**Anthropology: Theoretical Practice In Culture And Society** Michael Herzfeld, 2004-01-01 Builds on a collaborative international project sponsored by UNESCO to offer an overview of social and cultural anthropology The volume offers a vision of the militant middle ground between theory and practice humanistic and scientific approaches and symbolic and materialist perspectives Rejecting conventional layout noted anthropologist Michael Herzfeld brings his collaborators specialists in their various fields into a broader conversation about the ways in which social and cultural anthropology can illuminate aspects of the human condition that less intimate approaches cannot reveal Also addresses the theoretical as well as ethical commitments that have enabled anthropologists to play a leading role in the critique of racism and other forms of intolerance Herzfeld examines topics ranging from mass media environmental and development issues kinship and suffering in transnational settings the politics of both the nation state and the local community the arts cosmologies of science as well as religion to the relationship between social life and history Readers will find their eyes opened to the complexities of culture and society at a time of vastly intensified communication and contact and will discover that anthropology offers unique insights into both the common predicaments of humankind and the specific ways that different groups have developed to address those predicaments

Jain, 2012-03-12 Research articles on Indian diaspora **Translating Indigenous Knowledges** Ma Carmen África Vidal Claramonte, 2024-12-30 In this book Vidal presents a new way of translating indigenous epistemologies For centuries the Western world has ordained what knowledge is and what it should be and has also been responsible for transmitting that knowledge This universal knowledge has traveled to the four corners of the globe In recent decades there has been a steadily growing interest in dialogical epistemologies Disciplines ranging from historiography and philosophy to anthropology are calling for this universalist idea of knowledge to be modified Thanks to this change of perspective other forms of knowledge which until now have been ignored are gradually coming to light Indigenous knowledges are not constructed with the scientific binary static Cartesian or univocal logic characteristic of Western societies Non Western types of knowledge incorporate senses emotions body objects and matter It is impossible to reduce indigenous knowledges to Western conceptualizations The types of translation covered in this book assume that knowledge is not transmitted only in the Western way and that there are world views that take into account the emotions and body as well as the intellect This includes all types of beings human non human and extrahuman In the face of this plurality of epistemologies this book affirms that the static Western conceptual traditions characterized by a binary logic are not useful and that there is a need to translate outside the scope of these traditions The examples given in this book show that translation is not only a process involving Western and non Western languages Translation is not a mere substitution of one word for another because knowledge is not only transmitted through words It also involves non verbal elements Knowledge is transmitted through objects songs sensations and emotions as well as through words Moreover many non Western traditions do not translate with language systems but rather with other semiotic systems such as knots threads colors and bodies in movement This is a timely topical and transdisciplinary reading of interest to advanced students and researchers in translation studies

**The Anthropology of Cultural Performance** L. Lewis,2013-08-07 Contemporary life in most nation states is not truly cultural but rather culture

like especially in large scale societies Beginning with a distinction between special events and everyday life Lewis examines fundamental events including play ritual work and carnival and connects personal embodied habits and large scale cultural practices      Religion and Society Gerrie Ter Haar,Yoshio Tsuruoka,2007 Religion is a driving force of the twenty first century Here is a book that discusses every aspect of this fascinating subject proposing an agenda for future study The authors are leading scholars from all over the world      *Let's Twist Again* Karin Taylor,2006 This book explores the lives of young Bulgarians in the Cold War era when the Communist Party saw dance hits like The Twist as a menace to youth and society It investigates the Party s efforts to shape youth into socialist personalities and to create a socialist mass culture in the face of Westernization On the basis of biographical interviews the book takes a critical look at the popular view of youth enthusiasm for Western rock and lifestyles as resistance Young Bulgarians scarcely challenged the socialist order But at the same time the Party failed to impose its notion of conformity on the self proclaimed Beatles generation      *Anthropology* Christoph Wulf,2024-05-31 Originally published in German Christoph Wulf s Anthropology sets its sights on a topic as ambitious as its title suggests anthropology itself Arguing for an interdisciplinary and intercultural approach to anthropology that incorporates science philosophy history and many other disciplines Wulf examines with breathtaking scope all the ways that anthropology has been understood and practiced around the globe and through the years Seeking a central way to understand anthropology in the midst of many different approaches to the discipline Wulf concentrates on the human body An emblem of society culture and time the body is also the result of many mimetic processes the active acquisition of cultural knowledge By examining the role of the body in the performance of rituals gestures language and other forms of imagination he offers a bold new look at how culture is produced handed down and transformed Drawing such examinations into a comprehensive and sophisticated assessment of the discipline as a whole Anthropology looks squarely at the mystery of humankind and the ways we have attempted to understand it      *Improvising Theory* Allaine Cerwonka,Liisa H. Malkki,2008-11-15 Scholars have long recognized that ethnographic method is bound up with the construction of theory in ways that are difficult to teach The reason Allaine Cerwonka and Liisa H Malkki argue is that ethnographic theorization is essentially improvisatory in nature conducted in real time and in necessarily unpredictable social situations In a unique account of and critical reflection on the process of theoretical improvisation in ethnographic research they demonstrate how both objects of analysis and our ways of knowing and explaining them are created and discovered in the give and take of real life in all its unpredictability and immediacy Improvising Theory centers on the year long correspondence between Cerwonka then a graduate student in political science conducting research in Australia and her anthropologist mentor Malkki Through regular e mail exchanges Malkki attempted to teach Cerwonka then new to the discipline the basic tools and subtle intuition needed for anthropological fieldwork The result is a strikingly original dissection of the processual ethics and politics of method in ethnography      Cultural Intimacy Michael Herzfeld,2014-05-12 In this new updated edition Herzfeld includes

more discussion about what cultural intimacy has come to mean for other authors and researchers and how it can contribute to present studies of global processes and the forces that resist them

**Rethinking Culture** David White, 2017-03-31 Organizational or corporate culture is the most overused and least understood word in business if not society While the topic has been an object of keen academic interest for nearly half a century theorists and practitioners still struggle with the most basic questions What is organizational culture Can it be measured Is it a dependent or independent variable Is it causal in organizational performance and if so how Paradoxically managers and practitioners ascribe cultural explanations for much of what constitutes organizational behavior in organizations and moreover believe culture can be engineered to their own designs for positive business outcomes What explains this divide between research and practice While much academic research on culture is challenged by ontological epistemic and ethical difficulties there is little empirical evidence to show culture can be deliberately shaped beyond espoused values The gap between research and practice can be explained by one simple reason the science and practice of culture has yet to catch up to managerial intuition Managers are correct in suspecting culture is a powerful normative force but until now current theory and research is not able to adequately account for cultural behavior in organizations Rethinking Culture describes and presents evidence for a new framework of organizational culture based on the cognitive science of the so called cultural mind It will be of relevance to academics and researchers with an interest in business and management organizational culture and organizational change as well as cognitive and cultural anthropologists and sociologists interested in applications of theory in organizational and institutional settings
