Kenwood. Iveagh Bequest,2003-01-01 Set high on a ridge in historic parkland less than five miles from Trafalgar Square Kenwood is London's favourite country house Remodelled by Robert Adam in the eighteenth century in 1928 it became the home of the Iveagh Bequest a superb collection of old master paintings that includes Rembrandt's most celebrated self portrait the only Vermeer in England outside the National Gallery and the Royal Collection Gainsborough's Countess Howe and classic works by Reynolds Romney Lawrence and Turner The collection was formed between 1887 and 1891 by Edward Cecil Guinness 1st Earl of Iveagh Chairman of the

world's leading brewery who gave it to the nation with the house and estate This book is published to mark the seventy fifth anniversary of the opening of the Iveagh Bequest and is the first new catalogue of the collection to be produced in fifty years It discusses each work revealing the personalities behind the faces in the portraits the social circumstances of each commission and the way that art met the ambitions of artists patrons sitters and collectors There are also two introductory essays that provide context for the house and discuss the ways in which Lord Iveagh was a pioneer collector Beautifully produced this catalogue of paintings is the essential book on Kenwood      **Cities and the Grand Tour** Rosemary Sweet,2012-10-04 A fascinating study of how British travellers experienced described and represented the cities they visited on the Grand Tour      **Pictures and Popery** Clare Haynes,2017-05-15 The part religion played in questions of national identity in early modern England is a familiar historical theme yet little work has been done on how this worked culturally Nowhere is this more visible than in the seeming contradiction of a militantly Protestant nation such as England that had a high regard for Catholic art It is this dichotomy the tensions between art and anti Catholicism that forms the central investigation of this book During the late seventeenth and eighteenth century religious art was closely identified with idolatry and the use of images was one of the most obvious markers of the boundary between Protestantism and Catholicism This manifested itself in an unease about the status of the religious image in English society which was articulated in religious tracts anti Catholic propaganda polemical debate court cases and numerous other places In light of these attacks upon idolatry the fact that a great deal of Catholic art was so highly regarded and sought after seems puzzling By discussing English attitudes towards the works of Italian painters including Raphael Michelangelo and Domenichino and the ways in which native artists sought appropriately Protestant ways of emulating them this volume offers a fascinating perspective on the dichotomy that existed between English appreciation and disapproval of Catholic culture By taking this cultural and artistic approach and applying it to the broader historical themes a new and invigorating way of understanding religion and national identity is offered      Cosmopolitanism in Mexican Visual Culture María Fernández,2014-01-06 Since the colonial era Mexican art has emerged from an ongoing process of negotiation between the local and the global which frequently involves invention synthesis and transformation of diverse discursive and artistic traditions In this pathfinding book María Fernández uses the concept of cosmopolitanism to explore this important aspect of Mexican art in which visual culture and power relations unite the local and the global the national and the international the universal and the particular She argues that in Mexico as in other colonized regions colonization constructed power dynamics and forms of violence that persisted in the independent nation state Accordingly Fernández presents not only the visual qualities of objects but also the discourses ideas desires and practices that are fundamental to the very existence of visual objects Fernández organizes episodes in the history of Mexican art and architecture ranging from the seventeenth century to the end of the twentieth century around the consistent but unacknowledged historical theme of cosmopolitanism allowing readers to discern relationships among various

historical periods and works that are new and yet simultaneously dependent on their predecessors She uses case studies of art and architecture produced in response to government commissions to demonstrate that established visual forms and meanings in Mexican art reflect and inform desires expectations memories and ways of being in the world in short that visual culture and cosmopolitanism are fundamental to processes of subjectification and identity *Bad Blood* Clayton

Schuster,2019-05-28 Why is there so much bad blood involved in the stories of artists and their artworks Immerse yourself in 18 infamous artistic rivalries dramatized with gripping moments of narrative to understand how the rivalries that art fans love to gossip about serve a larger purpose in the way cultures approach the idea of art and the artist Why did Michelangelo loathe Raphael for decades after the latter had died How did Pablo Picasso and Henri Matisse balance their perpetual competition with a lifelong friendship What transgression pitted the notorious titans of the London graffiti scene Banksy and King Robbo in a rivalry that ended with a tragic and unforeseeable death An investigative journey transforms some of the big names of the art world into real people often grumpy ornery antagonistic and flawed and better reveals how all of us respond to art
