Antitrust Law Handbook 1998:

Antitrust Law Handbook William C. Holmes, 1999 *Competition Laws Outside the United States* H. Stephen Harris, 2001 Competition Law in the EU and the Netherlands: a Practical Guide Jules Stuyck, Michel Waelbroeck, Bart L.P. van Reeken, 2000 *Research Handbook on EU Competition Law and the Energy Transition* Leigh Hancher, Ignacio Herrera Anchustegui, 2024-10-03 The Research Handbook on EU Competition Law and the Energy Transition comprehensively analyses key topics in the field covering both traditional and emerging antitrust state aid and policy issues related to energy transformation increased sustainability goals and the functioning of European energy markets **EC Competition Law Handbook** Marc van der Woude, Christopher Jones, 2009 This volume provides a complete breakdown of all EC competition law developments in the last year clearly laid out to ensure the relevant information is easily accessible It also contains all the relevant EC legislation cases and decisions helping you work effectively through this area of law **Harmonisation of EU Competition Law Enforcement** Jurgita Malinauskaite, 2019-11-15 This book explores how the EU's enforcement of competition law has moved from centralisation to decentralisation over the years with the National Competition Authorities embracing more enforcement powers At the same time harmonisation has been employed as a solution to ensure that the enforcement of EU competition rules is not weakened and the internal market remains a level playing field While employing a comparative law argument the book accordingly analyses the need for harmonisation throughout the different stages of development of the EU's competition law enforcement save Merger control and State Aid the underlying rationale and the extent to which comparative studies have been undertaken to facilitate the harmonisation process from an historical perspective It also covers the Directives such as the Antitrust Damages Directive and the ECN Directive Investigating both public and private enforcement it also examines the travaux préparatoires for the enforcement legislation in order to discover the drafters' intent The book addresses the European and the Member States perspectives namely the Central and Eastern European CEE countries as harmonisation proceeds through dialogue and cooperation between the two levels Lastly it explores the extent to which harmonisation of the competition law enforcement framework has been accepted and implemented in the Member States legal systems or has led to the fragmentation of the national systems of the CEE countries The Oxford Handbook of Ordoliberalism Thomas Biebricher, Werner Bonefeld, Peter Nedergaard, 2022-09-22 Since the financial crisis of 2008 ordoliberalism emerged from relative obscurity to become one of the crucial terms of analysis across a wide range of academic literatures and public discussion In fact it became the main reference for a number of issues including assessments of the attempted resolution of the Eurozone crisis arguments about German hegemony in Europe debates over the future of economic liberalism and controversies about authoritarian liberalism What is striking about ordoliberalism is its pronounced ambiguity as some view it as a more refined and potentially progressive variant of neoliberalism while others cast it as a blueprint for a regime of austerity reigning over a society of competition with only

rudimentary democratic institutions And while ordoliberalism is often portrayed as a quintessentially German tradition its impact has not been confined to the German context extending all the way to the unlikely case of China In short ordoliberalism is a phenomenon of arguably considerable influence that remains poorly understood as it is mystified by its proponents and vilified by its critics The Oxford Handbook of Ordoliberalism contains a selection of chapters written by an international cast of experts on ordoliberalism that aim to elucidate and analyze the latter in all of its many facets From the intellectual origins and prime exemplars to its main theoretical themes and practical applications up to the most recent debates taking place across a range of disciplines this volume offers the first comprehensive account of ordoliberalism for the English speaking world

Handbook of Law and Economics A. Mitchell Polinsky, Steven Shavell, 2007-11-07 Law can be viewed as a body of rules and legal sanctions that channel behavior in socially desirable directions for example by encouraging individuals to take proper precautions to prevent accidents or by discouraging competitors from colluding to raise prices The incentives created by the legal system are thus a natural subject of study by economists Moreover given the importance of law to the welfare of societies the economic analysis of law merits prominent treatment as a subdiscipline of economics Our hope is that this two volume Handbook will foster the study of the legal system by economists The two volumes form a comprehensive and accessible survey of the current state of the field Chapters prepared by leading specialists of the area Summarizes received results as well as new developments

European Competition Law Lennart Ritter, W. David Braun, 2005-01-01 No branch of European law has been as subject to expansion and change as competition law Between the enormous forces of globalisation technology and EU enlargement the Commission and national competition authorities have been compelled to keep rethinking their practices and procedures and issuing new regulations Now in the wake of its highly acclaimed predecessors the new Third Edition of European Competition Law offers the practitioner everything required to act in accordance with the latest developments in the field Along with the thorough guide to continuing practice that its readers have come to expect European Competition Law in its Third Edition fully covers such areas as the following the Commission's new assessment of distribution practices and vertical restraints in particular the block exemptions granted by Regulations 2790/1999 and 1400/2002 procedure before national competition authorities and national courts for enforcement of European rules under Regulation 1/2003 the new Merger Control Regulation in force as of 1 May 2004 the new Transfer of

Technology Regulation and the increased fines for hard core cartel practices or abuse of dominant market position The Third Edition is remarkable in that it actually previews the substantive and procedural rules that will be coming into effect during 2004 and subsequent years And like prior editions the work has no peer in its coverage of past administrative practice and the case law of the Court of Justice All in all European Competition Law Third Edition will be of immeasurable value to practitioners who need to keep informed about how EC competition laws are applied so they can continue to render practical meaningful advice to firms whose agreements transactions and conduct in the marketplace are governed by competition rules

Antitrust Law Handbook William C. Holmes, Melissa H. Mangiaracina, 2012 *Does EU Merger Control Discriminate Against Small Market Companies?* Mika Oinonen, 2010-01-01 Although the question posed by the title of this book has generated considerable debate the essential issue remains open and largely blurred While some believe that there is no so called small market problem others discern discrimination against small market companies i.e. companies with a strong position in their home markets but a modest position in the European and global markets and a consequent need for changes in competition law The author of this enormously helpful work here sets the stage for meaningful discussion by analysing the EC Merger Regulation's objectives economic foundations and application practice to present a reasoned view of the issues that can be considered relevant for such a discussion Considering their effect on the small market problem the author scrutinizes such factors as the following the Commission's methodology for delineating relevant markets in merger assessments unnecessary prohibition caused by overestimation of the market power of small market mergers erroneous

approval of cases that should actually be prohibited impact of the so called Harvard and Chicago schools of competition theory and their key policy implications process related alternative views of competition and new synthesizing approaches relevant criteria for a proper analysis of market power concentration measures and market shares barriers to entry price and profitability analyses and product definition v geographic definition of markets In a final chapter the author presents some tentative conclusions normative in nature concerning the problem and the relevant issues relating to it As the first in depth analysis of the issues that are actually involved with its particular diagnosis of the assessment of market power in considering the relevant issues for the problem this study brings into salience the terms of the debate on the problem and thus takes a giant step forward towards defining what needs to be done Competition lawyers policymakers and academics in Europe and elsewhere will find the discussion of great value *Competition Law and Development* D. Daniel Sokol, Thomas K.

Cheng, Ioannis Lianos, 2013-09-11 The vast majority of the countries in the world are developing countries there are only thirty four OECD Organisation for Economic Co operation and Development countries and yet there is a serious dearth of attention to developing countries in the international and comparative law scholarship which has been preoccupied with the United States and the European Union Competition Law and Development investigates whether or not the competition law and policy transplanted from Europe and the United States can be successfully implemented in the developing world or whether the developing world experience suggests a need for a different analytical framework The political and economic environment of developing countries often differs significantly from that of developed countries in ways that may have serious implications for competition law enforcement The need to devote greater attention to developing countries is also justified by the changing global economic reality in which developing countries especially China India and Brazil have emerged as economic powerhouses Together with Russia the so called BRIC countries have accounted for thirty percent of global economic growth since the term was coined in 2001 In this sense developing countries deserve more attention not because of any justifiable differences from developed countries in competition law enforcement either in theoretical or practical terms but because of their sheer economic heft This book the second in the Global Competition Law and Economics series provides a number of viewpoints of what competition law and policy mean both in theory and practice in a development context **EU Competition Law and the Financial Services Sector** Andrea Lista, 2013-06-07 Competition

law is a complex and constantly evolving area of law which affects every aspect of the market economy including the financial services sector This book is a comprehensive and practical guide to the application of the EU competition rules to banking and insurance industries This book is divided into two parts the first part explores the application of Articles 101 102 and 107 TFEU to the insurance industry Emphasis is placed on recent changes which have progressively eroded the block exemption regime that traditionally benefited the insurance industry In the second part of the book focus is on the application of the Articles of TFEU to the banking industry with specific reference to card payment systems which give rise to

some of the most intricate antitrust issues in the financial services sector Relevant Commission decisions and European Court of Justice case law are discussed and suggestions are made for an alternative regulatory framework through comparative analysis of US regulations This book will be an invaluable reference point for legal practitioners specialising in EU Competition law as well as postgraduate students and academic researchers working in competition law and the financial services sector

Parental Liability in EU Competition Law Peter Whelan, 2023-08-10 In enforcing EU competition law the Commission employs a unique doctrine of parental antitrust liability it imposes fines on the parent company of an infringing subsidiary in cases where the parent exercises decisive influence over the subsidiary's commercial policy Critics of this contentious aspect of EU competition law believe that the doctrine is unfair ineffective obscure disproportionate contrary to due process and based upon a dubious if not extremely flimsy justificatory foundation Such criticism raises serious and unanswered questions about the legitimacy of the Commission's efforts to enforce competition law *Parental Liability in EU Competition Law A Legitimacy Focused Approach* is the first monograph to be dedicated to this controversial topic Written by Professor Peter Whelan the book contends that although the general concept of parental liability can be justified in principle the current EU level doctrine of parental antitrust liability in fact suffers from a distinct and problematic lack of legitimacy More specifically the said doctrine displays significant deficiencies with respect to effectiveness fairness and legality Given this undesirable state of affairs *Parental Liability in EU Competition Law* offers a fully rationalised reformulated approach to parental antitrust liability for EU competition law violations that is built around the notion of parental fault That approach provides a solid normative account of how to impose parental antitrust liability in a manner that is theoretically robust effective in practice fair in substance and legally sound

European Competition Law Annual 1999 Claus-Dieter Ehlermann, Michelle Everson, 2001-06-12 In this book leading experts focus on contentious and challenging aspects of EU State Aid policy

Economics and the Enforcement of European Competition Law Christopher Decker, 2009-01-01 The book is well written and readable by non economists The approaches questions methodology and basis for selection of cases interviewees are clearly explained and justified This book is a valuable contribution to the literature Rhonda Smith *Competition and Consumer Law Journal* Recent years have seen a trend toward an economics based approach to the enforcement of European competition law But what is meant by economics based and how does this approach sit with legal and enforcement practice This book seeks to place in perspective the growing use of economics in European competition law enforcement by examining precisely how economics contributes to the enforcement activity of the European Commission and Courts Christopher Decker provides unique empirical insights as to how economic theory thinking techniques and data have featured in decision making in the area of co-ordinated effects The role of economics is examined throughout the entire enforcement process from the decision to initiate an investigation to the design and implementation of remedies and its conclusions are of general relevance to all areas of competition law enforcement where economics is used

Utilising a broad and multifaceted conception of economics this book is essential reading for academics and students interested in European competition law EC competition lawyers applied industrial economists and enforcement officials It will also be an invaluable tool for academic libraries and institutes government agencies law firms and economic consultancies *Antitrust Law and Mergers* David Hansen, 2025-03-31 This book discusses the economic models and quantitative research involved in merger control forecasts and the relationship between antitrust law and economics Analyzing qualitative and quantitative models within forecasts of merger control the book applies the framework of antitrust law This book proposes that economic modelling econometrics application and juridical application of antitrust law go hand in hand Discussing the question of an economically rational application and enforcement of antitrust and merger control law the book covers both the basic concepts and theory behind economic model forecasts as well as the application of merger control law It also takes a closer look at legal control options for competition authorities when making a forecast decision and the associated problems of applying the law to this The book will be of interest to researchers in the field of antitrust law competition law economics and corporate law
