The Skin of the System Benjamin Robinson,2009-09-28 The Skin of the System objects to the idea that there is only one modernity that of liberal capitalism Starting from the simple conviction that whatever else East German socialism was it was real this book focuses on what made historical socialism different from social systems in the West In this way the study elicits the general question what must we think in order to think an other system at all To approach this question Robinson turns to the remarkable writer Franz F hmann the East German who most single mindedly dedicated himself to understanding what it means to transform from fascism to socialism F hmann s own serial loyalties to Hitler and Stalin inform his existential meditations on change and difference By placing F hmann s politically alert and intensely personal literary inventions in the context of an inquiry into radical social rupture The Skin of the System wrests the brutal materiality of twentieth century socialism from attempts to provincialize both its desires and its failures as antimodern ideological follies

Freedom and Adaptive Preferences Carl Christian von Weizsäcker, 2024-06-25 Traditional welfare economics works with the assumption of the fully rational economic agent *homo economicus* whose preferences are fixed that is they are not influenced by their economic environment To the contrary this book presents a theory of welfare economics that maintains the principles of normative individualism while allowing for adaptive or changeable preferences Why do economists talk of preferences In this book Carl Christian von Weizsäcker shows that the concept is intimately related to freedom of action The concept of preferences is the mode by which normative economics introduces the idea of freedom or liberty into its theory of human interaction Moreover the economic research of recent decades has provided a large amount of experimental and other empirical findings e g the work on bounded rationality which contradicts the assumption of fixed preferences This book argues that this large body of findings is consistent with the hypothesis of adaptive preferences This together with the proposition that adaptive preferences allow a generalization of traditional welfare economics has implications for policy applications of behavioral economics based on normative individualism Normative individualism is an approach which intrinsically connects with the value of liberty or freedom It is argued that normative individualism is indispensable for a society of free citizens thus providing the foundations of civil liberty This book will be of great interest to readers of welfare economics behavioral economics and economic theory The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution NonCommercial No Derivatives CC BY NC ND 4.0 license Any third party material in this book is not included in the OA Creative Commons license unless indicated otherwise in a credit line to the material Please direct any permissions enquiries to the original rightsholder

Biology as Society, Society as Biology: Metaphors Sabine Maasen, E. Mendelsohn, P. Weingart, 2013-12-01 not lie in the conceptual distinctions but in the perceived functions of metaphors and whether in the concrete case they are judged positive or negative The ongoing debates reflect these concerns quite clearly namely that metaphors are judged on the basis of supposed dangers they pose and opportunities they offer These are the criteria of evaluation that are obviously dependent on the context in which the transfer of meaning occurs Our fundamental concern is indeed the transfer itself its prospects and its limits Looking at possible functions of metaphors is one approach to understanding and elucidating sentiments about them The papers in this volume illustrate by quite different examples three basic functions of metaphors illustrative heuristic and constitutive These functions represent different degrees of transfer of meaning Metaphors are illustrative when they are used primarily as a literary device to increase the power of conviction of an argument for example Although the difference between the illustrative and the heuristic function of metaphors is not

great it does exist metaphors are used for heuristic purposes whenever differences of meaning are employed to open new perspectives and to gain new insights In the case of constitutive metaphors they function to actually replace previous meanings by new ones Sabine Maassen in her paper introduces the distinction between transfer and transformation
