Business Periodicals Index, 2006 **Ancient Knowledge Networks** Eleanor Robson, 2019-11-14 Ancient Knowledge Networks is a book about how knowledge travels in minds and bodies as well as in writings It explores the forms knowledge takes and the meanings it accrues and how these meanings are shaped by the peoples who use it Addressing the relationships between political power family ties religious commitments and literate scholarship in the ancient Middle East of the first millennium BC Eleanor Robson focuses on two regions where cuneiform script was the predominant writing medium Assyria in the north of modern day Syria and Iraq and Babylonia to the south of modern day Baghdad She investigates how networks of knowledge enabled cuneiform intellectual culture to endure and adapt over the course of five world empires until its eventual demise in the mid first century BC In doing so she also studies Assyriological and historical method both now and over the past two centuries asking how the field has shaped and been shaped by the academic concerns and fashions of the day Above all Ancient Knowledge Networks is an experiment in writing about Mesopotamian science as it has often been known using geographical and social approaches to bring new insights into the intellectual history of the world's first empires

pt 2 of the Jan issue Medical subject headings **Mathematics in Ancient Iraq** Eleanor Robson,2020-06-30 This monumental book traces the origins and development of mathematics in the ancient Middle East from its earliest beginnings in the fourth millennium BCE to the end of indigenous intellectual culture in the second century BCE when cuneiform writing was gradually abandoned Eleanor Robson offers a history like no other examining ancient mathematics within its broader social political economic and religious contexts and showing that mathematics was not just an abstract discipline for elites but a key component in ordering society and understanding the world The region of modern day Iraq is uniquely rich in evidence for ancient mathematics because its prehistoric inhabitants wrote on clay tablets many hundreds of thousands of

which have been archaeologically excavated deciphered and translated Drawing from these and a wealth of other textual and archaeological evidence Robson gives an extraordinarily detailed picture of how mathematical ideas and practices were conceived used and taught during this period She challenges the prevailing view that they were merely the simplistic precursors of classical Greek mathematics and explains how the prevailing view came to be Robson reveals the true sophistication and beauty of ancient Middle Eastern mathematics as it evolved over three thousand years from the earliest beginnings of recorded accounting to complex mathematical astronomy Every chapter provides detailed information on sources and the book includes an appendix on all mathematical cuneiform tablets published before 2007 **Forthcoming**
