their colleagues and

most anthropologists used written words rather than audiovisual modes as their professional means of communication Today however contemporary electronic and interactive media once more place visual anthropologists and anthropologically oriented artists within the mainstream Digital media small sized and easy to use equipment and the Internet with its interactive and public forum websites democratize roles once relegated to highly trained professionals alone However having access to a good set of tools does not guarantee accurate and reliable work Visual anthropology involves much more than media alone This book presents visual anthropology as a work in progress open to the myriad innovations that the new audiovisual communications technologies bring to the field It is intended to aid in contextualizing explaining and humanizing the storehouse of visual knowledge that university students and general readers now encounter and to help inform them about how these new media tools can be used for intellectually and socially beneficial purposes Concentrating on documentary photography and ethnographic film as well as lesser known areas of study and presentation including dance painting architecture archaeology and primate research the book s fifteen contributors feature populations living on all of the world s continents as well as within the United States The final chapter gives readers practical advice about how to use the most current digital and interactive technologies to present research findings
