Dietary Strategies for Managing Hypertension and Hypotension: Insights and Mechanisms Agnieszka Kujawska, Claire Elizabeth Robertson, Fadi Charchar, Nicholas McMahon, José Augusto Simões, 2025-09-12 Research investigating nutritional strategies for improved disease management has increased due to the widespread prevalence of blood pressure BP abnormalities. With advancements in wearable technology BP can now be monitored continuously and noninvasively leading to the identification of various pathologies associated with BP fluctuations. Essential hypertension affects over 30% of the global adult population highlighting the urgent need for effective management strategies. Recent studies have shed light on the acute changes in BP in response to orthostatic stress yet the underlying mechanisms and the efficacy of dietary interventions remain underexplored. Despite the vast amount of data collected there is a critical need for further research to understand the pathological changes in BP and to evaluate the potential of nutritional strategies in BP modulation. This Research Topic investigates the role of diet, food products and dietary supplements in regulating BP. The primary objectives include exploring the impact of nutritional interventions on BP, understanding the mechanisms through which diet influences BP and evaluating the effectiveness of various dietary strategies in managing BP abnormalities. Specific questions to be addressed include the role of salt intake in essential hypertension, the effects of dietary interventions on the autonomic nervous system and the influence of body composition and vitamin deficiencies on BP regulation. Science of Spices & Culinary Herbs: Latest Laboratory, Pre-clinical, and Clinical Studies: Volume 6 Atta-ur-Rahman, M. Iqbal Choudhary, Sammer Yousuf, 2024-08-13 Many herbs and spices in addition to their culinary use for taste contain chemical compounds which have medicinal uses. For this reason herbs and spices have been used for treating various ailments since ancient times. Modern scientific methods have enabled researchers to isolate and analyze bioactive compounds from herbs and spices to develop medicines for different diseases. *Science of Spices and Culinary Herbs* presents current reviews on studies performed on herbs and spices. This book series is an informative resource for medicinal chemists, herbalists and biomedical researchers interested in the science of natural herbs and spices that are a common part of regional diets and folk medicine. The sixth volume of this series features reviews on medicinal aspects of a selection of herbs and spices including Pimpinella anisum L, Anise, Aniseed, Sinapis alba L, Mustard Seeds, Cinnamomum verum, Cinnamon, Tamarindus indica L, Tamarind, Curcuma longa, Curcumin, Glycyrrhiza glabra, Licorice. *Inventory of Federal Energy-related Environment and Safety Research for ...*, 1979
