M. Hann, Peter Skalník, 2005 Under socialism the anthropological sciences developed under conflicting pressures on the one hand Soviet influences Marxist ideology and institutional changes on the other the continued influence of national traditions and of the distinction between Volkskunde and Volkerkunde The chapters bring out striking differences between the countries considered the German Democratic Republic Poland Czechoslovakia and Hungary They also draw attention to variation within countries and between sub branches of the discipline Coverage extends from the Stalinist years to the end of the socialist era and the topics range from folklore studies at home to fieldwork expeditions abroad The Anthropology of Religion, Magic, and Witchcraft -- Pearson eText Rebecca L Stein, Philip Stein, 2015-08-07 This book emphasizes the major concepts of both anthropology and the anthropology of religion and examines religious expression from a cross cultural perspective while incorporating key theoretical concepts It is aimed at students encountering anthropology for the first time **The Anthropology of Religion, Magic, and Witchcraft** Rebecca L. this volume Beyond local and personal trajectories the authors illuminate more general and comparative questions Was there anything like a socialist anthropology common to all three countries Did Soviet and or Marxist influences in the discipline and in society in general penetrate so deeply as to form an unavoidable common denominator of anthropological practice The answers turn out to be complex and subtle While unifying ideological forces were very strong in the 1950s diversity increased thereafter Anthropology was entangled with national ideology in all three countries but the evidence nonetheless calls for polyphonic interpretations

Anthropology and the Bushman Alan Barnard,2020-05-18 The Bushman is a perennial but changing image The transformation of that image is important It symbolizes the perception of Bushman or San society of the ideas and values of ethnographers who have worked with Bushman peoples and those of other anthropologists who use this work Anthropology and the Bushman covers early travellers and settlers classic nineteenth and twentieth century ethnographers North American and Japanese ecological traditions the approaches of African ethnographers and recent work on advocacy and social development It reveals the impact of Bushman studies on anthropology and on the public The book highlights how Bushman or San ethnography has contributed to anthropological controversy for example in the debates on the degree of incorporation of San society within the wider political economy and on the validity of the case for indigenous rights as a special kind of human rights Examining the changing image of the Bushman Barnard provides a new contribution to an established anthropology debate

Politics and Pitfalls of Japan Ethnography Jennifer Robertson,2013-10-18 Four anthropologists Elise Edwards Ann Elise Lewallen Bridget Love and Tomomi Yamaguchi draw on their fieldwork experiences in Japan to demonstrate collectively the inadequacy of both the Code of Ethics developed by the American Anthropological Association AAA and the dictates of Institutional Review Boards IRB when dealing with messy human realities The four

candidly and critically explore the existential dilemmas they were forced to confront with respect to this inadequacy for the AAA's code and IRBs consider neither the vulnerability and powerlessness of ethnographers nor the wholly unethical and even criminal deportment of some informants As Jennifer Robertson points out in her Introduction whereas the AAA's Code tends to perpetuate the stereotype of more advantaged fieldworkers studying less advantaged peoples IRBs appear to protect their home institutions from possible litigation rather than living and breathing people whose lives are often ethically compromised irrespective of the presence of an ethnographer In her commentary Sabine Fr hst ck who incurred ample experience with ethical dilemmas in the course of her pathbreaking ethnographic research on Japan's Self Defense Forces situates the four articles in a broader theoretical context and emphasizes the link between political engagement and ethnographic accuracy This book was previously published as a special issue of Critical Asian Studies *American Journal of Islamic Social Sciences* 3:2 Lois Lumya' al Faruqi, Akbar S.
