## **Antievolution An Annotated Bibliography:**

*Anti-evolution* Tom McIver, 1988 Opposition to evolution is broad and deep seated Interestingly many of the arguments flatly contradict one another Over 1 852 books pamphlets and tracts are given lengthy nonpolemical annotations summarizing content and identifying doctrines or theories Format background on author and context are included

**Darwinian Myths** Edward Caudill, 2005-05-30 In Darwinian Myths Edward Caudill examines the ability of Darwin's theory to inspire legends focusing particularly on the impact of social Darwinism on popular culture This compelling testimony to the power of myth shows the ways in which over the years Darwin's ideas twisted truncated and misapplied have been appropriated by individuals governments and cultural elites to lend credibility to xenophobic racist and imperialist political movements and policies Caudill uses newspaper and magazine accounts and correspondence to trace the myth making and promotional efforts of Darwin himself as well as the transformation of his empirically based theory into the philosophy of social Darwinism

**The Antievolution Pamphlets of Harry Rimmer** Edward B. Davis, 2021-10-17 Originally published in 1995 The Antievolution Pamphlets of Harry Rimmer is the sixth volume in the series Creationism in Twentieth Century America The volume brings together original sources from the prominent evangelist and pastor Harry Rimmer The consortium of pamphlets in this volume detail Rimmer's antievolutionist sentiments a notion which characterized his early writings The pamphlets detail Rimmer's rhetoric on evolution and science from the early part of the 20th century as he travelled across America to disseminate his writings The works in this volume address Rimmer's polemic on the danger posed by modern science and the consequential disassociation with religion While Rimmer did not discount science itself he argued for what he termed true science claiming that modern science was based only in scientific opinion and not fact As a self proclaimed scientist these writings take a unique view of the relationship between religion and science from this period through Rimmer's dual nature as both scientist and pastor This volume will be of great interest to historians of natural history science and religion

Evolution Vs. Creationism Eugenie Carol Scott, 2005 Almost eighty years after the Scopes trial the debate over the teaching of evolution continues to rage There is no easy resolution it is a complex topic with profound scientific religious educational and legal implications How can a student or parent understand this issue which is such a vital part of education Evolution vs Creationism provides a badly needed comprehensive and balanced survey Written by one of the leading advocates for the teaching of evolution in the United States this accessible resource provides an introduction to the many facets of the current debate the scientific evidence for evolution the legal and educational basis for its teaching and the various religious points of view as well as a concise history of the evolution creationism controversy Each of the four sections of Evolution vs Creationism provides a resource that will assist the reader in better understanding these issues The first section addresses the nature of how evolution works as part of the scientific enterprise as well as a summary of the relationship between religious beliefs and science A section on the history of the controversy provides a handy

synopsis of the lengthy struggles from before Darwin to the present day between advocates of creationism and the proponents of evolution A collection of primary source documents addressing cosmology law education and religious issues from all sides of the debate constitute the third section The book concludes with a selection of resources for further information for those who wish to study the topic in more depth

**In the Beginning** Michael Lienesch, 2007-04-23 The current controversy over teaching evolution in the public schools has grabbed front page headlines and topped news broadcasts all across the United States In the Beginning investigates the movement that has ignited debate in state legislatures and at school board meetings Reaching back to the origins of antievolutionism in the 1920s and continuing to the promotion of intelligent design today Michael Lienesch skillfully analyzes one of the most formidable political movements of the twentieth century Applying extensive original sources and social movement theory Lienesch begins with fundamentalism describing how early twentieth century fundamentalists worked to form a collective identity to develop their own institutions and to turn evolution from an idea into an issue He traces the emerging antievolution movement through the 1920s examining debates over Darwinism that took place on college campuses and in state legislatures throughout the country With fresh insights and analysis Lienesch retells the story of the 1925 Scopes monkey trial and reinterprets its meaning In tracking the movement from that time to today he explores the rise of creation science in the 1960s the alliance with the New Christian Right in the 1980s and the development of the theory of intelligent design in our own time He concludes by speculating on its place in the politics of the twenty first century In the Beginning is essential for understanding the past present and future debates over the teaching of evolution

**The Creationist Writings of Byron C. Nelson** Paul Nelson, 2021-10-17 Originally published in 1995 this is the fifth volume in the series Creationism in 20th Century America It re publishes After Its Kind a critique on theories of biological evolution and a defense of the biblical account of creation which Nelson wrote when he was a Pastor in New Jersey where he also attended classes in genetics and zoology at Rutgers university His 1931 volume The Deluge Story in Stone A History of the Flood Theory of Geology also reprinted here was continuously in print until the 1960s As his scientific and theological correspondence expanded in the wake of his publications Nelson became further involved in the evolution debates During the late 1930s his writings concentrated on early man and the glacial phenomena he saw all about him in Wisconsin and he compiled the materials he thought necessary to relate Scripture to the evidence of human antiquity

**Blood Theology** Eugene F. Rogers (Jr.), Eugene F. Rogers, Jr, 2021-03-25 A recovery and rediscovery of the surprising strangeness of blood in theological especially Christian and civic discourse

**Imagining the Impossible** Karl S. Rosengren, Carl N. Johnson, Paul L. Harris, 2000-05-29 This volume first published in 2000 is about the development of human thinking that stretches beyond the ordinary boundaries of reality Various research initiatives emerged in the decade prior to publication exploring such matters as children s thinking about imaginary beings magic and the supernatural The purpose of this book is to capture something of the larger spirit of these

efforts In many ways this new work offers a counterpoint to research on the development of children's domain specific knowledge about the ordinary nature of things that has suggested that children become increasingly scientific and rational over the course of development In acquiring an intuitive understanding of the physical biological or psychological domains even young children recognize that there are constraints on what can happen However once such constraints are acknowledged children are in a position to think about the violation of those very same constraints to contemplate the impossible

**America's Forgotten Poet-Philosopher** Michael A. Flannery, 2023-12-01 This book examines the ideas and influences of a nearly forgotten Swedish American philosopher John Elov Boodin 1869 1950 A friend and student of William James and protégé of Josiah Royce at Harvard Boodin combined Jamesian pragmatism and Roycean idealism in developing original scholarship nearly sixty articles and eight books from 1900 to 1947 in addition to a volume of posthumous papers published in 1957 Although he is seldom remembered today the enduring importance of pragmatism and the rising influence of process theology today suggests that his close reading of early to mid twentieth century science and vast grasp of philosophical issues warrants a renewed interest in his work that can be a valuable antidote to the sterile and constricting effects of reductionism and dogmatic materialism prevalent today in both those fields

**The Pseudoscience Wars** Michael D. Gordin, 2012-09-26 The Pseudoscience Wars simultaneously reveals the surprising Cold War roots of our contemporary dilemma and points readers to a different approach to drawing the line between knowledge and nonsense

*The Great Turning Point* Terry Mortenson, 2004 Many people in the Church today have the idea that young earth creationism is a fairly recent invention popularized by fundamentalist Christians in the mid 20th century Is this view correct In fact scholar Terry Mortenson has done fascinating original research on this subject in England and documents that several leading pre Darwin scholars and scientists known as scriptural geologists did not believe in long ages for the earth This book is a thoroughly researched work of reference for every library certainly every creationist library Terry Mortenson spent much time and work on this project in both the United States and Great Britain The history of the Church and evolution is fascinating and it is interesting to see not only the tremendous influence that evolution has had on the Church but on society as well

**Tower of Babel** Robert T. Pennock, 2000-02-28 Creationists have acquired a more sophisticated intellectual arsenal This book reveals the insubstantiality of their arguments Creationism is no longer the simple notion it once was taken to be Its new advocates have become more sophisticated in how they present their views speaking of intelligent design rather than creation science and aiming their arguments against the naturalistic philosophical method that underlies science proposing to replace it with a theistic science The creationism controversy is not just about the status of Darwinian evolution it is a clash of religious and philosophical worldviews for a common underlying fear among Creationists is that evolution undermines both the basis of morality as they understand it and the possibility of purpose in life In *Tower of Babel* philosopher Robert T Pennock compares the views of the new creationists with those of the old and reveals the insubstantiality of their arguments One of

Pennock's major innovation is to turn from biological evolution to the less charged subject of linguistic evolution which has strong theoretical parallels with biological evolution both in content and in the sort of evidence scientists use to draw conclusions about origins. Of course an evolutionary view of language does conflict with the Bible which says that God created the variety of languages at one time as punishment for the Tower of Babel. Several chapters deal with the work of Phillip Johnson a highly influential leader of the new Creationists. Against his and other views Pennock explains how science uses naturalism and discusses the relationship between factual and moral issues in the creationism evolution controversy. The book also includes a discussion of Darwin's own shift from creationist to evolutionist and an extended argument for keeping private religious beliefs separate from public scientific knowledge.

**Fundamentalisms and Society** Martin E. Marty, R. Scott Appleby, 1997-01-05. The Fundamentalism Project. Edited by Martin E. Marty and R. Scott Appleby. Around the world, fundamentalist movements are profoundly affecting the way we live. Misinformation and misperception about fundamentalism exacerbate conflicts at home and abroad. Yet policymakers, journalists, students, and others have lacked any comprehensive resource on the explosive phenomenon of fundamentalism. Now the Fundamentalism Project has assembled an international team of scholars for a multivolume assessment of the history, scope, sources, character, and impact of fundamentalist movements within the world's major religious traditions. *Fundamentalisms and Society* shows how fundamentalist movements have influenced human relations, education, women's rights, and scientific research in over a dozen nations and within the traditions of Islam, Judaism, Christianity, Buddhism, and Hinduism. Drawn from the fields of anthropology, sociology, history of religion, and history of science, the contributors cover topics such as the educational structures of Hindu revivalism, women in fundamentalist Iran and Pakistan, and the creationist cosmos of Protestant fundamentalism. In a concluding essay, William H. McNeill situates contemporary fundamentalisms within a world historical context. *The Fundamentalism Project, Volume 2*. Martin E. Marty and R. Scott Appleby direct the Fundamentalism Project. Marty, the Fairfax M. Cone Distinguished Service Professor of the History of Modern Christianity at the University of Chicago, is the senior editor of the *Christian Century* and the author of numerous books, including the multivolume *Modern American Religion*, also published by the University of Chicago Press. Appleby, a research associate at the University of Chicago, is the author of *Church and Age*, *Unite the Modernist Impulse in American Catholicism*.

**Evidence for Faith** John Warwick Montgomery, 2018-01-27. Twenty essays that argue for the truth of what C. S. Lewis called mere Christianity. The contributors, all distinguished scholars, present their evidence from a variety of disciplines including philosophy, archaeology, biology, history, law, and cosmology. Step by step, the writers construct a convincing argument for the accuracy of the Bible and the credibility of the Christian faith.

*Fundamentalisms and Society* Martin E. Marty, R. Scott Appleby, 1993-03-15. A systematic overview of the advances made by antiseccular religious movements over the past twenty-five years and showing the impact these movements have had on human relations, education, women's rights, and scientific research. Publisher: **Guides to Library Collection**

**Development** John Thomas Gillespie, Ralph J. Folcarelli, 1994-08-15 Intended to enhance collection development in school public and college libraries this volume lists and annotates approximately 1 500 significant bibliographies published from 1985 through 1993 with some earlier but still useful publications Annotations indicate scope of the work size often the number of entries kinds of material included purpose arrangement nature of entries indexes special features and a recommendation Author title and subject indexes provide easy access to the entries With its deep and comprehensive coverage this work will help not only in the process of selecting and acquiring materials for the library but also in the process of identification of items for reference readers advisory interlibrary loan and collection evaluation      **Evolution Vs.**

**Creationism** Eugenie C. Scott, 2009-08-03 Presents the scientific evidence for evolution and reasons why it should be taught in schools provides various religious points of view and offers insight to the evolution creationism controversy      **Reference**

**Books Bulletin** , 1989 A compilation of evaluations appearing in Reference books bulletin a section of the journal Booklist

Perspectives on Science and Christian Faith , 1993      *The Creation/Evolution Controversy* Kary D. Smout, 1998-10-28 This rhetorical study of the various language strategies and competing worldviews involved in the 140 year argument between Biblical creationists and Darwinian evolutionists focuses on the 1860 Huxley Wilberforce debate the 1925 Scopes Monkey Trial and the 1981 Arkansas Creation Science Trial When Darwin published his *Origins of Species* in 1859 he initiated a debate about the origin of human life and the role of God in human affairs scarcely equalled in world history Smout traces the response of Biblical creationists to Darwinian evolutionists Looking carefully at the stories told and the tactics used by both sides he analyzes all available accounts of the original debate culminating in the 1860 Huxley Wilberforce debate the 1925 Scopes Monkey Trial and the 1981 Arkansas Creation Science Trial Professor Smout argues that both sides in the controversy use various language strategies to persuade the culture as a whole to see the world that they see and to enact their position as public policy As Smout illustrates the problem is that both sides rely on an inadequate conception of language as a namer of timeless realities rather than as an instrument used by human communities to achieve their goals He attempts to articulate a better view of language and to show how it might help solve intractable arguments such as this He argues that we should see language as a tool that shapes what we see and definitions of terms as political acts rather than statements of fact made by disciplinary experts An important analysis for students and scholars in rhetoric history religion and sociology
