Award Winning Architecture, 1998 **Award Winning Architecture/USA.**, 1973 **The Rise of Awards in Architecture** Jean-Pierre Chupin, Carmela Cucuzzella, Georges Adamczyk, 2022-09-06 This book is the first scientific study to focus on awards in architecture and the built environment investigating their exponential growth since the 1980s The celebration of excellence in architecture and related fields remains a phenomenon on which there is strangely little scientific scrutiny What is to be understood from the plethora of award winning projects award winning buildings and awarded professional practices in the built environment year after year Glossy images partake in an intense ballet at every local regional national or international award ceremony and they are meant to embody proofs of architectural excellence However it is necessary to take a critical distance to question what awards are meant to embody symbolize and perhaps measure Each of the 10 chapters in this volume is centered on one question related to themes as varied as the comparison of Pritzker and Nobel Prizes the Prix de Rome the redefinition of quality through awards green awards and sustainability the multiplication of sustainable awards heritage awards architecture book awards the awarding of school architecture awards as mediations and awards as pedagogical devices Many fields once consolidated have featured a sharp increase in related prizes The original data compiled and summarized in 4 appendices cover more than 150 award granting organizations in some 30 countries Our inventory includes upwards of 24 000 prizes awarded at more than 3 100 events the earliest of which is the first instance of Western architecture s seminal Grand Prix de Rome in France in 1720 A history of contemporary architecture is thus written through press releases that praise the merits of the heroes as much as their works and achievements And while awards can be vehicles that propel architecture forward they can also be Trojan horses in an era that is constantly on the lookout for event driven products small and big news and brand imaging **Award Winning Australian Architecture** Neville Quarry, 1997 For each award compact illustrations and the jury report serve as an important source of record and stimulation for anyone interested in understanding and appreciating architecture The commentary essays which introduce each category of the awards set up a potential discourse for airing differences of interpretation leading to critical comparisons and proactive debate among architectural observers and participants inside cover **Award Winning Architecture** Frantisek Sedlacek, Christine Waiblinger-Jens, 1997 Produced under the auspices of the UIA Union Internationale des Architectes Award Winning Architecture features the finest prize winning architectural projects awarded by architects for architects from all over the world Some 380 completed buildings are described with the technical data of each structure illustrations and sketches These projects are arranged alphabetically by country and by architect illustrating the exemplary structures both of internationally famous names as well as of lesser known architects An advisory board of internationally renowned architectural theorists and architects has selected some 50 buildings These projects are described comprehensively and are fully illustrated in color Countries affiliated with the UIA include Australia Austria Brazil Canada

Architecture and Movement Peter Blundell Jones,Mark Meagher,2014-12-17 The experience of movement of moving through buildings cities landscapes and in everyday life is the only involvement most individuals have with the built environment on a daily basis User experience is so often neglected in architectural study and practice *Architecture and Movement* tackles this complex subject for the first time providing the wide range of perspectives needed to tackle this multi

disciplinary topic Organised in four parts it documents the architect s planner s or designer s approach looking at how they have sought to deploy buildings as a promenade and how they have thought or written about it concentrates on the individual s experience and particularly on the primacy of walking which engages other senses besides the visual engages with society and social rituals and how mutually we define the spaces through which we move both by laying out routes and boundaries and by celebrating thresholds analyses how we deal with promenades which are not experienced directly but via other mediums such as computer models drawings film and television The wide selection of contributors include academics and practitioners and discuss cases from across the US UK Europe and Asia By mingling such disparate voices in a carefully curated selection of chapters the book enlarges the understanding of architects architectural students designers and planners alerting them to the many and complex issues involved in the experience of movement *2000 Architects* Aisha Hasanovic,2006 Doctor Haydock the resident GP of St Mary Mead hopes to cheer up Miss Marple as she recovers from the flu with a little story The tale revolves around the return of the prodigal son of Major Laxton the devilishly handsome Harry Laxton Harry after leading a life of childish indiscretions and falling head over heels for the village tobacconist s daughter has made good and returned to lay claim to his tumbling childhood home and introduce the village to his beautiful new wife But the villagers are prone to gossip about young Harry s past and one person in particular cannot forgive him for tearing down the old house Will Miss Marple s acumen be up to the task of solving the story *Drawing Architecture* ,2013-10-18 We are in the second decade of the 21st century and as with most things the distinction between digital and analogue has become tired and inappropriate This is also true in the world of architectural drawing which paradoxically is enjoying a renaissance supported by the graphic dexterity of the computer This new fecundity has produced a contemporary glut of stunning architectural drawings and representations that could rival the most recent outpouring of architectural vision in the 1960s 1970s and 1980s Indeed there is much to learn by comparing the then and the now The contemporary drawing is often about its ability to describe the change fluctuations and mutability of architecture in relation to the virtual real 21st century continuum of architectural space Times have changed and the status of the architectural drawing must change with them This reassessment is well overdue and this edition of AD will be the catalyst for such re examination Features the work of Pascal Bronner Bryan Cantley Peter Cook Perry Kulper CJ Lim Tom Noonan Dan Slavinsky Neil Spiller Peter Wilson Nancy Wolf Lebbeus Woods and Mas Yendo Contributors include Nic Clear Mark Garcia Simon Herron and Mark Morris
