First published in 1979 this book concerns itself primarily with the mothers of mentally handicapped children It discusses the problems of assistance that they may have experienced from their families the community or the available services Whilst arguing for far more support for mothers when they are the main carer this book also suggests reasons why some families are more easily able to cope with the problems of caring for severely handicapped children This study is based on research that was conducted for and funded by the Department of Health and Social Security between 1973 and 1976      Residential Child Care Andrew Kendrick,2008 Draws on recent research to address key issues in residential child care policy and practice in the UK offering guidance for developing best practice and improved outcomes for children and young people

*Ageing and Mental Handicap* James Hogg,Steve Moss,Diana Cooke,2024-05-10 In the 1980s there was growing interest in the topic of ageing and learning disabilities for two principal reasons First the life expectancy of people with learning disabilities had risen significantly over the previous decades and many once infancy had been survived could expect a life span similar to that of non disabled people Secondly a growing commitment on the part of the government and service providers to make provision for people with disabilities in the community rather than in institutions had focused attention on this group Originally published in 1988 reissued here with a new foreword this book was one of the first on this subject It examines epidemiology and mortality and medical and psychiatric issues compared with non disabled older people It considers how people with learning disabilities change in intellectual and adaptive function with age the nature of family relationships relevant therapeutic programmes and policy and the development of services The book represented a major review of a hitherto neglected topic and would interest gerontologists psychologists and professional health social and educational staff concerned with the welfare of older people with learning disabilities This book is a re issue originally published in 1988 The language used is a reflection of its era and no offence is meant by the Publishers to any reader by this re publication      *Mentally Handicapped Children in Residential Care* Dora Elizabeth Harvie,Great Britain. **Aging 2000: Our Health Care Destiny** Charles M. Gaitz, T. Samorajski, 2012-12-06 The seventeenth annual symposium sponsored by the Texas Research Institute of Mental Sciences was held October 23-26 1983 in Houston Texas The theme was Aging 2000 Our Health Care Destiny This volume on biomedical aspects and a companion volume on psycho-social aspects include edited versions of the presentations by about 80 speakers Their papers were directed at practitioners researchers and medical educators who will be active and productive in the year 2000 and we focused on those who would influence the evolution of care of elderly persons during the next 17 years We chose topics that would be of particular interest to teachers and current planners in the disciplines concerned with delivery of health and social services We believe that having a core of more qualified and better trained practitioners will help the population of aged persons achieve a higher level of physical and mental health life satisfaction and happiness to find better coping techniques and control of environmental stresses and to attain personal and social goals Our Goals While preparing for the symposium we knew that the status of the art in 1983 obviously would be the base from which we would work but we asked our speakers to give priority to future planning and directions

**Routledge Revivals: Varieties of Residential Experience (1975)** Jack Tizard, Ian Sinclair, R. V. G. Clarke, 2017-07-05 First published in 1975 this book compiles a number of studies concerning institutional care and children which address the question of why institutions that serve apparently similar functions differ so much The book uses comparative methods such as measurement of different dimensions of institutional care and analysis of interrelationships among specific structural and functional features which characterise particular institutions As a result the book draws broad conclusions about the importance of factors that have dynamic influence on the manner in which institutions function and the reasons why they differ The editors reject the steampress model which postulates that institutions are more or less alike They discuss ideological and organisational variation differences in staffing and the manner in which children respond to them and consider these issues as factors that influence the way in which an institution functions as a whole Subsequent chapters describe comparative studies carried out in institutions for the mentally handicapped approved schools residential nurseries probation hostels other correctional institutions and units for autistic children The book enables the reader to appreciate achievements and shortcomings of contemporary research and thinking in this field
