Antitrust and Economic Efficiency Charles K. Rowley,1973 *Mergers and economic efficiency* United States. Department of Commerce,1980 **Mergers and Economic Efficiency** ,1981 **Readings in Public Choice and Constitutional Political Economy** Charles Rowley,Friedrich Schneider,2008-08-09 Public choice is the study of behavior at the intersection of economics and political science Since the pioneering work of Duncan Black in the 1940s public choice has developed a rich literature drawing from such related perspectives as history philosophy law and sociology to analyze political decision making by citizen voters elected officials bureaucratic administrators lobbyists and other rational actors in social and economic context with an emphasis on identifying differences between individual goals and collective outcomes Constitutional political economy provides important insights into the relationship between effective constitutions and the behavior of ordinary political markets In Readings in Public Choice and Constitutional Political Economy Charles Rowley and Friedrich Schneider have assembled an international array of leading authors to present a comprehensive and accessible overview of the field and its applications Covering a wide array of topics including regulation and antitrust taxation trade liberalization political corruption interest group behavior dictatorship and environmental issues and featuring biographies of the founding fathers of the field this volume will be essential reading for scholars and students policymakers economists sociologists and non specialist readers interested in the dynamics of political economy *Mergers and Economic Efficiency: Industrial concentration, mergers, and growth* ,1980 Predatory Pricing William L. Greene,1996 *Antitrust and Economic Efficiency* ,1985 Economic Efficiency Ben Van Rompuy,2012-08-01 Over the past decade we have witnessed an apparent convergence of views among competition agency officials in the European Union and the United States on the appropriate goals of competition law enforcement Antitrust policy it is now suggested should focus on enhancing economic efficiency which we are to believe will promote consumer welfare Recent EU Commission Guidelines on the application of Article 101 TFEU appear to banish considerations that cannot be construed as having an economic efficiency value such as the environment cultural policy employment public health and consumer protection from the application of Article 101 TFEU Arguing that the professed adoption of an exclusive efficiency approach to Article 101 TFEU does not preclude but rather obfuscates the role of non efficiency considerations the author of this timely contribution accomplishes the following objectives traces the genesis of the shift to an efficiency orientation in EU and US antitrust policy and dispels several ingrained misconceptions that underpin it demonstrates the close interrelationship between evolving images of the purpose of antitrust the development of related enforcement norms and enforcement output provides in depth analyses of a number of analytically rich cases in the audiovisual sector and particularly those related to sports rights and explores what the role of non efficiency considerations in the application of Article 101 TFEU could and should be under the modernized enforcement regime **Reconciling Efficiency and Equity** Damien Gerard,Ioannis Lianos,2019-05-09 Provides a new conceptualization

of competition law as economic inequality and its interaction with efficiency become of central concern to policy and decision makers **Competition Law and Consumer Protection** Katalin Judit Cseres,2005-01-01 The assumption that competition law and consumer protection are mutually reinforcing is rarely challenged The theory seems uncontroversial However because a positive interaction between the two is presumed to be self evident the frequent conflicts that do in fact arise are often dealt with on an ad hoc basis with no overarching legal authority There is a clear need for a detailed and coherent understanding of exactly where the complements and tensions between the two policy areas exist Dr Cseres in depth analysis provides that understanding Proceeding from the dual perspective of law and economics that is of justice fairness and reasonableness on the one hand and of efficiency of the other she fully considers such underlying issues as the following the role of competition law and consumer law in a free market economy the notion of consumer welfare the effect of the modernisation of EC competition law for consumers economics theories of information bounded rationality and transaction costs the special significance of vertical agreements and merger control and how consumers are affected by information asymmetries The ultimate focus of the book is on current and emerging EC law in which a rapprochement between the two areas seems to be under way Dr Cseres provides a knowledgeable guide to the various strands of theory policy and jurisprudence that she shows ought to be taken into account in the process including schools of thought and law and policy experience in both Europe and the United States A special chapter on Hungary where post 1989 law and practice reveal a fresh and distinctly forward looking understanding of the matter is one of the book's most extraordinary features Competition Law and Consumer Protection stands alone as a committed contribution to bridging a gap in legal knowledge the significance of which grows daily It will be of immeasurable value to a wide range of professionals from academics and researchers to officials policymakers and practitioners in competition law consumer protection advocacy economic theory and planning business administration and various pertinent government authorities **Mergers and Economic Efficiency:**

Enterprise Forms and Economic Efficiency Kazuhiko Mikami,2011-07-01 The book conducts a comparative study on the form of enterprise focusing on broadly defined cooperative firms in comparison with conventional capitalist firms It explores the essential advantages and disadvantages of the different types of firms and attempts to answer why capitalist firms are so prevalent in our economy The book attempts to explain these questions from the viewpoint of market failure in the framework of standard microeconomic theory In this analytical framework it proposes an alternative system of business organization based upon consumer cooperatives and the market for their memberships which can coexist consistently with the system of capitalist firms and the stock market within a single market economy The existing studies of the cooperative

sector have been rather ideological. The analytical framework that is presented in this book helps promote scientific exploration of cooperative and other types of firms which are indispensable and potentially promising constituents of our society *Expert Witnesses* Faust F. Rossi,Eleanor M. Fox,James T. Halverson,1991 *The International Handbook of Competition* Manfred Neumann,Jürgen Weigand,2013-01-01 This comprehensive Handbook demonstrates that academic thinking new and old has a role to play in shaping modern competition policy Gunnar Niels Oxera This indispensable Handbook examines the interface of competition policy competition law and industrial economics The book aims to further our understanding of how economic reasoning and legal expertise complement each other in defining the fundamental issues and principles in competition policy In specially commissioned chapters the book provides a scholarly review of economic theory empirical evidence and standards of legal evaluation with respect to monopolization of markets exploitation of market power and mergers among other issues The International Handbook of Competition Second Edition will be accessible to a wide audience including students of economics and law public administrators lawyers consultants and business executives

Gifford,Robert T. Kudrle,2015-02-11 How is it that two broadly similar systems of competition law have reached different results across a number of significant antitrust issues

While the United States and the European Union share a commitment to maintaining competition in the marketplace and employ similar concepts and legal language in making antitrust decisions differences in social values political institutions and legal precedent have inhibited close convergence. With *The Atlantic Divide in Antitrust* Daniel J Gifford and Robert T Kudrle explore many of the main contested areas of contemporary antitrust including mergers price discrimination predatory pricing and intellectual property. After identifying how prevailing analyses differ across these areas they then examine the policy ramifications. Several themes run throughout the book including differences in the amount of discretion firms have in dealing with purchasers the weight given to the welfare of various market participants and whether competition tends to be viewed as an efficiency generating process or as rivalry. The authors conclude with forecasts and suggestions for how greater compatibility might ultimately be attained.
