

Principles of Long-Term Residential Care

- Maintenance of autonomy
 - Successful relocation to a long-term care facility depends on preserving as much autonomy as possible
 - Older adults who help select the facility adjust better than those who have no choice in the matter
 - Allow as much flexibility as possible in establishing a routine for the new resident

Autonomy And Long Term Care

Eileen E. Morrison

Autonomy And Long Term Care:

Autonomy and Long-term Care George J. Agich, 1993 The realities and misconceptions of long term care and the challenges it presents for the ethics of autonomy are analyzed in this perceptive work While defending the concept of autonomy the author argues that the standard view of autonomy as non interference and independence has only a limited applicability for long term care He explains that autonomy should be understood as a comprehensiveness that defines the overall course of a person s life rather than as a way of responding to an isolated situation Agich distinguishes actual and ideal autonomy and argues that actual autonomy is better revealed in the everyday experiences of long term care than in dramatic conflict ridden paradigm situations such as decisions to institutionalize to initiate aggressive treatments or to withhold or to withdraw life sustaining treatments Through a phenomenological analysis of long term care he develops an ethical framework for it by showing how autonomy is actually manifest in certain structural features of the social world of long term care Throughout this timely work the rich sociological and anthropological literature on aging and long term care is referenced and the practical ethical questions of promoting and enhancing the exercise of autonomy are addressed The Erosion of Autonomy in Long-Term Care Charles W. Lidz, Lynn Fischer, Robert M. Arnold, 1992-09-24 In few places in American society are adults so dependent on others as in nursing homes Minimizing this dependency and promoting autonomy has become a major focus of policy and ethics in gerontology Yet most of these discussions are divorced from the day to day reality of long term care and are implicitly based on concepts of autonomy derived from acute medical care settings Promoting autonomy in long term care however is a complex task which requires close attention to everyday routines and a fundamental rethinking of the meaning of autonomy This timely work is based on an observational study of two different types of settings which provide long term care for the elderly The authors offer a detailed description of the organizational patterns that erode autonomy of the elderly Their observations lead to a substantial rethinking of what the concept of autonomy means in these settings The book concludes with concrete suggestions on methods to increase the autonomy of elderly individuals in long term care institutions **Enhancing Autonomy in Long-term Care** Lucia M. Gamroth, Joyce A. Semradek, Elizabeth M. Tornquist, 1995 This volume assesses the importance of autonomy to quality of life in long term care facilities First addressing conceptual issues the editors then pose such questions as What is autonomy and what does it mean in the context of physically and or cognitively impaired elders What is the effect of nursing home financing and federal regulations How does the traditional medical model which casts residents as patients affect autonomy How does the physical environment make a difference The contributors then go on to describe six successful models of care that provide a more meaningful quality of life through promoting autonomy Contributors include Robert and Rosalie Kane Keren Brown Wilson and Bart Collopy **Dependence and Autonomy in Old Age** George Agich, 2003 Respecting the autonomy of disabled people is an important ethical issue for providers of long term care In this influential book George Agich

abandons comfortable abstractions to reveal the concrete threats to personal autonomy in this setting where ethical conflict dilemma and tragedy are inescapable He argues that liberal accounts of autonomy and individual rights are insufficient and offers an account of autonomy that matches the realities of long term care The book therefore offers a framework for carers to develop an ethic of long term care within the complex environment in which many dependent and aged people find themselves Previously published as *Autonomy and Long term Care* this revised edition in paperback for the first time takes account of recent work and develops the author's views of what autonomy means in the real world It will have wide appeal among bioethicists and health care professionals *Nursing Ethics* Janie B. Butts, Karen L. Rich, 2013 *Long-Term Care in Europe* Ulrich Becker, Hans-Joachim Reinhard, 2018-03-05 This book provides a comprehensive overview on the long term care systems in 12 EU member states and Norway Focusing on the legal background and its main principles it includes a comparative analysis which highlights the principal dissimilarities between European long term care benefits but at the same time also a variety of features in common It also discusses the increasingly transnational dimension of long term as a result of migrants returning to their country of origin in old age and the still unsolved legal problem of entitlement to long term care benefits in another EU member state Enhancing Autonomy in Long-term Care Lucia M. Gamroth, Joyce A. Semradek, Elizabeth M. Tornquist, 1995 This volume assesses the importance of autonomy to quality of life in long term care facilities First addressing conceptual issues the editors then pose such questions as What is autonomy and what does it mean in the context of physically and or cognitively impaired elders What is the effect of nursing home financing and federal regulations How does the traditional medical model which casts residents as patients affect autonomy How does the physical environment make a difference The contributors then go on to describe six successful models of care that provide a more meaningful quality of life through promoting autonomy Contributors include Robert and Rosalie Kane Keren Brown Wilson and Bart Collopy **Long-Term Care** John Pratt, 2010-01-12 Long Term Care Managing Across the Continuum Third Edition is an ideal introduction to management in this dynamic industry Concise yet complete it defines the various segments of the system describes how the system developed to its current state compares it to an ideal system and projects future trends Adopted as a reference for the national licensing examination prepared by the National Association of Long Term Care Administrator Boards NAB this book covers the full continuum of long term care The Third Edition is a comprehensive revision reflecting the changes in regulations financing methods forms of service delivery and management methods in this dynamic field The increasingly important topics of the aging of American society the impact of the baby boomers consumer choice and the growing diversity in long term care are covered extensively and from a variety of perspectives The final chapters address the future of long term care and include recommendations for dealing with it proactively *Ethics, Law, and Aging Review, Volume 7* Marshall B. Kapp, 2001-09-24 Health care and human service professionals often experience anxiety about potential adverse legal repercussions for actions taken or not taken in the course of caring for patients or

clients In this volume professionally distinguished and diverse authors discuss both the real and perceived legal liability context within which health and human service delivery to older persons takes place The benefits and costs of litigious legislative and regulatory interventions on the quality of care and the quality of life for recipients of geriatric services is evaluated Most important chapters present suggestions for ways to effectively reduce or manage legal risks and anxieties while improving patient care This volume fills a gap in the literature by providing careful and accurate analysis of legal issues rarely translated into practical and useful advice for health care and human service professionals **Health Care Ethics**

Eileen E. Morrison,2009-10-06 This thorough revision of health care ethics brings the reader up to date on the most important issues in biomedical ethics today Health Care Ethics: Critical Issues for the 21st Century Eileen E.

Morrison,2008-03-20 **Ethics in Community-Based Elder Care** Martha Holstein,2001-10-11 Caring for elders outside of institutions is the fastest growing sector of US health care Building on their research study at the Park Ridge Center editors Holstein and Mitzen together with a team of experts examine the complexities involved in developing an ethics for community based long term care They also challenge policymakers to make home care a more viable option for older people in need Chapters address many of the ethical and practical problems that arise in the care of older people with physical and mental disabilities including how to allocate scarce funds how to keep good caregivers how to balance concerns of autonomy risk and safety and worker stress The volume is an excellent resource for practitioners policymakers and students *The Heart of Long Term Care* Rosalie A. Kane,Robert L. Kane,Richard C. Ladd,1998 Long term care in the United States has taken the nursing home as its benchmark but the monetary social and psychological costs of nursing home care are all too high This book challenges the current dominance of nursing homes as the principal institution of long term care It offers a series of alternative models where both services and housing can be provided in a way that allows long term consumers to enjoy dignified normal lifestyles It addresses the political and economic consequences of making this decision The authors start with the premise that long term care is designed to assist people who lack the capacity to function fully independently They argue that no disabled person of any age should be required to forsake his her humanity in exchange for care The book rejects the artificial dichotomy between social and medical care asserting that both play important roles in psychological and physical well being of long term care patients The authors consider the need for competent and compassionate medicine and discuss the methods for improving both its coordination of care and its effectiveness The book redefines the meaning of safety and protection in long term care and how this goal can be accomplished without sacrificing quality of living As the new millennium and the aging of baby boomers approaches more creative approaches to providing better long term care are required This volume outlines a useful framework for the provision of effective and humane community based programs that are both feasible and affordable It will be an invaluable guide for geriatricians public health professionals family physicians nurses and others who care for elderly patients **Long-Term Care in an Aging Society** Graham D. Rowles,Pamela B.

Ethics, Aging, and Society Martha B. Holstein, Mark Waymack, Jennifer Parks, Jennifer A. Parks, 2010-11-01 Ethics Aging and Society is the first major work in ten years to critically address issues and methodologies in aging and ethics This well organized volume begins theoretically and offers new ways of thinking about ethics that can handle the complexities and realities of aging in particular social contexts Choice This new research based book by experts in the field of ethics is excellent and much needed I challenge you to consider reading this book and seeing all the ways in which you might be forced to rethink things that most of us take as given for ethics and aging I know you will not be disappointed and I guarantee you will end up thinking long and hard about personal and professional decisions you may have made as well as your assumptions about aging in America CFLE Network Newsletter National Council on Family Relations This is a book that should be required reading for all involved in the ethical provision of services to the aging on any level as well as for policy makers and administrators in positions of influence over the lives of older patients PsycCRITIQUES the authors application of feminist ethics to frail elders rings true to both my clinical experience working with frail elders and my research experience trying to

understand their quality of life concerns there were true gems of ideas in this book that illuminated the limitations of the dominant paradigm of autonomy in bioethics The authors make a compelling critique of end of life care GeriPal A Geriatrics and Palliative Care Blog This book presents second generation issues in ethics aging and society by presenting critical outcomes that arise when ethics is applied to the practical concerns that occur in day to day elder care The first volume in over 10 years to address ethics and gerontology it is unparalleled in its comprehensiveness and integration of well developed philosophical arguments with empirical research humanistic scholarship and insights gained from practical experience This book challenges the tried and true approaches to ethical issues in aging and opens avenues for creative problem solving The authors diverse backgrounds bring the advantages of both interdisciplinary scholarship and practical experience to this comprehensive textbook It is an essential resource for those interested in and working with older people from upper level undergraduate students and graduate division students to gerontology practitioners in training Key Features Presents the first major work in over 10 years to integrate the disciplines of ethics and aging Includes case studies derived from day to day practice Addresses individual clinical ethics in health and long term care and ethical issues raised by public policy cultural norms and social attitudes Examines such critical issues as Alzheimer s disease long term care ageism public policy anti aging medicine elder abuse and natural disasters Explores new directions in ethical and social philosophy as they pertain to gerontology and care

Legal and Healthcare Ethics for the Elderly George P. Smith II, 2022-04-18 Increasingly legislators at the state and federal levels of government are forced to evaluate and act upon the unique problems presented by an aging American public A domino effect has occurred evoking concern in educational circles to deal with the varied complex issues associated with the new gerontology This expanded focus brings in not only mental and public health delivery issues but reaches and impacts on the social sciences ethics law and medicine as well as public policy In response to these matters *Legal and Healthcare Ethics for the Elderly* provides a balanced analytical presentation of the complicated socio legal medico ethical and political perspectives which interact with gerontology as a field of study In a straightforward and unambiguous style it covers information on access and financing healthcare the ethics of rationing healthcare and the inevitable link to the quality of life guardianship issues in a nursing home setting informed consent living wills and durable powers of attorney elder abuse and death with dignity The economics of care giving is charted and directed by the sometimes harsh realities of the marketplace Thus the various philosophical and ethical dilemmas which confront the process of aging are examined here both from a micro and from a macro economic perspective This book exemplifies that it is vitally important to be educated now to be prepared for the future and thereby make informed decisions for both ourselves and our loved ones

Ethics in Health Administration Eileen E. Morrison, 2011 *Health Management for Older Adults* David G. Satin, 2009 The health care of a growing older adult population is a crucial issue and one of increasing concern and cost This text explores the health system s effect on health care and professional practice on societal institutional and health team

levels It also clarifies models of disciplinary collaboration and the contributions of the interdisciplinary model It relates clinical and non clinical disciplines and facilitates change toward a more synergistic and effective health system This book addresses its key issues in two ways First it explores the present health care system and how it shapes the health care that older adults receive and the practices of their health professionals Second it explores five models of collaboration among health disciplines and how they differ in terms of mutual understanding extent of collaboration overlap and flexibility of roles and openness to incorporating knowledge and skills from one another This text aims to help health professionals policy makers and citizens understand the health system how it shapes the health care they receive and can provide and how to improve it It also introduces clinicians and non clinicians to one another s responsibilities and functions so that they can develop a more synergistic and harmonious health system
