Babblings of a Burned Out Teacher C.T. Wilke,2011-02-18 Babblings of a Burned Out Teacher Book Description There are many experts in our country that know what is exactly wrong with education and they have the ideas to make it right The

sad thing is that many of these experts have spent very little time if any in a school It s like having an operation with your surgeon only have seen a 15 to 20 second clip on how to complete the operation if they have seen that much It s very easy to sit on the sidelines or in the stands and tell someone what to do and how to do it That s today s society it s easier to complain about the situation rather than do something about it There are plenty of items and people that are wrong with education who are working some how in education This book discusses many of these people You have people in every group dealing with education that have their own agenda and will do anything to get their ideas and agenda through People need to be able to recognize those people who have the hidden agenda and get them out of the educational process Education needs to be the quest for being self sufficient The educated person will be able to provide for themselves and their family Education should provide people with skills to be able to solve problems they encounter Today s school systems are more interested in having their students become game show contestants rather than problem solvers Schools are more interested on making sure students can answer questions on standardized tests instead of teaching them skills they will be able to use later in life The short term often is more important than long term not just in education but for many facets of life Education should not be a means to learn how to beat or play the system I have written several stories that can make you laugh or cry When you are working with children you experience many valleys and mountain tops That s just the nature of education I have been in education for the past 25 years in some capacity or another During this time I ve been a teacher s aide to principal in public schools I have taught students from pre school students to seniors The students ranged from severe and profound to students who are quite gifted and talented I can t count the number of Individual Education Plans that I have attended Some of my students could look at a book and get a 100% on a test over the contents of the book without reading it In education you teach students who run the spectrum of ability Reading this book you need to realize the students are talented in different areas A student who likes science might not be the best at physical education Students are just like everyone else in society they have their own unique skills talents and abilities As Americans we can use these to our advantage We can find a career that best fits the skills talents and abilities we possess Coaching offered me another aspect of education Being a coach you need to be aware of the politics involved The best part of coaching is working with the student athlete and other coaches Practices and games are a blast You get to see and interact with student athletes in an atmosphere outside of the classroom A high school coach should not be judged on their win loss record Not every team will be a state champion It s how the players perform and act on the playing field and in the class room Most parents think their child is going to be a professional or college athlete in the sport they are doing It s the coach s fault that their child is not getting the scholarship offers they deserve The school administration could end up being the worst enemy of the coaches Sometimes they have their personal agenda which they impose on their staff which includes coaches and other staff members My post secondary experience includes being an adjunct instructor tutor to being English as a Second Language instructor While teaching at th

Rutgers Since 1945 Paul G. E. Clemens, 2015-08-04 Spans the period from World War II to the present during which Rutgers grew from two small liberal arts colleges an agricultural school and an engineering school into a major public research university We chronicle the remarkable story of Rutgers's rise as a research university but also the way the school has been experienced by generations of students and residents of the state The Cold War the student protests of the 1960s and the 1970s the rise of identity politics on campus big time athletics and the various ways students have shaped and been affected by popular culture all play a part in this story Three chapters cover chronologically the major changes that occurred at the university between 1945 and the present bringing up to date the work done in Richard P McCormick's Rutgers A Bicentennial History 1966 The remaining chapters provide snapshots of some of the key themes in the contemporary history of the school campus life and campus activism the school's growing strength as a research institution the impact of Title IX on opportunities for women student athletes the school's public presence as reflected in such long standing institutions as the University Press the Glee Club and undergraduate journalism Rutgers current residence halls which house more students than at any other college in the nation are the subject of a imaginatively illustrated architectural analysis While much of the focus of our study is on the New Brunswick Piscataway campus attention has been paid throughout to Camden and Newark as well
