Maghrebs in Motion Suzanne Gauch, 2016 Exploring films made in Tunisia Morocco and Algeria from 1985 to 2009 Suzanne Gauch illustrates how late post independence and early twenty first century North African cinema prefigured many of the transformations in perception and relation that stunned both participants and onlookers during the remarkable uprisings of the 2011 Arab Spring Through multifaceted examinations of key films by nine filmmakers Farida Benlyazid

Mohamed Chouikh Nacer Khemir Nabil Ayouch Ly s Salem Nadia El Fani Tariq Tegua Faouzi Bensa di and Nejib Belkadhi Gauch delineates the shifting relation of politics to film in the era of neoliberal globalization Each work she argues taps the power inherent in cinema to destabilize patterns of perception and judgment while taking film s role as popular entertainment in new directions Highlighting how each film taps into the mobility at the core of cinema to break through the boundaries that have long circumscribed filmmaking from North Africa Gauch shows how this cinema continues to forge and reflect unexpected trajectories for itself and its audiences *AFI Catalog of Motion Pictures Produced in the United States* American Film Institute,1971 **Climate in Motion** Deborah R. Coen,2018-07-19 Today predicting the impact of human activities on the earth s climate hinges on tracking interactions among phenomena of radically different dimensions from the molecular to the planetary Climate in Motion shows that this multiscalar multicausal framework emerged well before computers and satellites Extending the history of modern climate science back into the nineteenth century Deborah R Coen uncovers its roots in the politics of empire building in central and eastern Europe She argues that essential elements of the modern understanding of climate arose as a means of thinking across scales in a state the multinational Habsburg Monarchy a patchwork of medieval kingdoms and modern laws where such thinking was a political imperative Led by Julius Hann in Vienna Habsburg scientists were the first to investigate precisely how local winds and storms might be related to the general circulation of the earth s atmosphere as a whole Linking Habsburg climatology to the political and artistic experiments of late imperial Austria Coen grounds the seemingly esoteric science of the atmosphere in the everyday experiences of an earlier era of globalization Climate in Motion presents the history of modern climate science as a history of scaling that is the embodied work of moving between different frameworks for measuring the world In this way it offers a critical historical perspective on the concepts of scale that structure thinking about the climate crisis today and the range of possibilities for responding to it
