Martin Hollis

Autonomous Man:

The Education of Autonomous Man R. T. Allen, 1992 This new study of modern educational thought relates the selected thinkers and theories to a profound change in the way in which men have come to understand themselves and the world The theories of Rousseau Kant Froebel Hegel Marx Nietzsche contemporary English speaking philosophers and schemes of education Sartre Helvetius and B F Skinner are shown in separate studies to be variations upon the theme of man as a self defining and self legislating subject in a world that does nothing to present him with any Law or Way Education therefore becomes a problem a matter of arbitrary selection of what the young are to be taught and to do

The Autonomy Theme in the Church Dogmatics John Macken, 1990-04-27 The problem of human freedom before God echoes through the conflicts of western theology Karl Barth faced not only the question of autonomy but also the theological answers that liberals had attempted to provide to it This notable book written by a Roman Catholic theologian provides a comprehensive and useful guide to the new wave of German Barth interpretation

Models of Man Martin Hollis, 2015-10-15 This classic book is Martin Hollis s influential rationalist account and exploration of human action and identity

What Can She Know? Lorraine Code, 2018-09-05 In this lively and accessible book Lorraine Code addresses one of the most controversial questions in contemporary theory of knowledge a question of fundamental concern for feminist theory as well Is the sex of the knower epistemologically significant Responding in the affirmative Code offers a radical alterantive to mainstream philosophy s terms for what counts as knowledge and how it is to be evaluated Code first reviews the literature of established epistemologies and unmaskes the prevailing assumption in Anglo American philosophy that the knower is a value free and ideologically neutral abstraction Approaching knowledge as a social construct produced and validated through critical dialogue she defines the knower in light of a conception of subjectivity based on a personal relational model Code maps out the relevance of the particular people involved in knowing their historical specificity the kinds of relationships they have the effects of social position and power on those relationships and the ways in which knowledge can change both knower and known In an exploration of the politics of knowledge that mainstream epistemologies sustain she examines such issues as the function of knowledge in shaping institutions and the unequal distribution of cognitive resources What Can She Know will raise the level of debate concerning epistemological issues among philosophers political and social scientists and anyone interested in feminist theory

By What Standard? R. J. Rushdoony, 2009-11-19 An introduction into the problems of Christian philosophy It focuses on the philosophical system of Dr Cornelius Van Til which in turn is founded upon the presuppositions of an infallible revelation in the Bible and the necessity of Christian theology for all philosophy Basic to this study is the belief that presuppositions of human thought in every field must be basically one in order to arrive at any concept which both validates biblical faith and human knowledge The sovereignty of the self contained God is the key to every field in that only the God of Scripture makes all things possible and explicable and is thus the basic premise not only of

theology but of philosophy science and indeed all knowledge In that God is the Creator of all things He is their only valid principle of interpretation in that they derive both their existence and meaning from His creative act This belief is herein set forth in terms of various aspects of human thought Again basic to this study is the belief that such a philosophy finds consistent and able exposition in the writings of Cornelius Van Til This work therefore is thus both an exposition as well of Van Til s development of that philosophy a school of thought to which the author subscribes This is Rushdoony s foundational work on philosophy

Is Man the Measure? Norman L. Geisler, 2005-07-06 An academically respectable description and evaluation of secular humanism is available at last The diversity within humanism receives full recognition in this book as does the fact that not everything about humanism is bad from a Christian point of view Indeed the author continues there are many emphases within humanism that are compatible with Christian beliefs a thesis to which he devotes an entire chapter Part 1 summarizes in turn eight prominent forms of humanism Huxley s evolutionism Skinner s behaviorism Sartre s existentialism Dewey s pragmatism Marxism Rand s egocentrism Lamont s culturalism and the coalitional form present in the humanist declaration and manifestoes Emerging from these chapters are both the differences between humanists and the consensus that binds them together It is this humanistic consensus writes the author that most radically conflicts with Christian beliefs and that is the number one problem in the United States today After the chapter on the helpful emphases of secular humanism part 2 details this movement s comparative inferiority internal inconsistencies religious inadequacies and philosophical insufficiencies The final chapter demonstrates that while Christianity is consistent with the central principles of science philosophy epistemology and ethics humanism is not There is no rational justification the author concludes for being a humanist

Measurement, Quantification and Economic Analysis Ingrid H. Rima, 2002-09-11 Most economists assume that the mathematical and quantitative sides of their science are relatively recent developments Measurement Quantification and Economic Analysis shows that this is a misconception Its authors argue that economists have long relied on measurement and quantification as essential tools However problems have arisen in adapting these tools from other fields Ultimately the authors are sceptical about the role which measurement and quantification tools now play in contemporary economic theory

Values, Education and the Adult (International Library of the Philosophy of Education Volume 16) R.W.K. Paterson, 2010-02-25 In this study of the main conceptual and normative issues to which the education of the adult gives rise the author demonstrates that these issues can be understood and resolved only by coming to grips with some of the central and most contentious questions in epistemology philosophy of mind ethics and social philosophy A salient feature of the book is its searching examination of the different types of value judgement by which all educational discourse is permeated The analysis of the nature and justification of educational judgements forms the basis of an overall philosophy of adult education which should provide a much needed axiological framework for the guidance of practitioners in this growing area of educational concern
