Unexplained Deaths Bruce Goldfarb, 2020-04-02

For most of human history sudden and unexpected deaths of a suspicious nature when they were investigated at all were examined by lay persons without any formal training. People often got away with murder. Modern forensic investigation originates with Frances Glessner Lee a pivotal figure in police science. Disturbing dioramas created by an American millionairess revolutionised the art of modern forensics. DAILY TELEGRAPH Frances Glessner Lee 1878 1962 born a socialite to a wealthy and influential Chicago family was never meant to have a career let alone one steeped in death and depravity. Yet she became the mother of modern forensics and was instrumental in elevating homicide investigation to a scientific discipline. Frances Glessner Lee learned forensic science under the tutelage of pioneering medical examiner Magrath he told her about his cases gave her access to the autopsy room to observe post mortems and taught her about poisons and patterns of injury. A voracious reader too Lee acquired and read books on criminology and forensic science eventually establishing the largest library of legal medicine. Lee went on to create The Nutshell Studies of Unexplained Death a series of dollhouse sized crime scene dioramas depicting the facts of actual cases in exquisitely detailed miniature and perhaps the thing she is most famous for. Celebrated by artists miniaturists and scientists the Nutshell Studies are a singularly unusual collection. They were first used as a teaching tool in homicide seminars at Harvard Medical School in the

1930s and then in 1945 the homicide seminar for police detectives that is the longest running and still the highest regarded training of its kind in America Both of which were established by the pioneering Lee In Unexplained Deaths Bruce Goldfarb weaves Lee s remarkable story with the advances in forensics made in her lifetime to tell the tale of the birth of modern forensics This ebook was originally published in 2020 under the title 18 Tiny Deaths **Wrongly Executed? - The Long-forgotten Context of Charles Sberna's 1939 Electrocution** Thomas Hunt,2016-11-11 Was Charles Sberna wrongly convicted of the murder of Police Officer John H A Wilson Was an innocent man sent to the electric chair in 1939 What reasons could the authorities have had for refusing to consider alternatives and rushing Sberna into Sing Sing Prison s death device Wrongly Executed provides the details and historical background of the Sberna case The story is a complex and controversial one involving celebrity attorneys Mafia bosses violent political radicals media giants and ruthless establishment figures all set in a period in which Americans sought stability and government imposed order after years of political upheaval economic depression and Prohibition Era lawlessness *Public Library Catalog* ,1979 *The Electrocution of Baby Lawrence* James E. Overmyer,2024-07-02 Was it a mercy killing Was it an accident Was it murder Read the full account of the death of baby Lawrence Noxon and subsequent arrest trial and conviction that divided a 1940s small town Publishers Weekly calls it an enlightening and discomfiting account of a horrific crime With no witnesses and destroyed evidence questions still surround the mysterious death of baby Lawrence Noxon This the account of the 1940s murder case arrest trial and conviction of John Noxon as well as a story of changing city and state It s not every day that a prominent citizen a highly successful lawyer no less is arrested for murder The case itself drew in newspaper readers from coast to coast and Lawrence s death was often characterized as a mercy killing at a time when euthanasia societies were publicly advocating for the selection out of mental defectives from American society Noxon consistently maintained the electrocution was accidental although admittedly due to his own negligence but the prosecution was pushing for the death penalty Based on scientific or forensic evidence they recreated some of the lost evidence and called upon university medical faculty chemists and electrical engineers to show the death could not have been an accident The defense of course had its own cadre of witnesses from those disciplines to testify just the opposite Despite the complicated technicalities of the evidence the jury deliberated only about five hours before finding Noxon guilty of first degree murder which at the time carried an automatic death penalty

Death Investigation in America Jeffrey M. Jentzen,2007 *Courtroom Medicine* ,1979 *Crime and Circumstance* Suzanne Bell,2008-06-30 Today there is more interest in forensic science than ever before *Crime and Circumstance* weaves an intriguing tale of how an obscure corner of medicine dating back to ancient times matured into modern forensic science The author explores the scientific and social threads that created forensic science and continue to drive its evolution in an entertaining narrative that introduces readers to intriguing cases and personalities across history countries and cultures and helps readers translate what they encounter in popular media into the reality of forensic science and laboratory investigation

Through historical and contemporary examples Bell illustrates how cutting edge research migrates to forensic laboratories a transfer that is more indirect than people might expect Although science and the judicial system both pursue truth the interface between them is anything but seamless This unique historical approach focuses on personalities from scientific law enforcement and emphasizes the myriad discoveries made over the years Through these stories the reader is introduced to the underlying science in an interesting lively and accessible way
