Journal of the Senate, Legislature of the State of California California. Legislature. Senate, 1960 **Race to the Sky** Stephen B. Goddard, 2009-05-01 In their struggle to fly the Wright brothers were engaged in strife with their own government President McKinley s administration decided to dedicate an unprecedented amount of money to ensure that the

first flyers would be American but the Wrights refused such financial support for fear of the strings attached and resolved to go it alone This book tells the story of the raw ambition high ideals greed and cloak and dagger tactics of each side By 1903 the Federal venture was in its seventh year and the Wright brothers had been working nights and weekends often in secret for four years Everything came to a head in eight tense days in December when the battle and the fame and fortune that would follow was decided **Naval Aviation News** ,1978 Pioneer Aviators Frank Hitchens,2023-11-22 Pioneer Aviators records the various stages of man s journey into the skies taking the reader from the earliest years of experimentation through the early age of ballooning into heavier than air flight our ventures into space and even all the way back around to modern human powered vessels The book introduces the reader to almost three hundred aviation pioneers and the aircraft they flew and is illustrated throughout with photographs mostly from the author s own collection Due to the historical importance of these aircraft and as a tribute to those who flew them many are now housed in museums across the world Without the efforts and sacrifices of the pioneers we would not have the aviation industry of today **The Man Who Built the Swordfish** Adrian Smith,2018-04-30 Sir Richard Fairey was one of the great aviation innovators of the twentieth century His career as a plane maker stretched from the Edwardian period to the jet age he lived long enough to see one of his aircraft be the first to break the 1000mph barrier and at least one of his designs the Swordfish holds iconic status A qualified engineer party to the design development and construction of the Royal Navy s state of the art sea planes Sir Richard founded Fairey Aviation at the Admiralty s behest in 1915 His company survived post war retrenchment to become one of Britain s largest aircraft manufacturers The firm built a succession of front line aircraft for the RAF and the Fleet Air Arm including the iconic Swordfish In addition Fairey Aviation designed and built several cutting edge experimental aircraft including long distance record breakers between the wars and the stunningly beautiful Delta 2 which broke the world speed record on the eve of Sir Richard s death in 1956 Fairey also came to hold a privileged position in the British elite courting politicians and policymakers He became a figurehead of the British aviation industry and his successful running of the British Air Commission earned him a knighthood A key player at a pivotal moment Fairey s life tells us much about the exercise of power in early twentieth century Britain and provides an insight into the nature of the British aviation manufacturing industry at its wartime peak and on the cusp of its twilight years **Congressional Record** United States. WIPO Magazine, Issue 6/2018 (December) World Intellectual Property Organization,2018-12-27 The WIPO Magazine explores intellectual property creativity and innovation in action across the world **The Birth of Military Aviation** Hugh Driver,1997 A survey of the development of British military aviation from 1903 to 1914 revealing the consequences of its annexation by the state as a branch of armaments as an underlying cause of aircraft inadequacies on the outbreak of war A mine of information drawing on an impressive range of archives It will become an important point of reference **ENGLISH HISTORICAL REVIEW** This book aims to demonstrate how the crisis evident in British military aviation in the early years of

the First World War was inherent in the entire development of aviation in the years preceding the conflict After outlining the work of the early pioneers and the growth of an aviation industry as a branch of armaments Dr Driver considers the objectives of the War Office in increasingly seeking to divert design development to their research establishment at Farnborough He shows how the resultant virtual state monopoly in design and procurement had disastrous consequences for aircraft innovation and development suffocating both competition and initiative and leading to the maintenance of inadequate aircraft by the Royal Flying Corps following the outbreak of war The continuing dispute and its culmination in the Fokker Scourge controversy of 1915 1916 graphically characterise the strained development of military industrial relations in this area Dr HUGH DRIVER gained an MA in War Studies from King s College London and a D Phil in modern history at Oriel College Oxford

Michigan Aircraft Manufacturers Robert F. Pauley, 2009 Engineers inventors and dreamers in the state of Michigan had been searching for the secret of heavier than air flight well before the Wright brothers successful flights in 1903 In 1911 the first aircraft manufacturer opened for business in Michigan During the 1920s and 1930s the Detroit area was known as the Aviation Capital of America The All American Aircraft Show held annually in Detroit from 1928 to 1933 was the major showcase for introducing new airplanes to the aviation community Major competitions such as the Ford Air Tours 1925 to 1931 and the Cirrus Derby 1930 originated and ended at airports in Michigan Michigan s aircraft manufacturers made major contributions to America s war efforts building 1 500 Liberty planes during World War I and 8 685 B 24 bombers during World War II In addition to those major manufacturers a large number of individual designers and entrepreneurs toiled to build the ultimate airplane Today the pioneering tradition lives on in the hundreds of individuals who design and build airplanes in their garage or basement
