L'avortement et la justice, une répression illusoire ? Stéphanie Villers, 2013-02-21 Dans la fin du XIXe siècle se dessine en Europe une véritable révolution de l'avortement. Les pratiques abortives plus résistent au rejet des morales officielles et au désir nouveau des couples de limiter la taille de leur famille. Cette banalisation de l'avortement entraîna en Belgique une réaction dont l'ampleur tonne encore. Morale catholique, nationalisme exacerbé et crainte de la population concourent faire de l'avortement ce fléau du siècle un véritable crime contre la société et la nation. Cet ouvrage aborde l'histoire de la justice et de l'avortement durant l'entre-deux guerres. La première partie s'intéresse au contexte légal et idéologique de l'avortement en Belgique et aux préoccupations qui ont incité le législateur belge à renforcer la loi de 1923. La seconde partie consacre la quantification de la répression judiciaire de l'avortement dans l'entre-deux guerres, permet de voir dans quelle mesure l'évolution des mentalités s'est reflétée dans la pratique judiciaire. La dernière partie propose une analyse des dossiers d'abandon de poursuite de l'arrondissement judiciaire de Dinant qui permet de mieux cerner le profil et les motivations des différents protagonistes de l'avortement et de sa répression.

La Seconde révolution contraceptive Henri Léridon, 1987. El periodo 1962-1965 supuso la aparición en Francia de dos nuevos métodos anticonceptivos. La píldora y la esterilización sin embargo los franceses ya venían utilizando diversos métodos desde casi dos siglos atrás tal y como se revisa en el capítulo primero de esta obra. El capítulo dos supone un recorrido por la legislación sobre la materia desde 1955. El tercero está dedicado a determinar cuál ha sido la difusión que han tenido en Francia las nuevas técnicas anticonceptivas desde 1960 hasta nuestros días. En 1978 se realizó una encuesta con el fin de determinar cuáles eran las prácticas anticonceptivas en ese país; el capítulo cuarto recoge los resultados de dicha encuesta en el anexo se incluye el cuestionario utilizado en la misma. El quinto recoge los pros y contras de los diversos métodos concretos. En el sexto se comparan las actitudes masculinas y femeninas frente a los diversos problemas que plantea la reproducción. El séptimo es una breve síntesis de las informaciones disponibles sobre las interrupciones voluntarias del embarazo antes y después de la ley de 1975 en la que se regula el aborto voluntario. El octavo plantea la necesidad de disminuir el número de embarazos no deseados. Por último se incluye una comparación de la situación de Francia respecto a la de otros países desarrollados.

France and Its Empire Since 1870 Alice L. Conklin, Sarah Fishman, Robert Zaretsky, 2015 Providing an up to date synthesis of the history of an extraordinary nation one that has been shrouded in myths many of its own making *France and Its Empire Since 1870* seeks both to understand these myths and to uncover the complicated and often contradictory realities that underpin them. It situates modern French history in transnational and global contexts and also integrates the themes of imperialism and immigration into the traditional narrative. Authors Alice L. Conklin, Sarah Fishman and Robert Zaretsky begin with the premise that while France and the U.S. are sister republics they also exhibit profound differences that are as compelling as their apparent similarities. The authors frame the book around the contested emergence of the French Republic a form of government that finally appears to have a permanent status in France but whose birth pangs were much more protracted than those of the American Republic. Presenting a lively and coherent narrative of the major developments in France's tumultuous history since 1870 the authors organize the chapters around the country's many turning points and

confrontations They also offer detailed analyses of politics society and culture considering the diverse viewpoints of men and women from every background including the working class and the bourgeoisie immigrants Catholics Jews and Muslims Bretons and Algerians rebellious youth and gays and lesbians Abortion and the Politics of Motherhood Kristin Luker,1985-08-04 In this important study of the abortion controversy in the United States Kristin Luker examines the issues people and beliefs on both sides of the abortion conflict She draws data from twenty years of public documents and newspaper accounts as well as over two hundred interviews with both pro life and pro choice activists She argues that moral positions on abortion are intimately tied to views on sexual behavior the care of children family life technology and the importance of the individual **Kit d'adaptation numérique pour la planification familiale.
