## Aviation Career I Sikorsky:

**The Aviation Careers of Igor Sikorsky** Dorothy Cochrane, 1989      **Igor Sikorsky, His Three Careers in Aviation** Frank J. Delear, 1976-01-01 A biography of the aeronautical engineer whose achievements include the multi motored airplane and the helicopter      **The Sikorsky Legacy** Sergei I. Sikorsky, The Igor I. Sikorsky Historical Archives, 2007 This book traces the history of Sikorsky aviation and its founder Igor I Sikorsky one of the most talented and versatile aeronautical pioneers in history Sikorsky s aviation career spanned over 60 years and was highlighted by three major achievements the creation of the world s first four engine airliner the record breaking Clipper Ships with which Pan American Airways explored transpacific and transatlantic airline service and the development of the helicopter Sikorsky then led his engineers out of the piston engine era and into the jet age with the design and development of some of the most widely used turbine powered helicopters in aviation history More than 200 photographs many from the Sikorsky family archives document the genius of Sikorsky s intuitive engineering and his lifelong interest in the challenge of the helicopter which many historians consider to be his crowning achievement      *Association of Naval Aviation* , 2003      **Russian Aviation and Air Power in the Twentieth Century** John Greenwood, Von Hardesty, Robin Higham, 2014-06-11 In the light of new archival material the editors take a fresh look at Russian aviation in the twentieth century Presenting a comprehensive view of Russian aviation from its genesis in the late czarist period to the present era the approach is essentially chronological with a major emphasis on the evolution of military aviation The contributions are diverse with appropriate attention to civilian and institutional themes      **Leave No Man Behind** George Galdorisi, Thomas Phillips, 2009-01-16 Beginning with the birth of combat aircraft in World War I and the early attempts to rescue warriors trapped behind enemy lines Leave No Man Behind chronicles in depth nearly one hundred years of combat search and rescue CSAR All major U S combat operations from World War II to the early years of the Iraq War are covered including previously classified missions and several Medal of Honor winning operations Authors George Galdorisi and Tom Phillips both veteran U S Navy helicopter pilots highlight individual acts of heroism while telling the big picture story of the creation and development of modern CSAR Although individual missions have their successes and failures CSAR as an institution would seem beyond reproach an obvious necessity The organizational history of CSAR however is not entirely positive The armed services particularly the U S Air Force and Navy have a tendency to cut CSAR at the end of a conflict leaving no infrastructure prepared for the next time that the brave men and women of our armed forces find themselves behind enemy lines The final chapter has not yet been written for U S combat search and rescue but in view of the life saving potential of these forces an open and forthright review of U S military CSAR plans and policies is long overdue Beyond the exciting stories of heroic victories and heartrending defeats Leave No Man Behind stimulates debate on this important subject      *Naval Aviation News* , 1958      [Aviation Law: Cases, Laws and Related Sources](#) Paul B. Larsen, John Gillick, Joseph Sweeney, 2012-06-07 Written in the context of the post 9 11 legal climate
