Anorexic Bodies:

Anorexic Bodies Morag MacSween, Morag Macsween, 2013-11-26 This book explores the ways in which anorexic women use their eating to control their bodies It argues that the female body in modern Western culture is understood as open and accessible and female appetite as dangerous and voracious Anorexia attempts to resist both these constructions in the creation of a closed desireless body Since anorexic women resist the power of collective ideologies their resistance cannot work the closed body becomes its own prison Victorian Literature and the Anorexic Body Anna Krugovoy

Silver, 2002-08-08 Anna Krugovoy Silver examines the ways nineteenth century British writers used physical states of the female body hunger appetite fat and slenderness in the creation of female characters Silver argues that anorexia nervosa first diagnosed in 1873 serves as a paradigm for the cultural ideal of middle class womanhood in Victorian Britain In addition Silver relates these literary expressions to the representation of women s bodies in the conduct books beauty manuals and other non fiction prose of the period contending that women performed their gender and class alliances through the slender body Silver discusses a wide range of writers including Charlotte Bront Christina Rossetti Charles Dickens Alfred Lord Tennyson Bram Stoker and Lewis Carroll to show that mainstream models of middle class Victorian womanhood share important qualities with the beliefs or behaviours of the anorexic girl or woman **Body Talk** Jane M. Ussher, 1997

Psychology has traditionally examined human experience from a realist perspective focusing on observable facts This is especially so in areas of psychology which focus on the body such as sexuality madness or reproduction In contrast many sociologists anthropologists and feminists have focused exclusively on the cultural and communicative aspects of the body treating it purely as an object constructed within socio cultural discourse This new collection of sophisticated discursive analyses explores this divide from a variety of theoretical standpoints including psychoanalysis social representations theory feminist theory critical realism post structuralism and social constructionism Body Talk reconciles the divide by putting forward a new materialist discursive approach It also provides an introduction to social constructionist and discursive approaches which is accessible to those with limited previous knowledge of socio linguistic theory and showcases the distinctive contribution that psychologists can make to the field *Body Talk* Jane Ussher, 2002-01-04 Psychology has traditionally examined human experience from a realist perspective focusing on observable facts This is especially so in areas of psychology which focus on the body such as sexuality madness or reproduction In contrast many sociologists anthropologists and feminists have focused exclusively on the cultural and communicative aspects of the body treating it purely as an object constructed within socio cultural discourse This new collection of sophisticated discursive analyses explores this divide from a variety of theoretical standpoints including psychoanalysis social representations theory feminist theory critical realism post structuralism and social constructionism Body Talk reconciles the divide by putting forward a new materialist discursive approach It also provides an introduction to social constructionist and discursive approaches which is

This Is My Body John T. Brittingham, Christina Smerick, 2016-02-19 The body of Christ The body of the anorexic The altered body The mutilated body The Eucharist Canonical Western thought has had an uneasy relationship with the flesh from Plato forward Western philosophy has spent its time dwelling upon ideation perception cognition and recollection and has pursued de facto if not de jure a duality of mind and body that continues to this day Western theology has followed suit either viewing the body as humiliation prison or site of sin However movements in the twentieth century philosophical theological and scientific have all issued challenges to the longstanding tradition These challenges invite us to reconsider long held beliefs about cognition the body and human experience in the world In particular Wesleyan theology and philosophy are called to address our inheritance and to move beyond it This Is My Body provides a collection of essays addressing the body from broadly Wesleyan Christian and philosophical perspectives examining Wesley's engagement with the body embodied epistemologies the body and the Church and the altered body in relation to Christian Scripture reason tradition and experience

Culture, Bodies and the Sociology of Health Elizabeth Ettorre, 2016-05-13 Culture Bodies and the Sociology of Health explores the boundaries between bodies and society with special reference to uncovering the cultural components of health and the ways in which bodies are categorized according to a form of culturally embedded health orthodoxy Illustrating the importance of contextualizing the body as a cultural entity this book demonstrates that the spaces and boundaries between healthy bodies are becoming more diverse than ever before The volumes international team of scholars engage with a range of issues surrounding the cultural construction of the body as a site of health and illness As such it will be of interest not only to sociologists especially sociologists of health but also to scholars of media and communication studies as well as cultural theorists

Critical Feminist Approaches to Eating Dis/Orders Helen Malson, Maree Burns, 2009-06-02 Over the past decade there have been significant shifts both in feminist approaches to the field of eating disorders and in the ways in which gender bodies body weight body management and food are understood represented and regulated within the dominant cultural milieus of the early twenty first century Critical Feminist Approaches to Eating Dis Orders addresses these developments exploring how eating disordered subjectivities experiences and body management practices are theorised and researched within postmodern and post structuralist feminist frameworks Bringing together an international range of cutting edge contemporary feminist research and theory on eating disorders this book explores how anorexia nervosa bulimia nervosa and obesity cannot be adequately understood in terms of individual mental illness and deviation from the norm but are instead continuous with the dominant cultural ideas and values of contemporary cultures This book will be essential reading for academic graduate and post graduate researchers with an interest in eating disorders and critical feminist scholarship across a range of disciplines including psychology sociology cultural studies and gender studies as well as clinicians interested in exploring innovative theory and practice in this field

(Re)Possessing Beauty: Politics, Poetics, Change Sallie McNamara, 2019-01-04 This volume was first published by Inter Disciplinary Press in 2014 Ideas of beauty permeate our lives in ways of which we are often unaware yet they are indicators of identity transgression sartorial codes and otherness While contemporary society sees the dominance of Western hegemonic ideals of beauty when comparing these to ideals in different cultures at different historical periods attention is drawn to the instability of beauty The work in this volume considers the ways individuals question respond to articulate reflect challenge modify or accept beauty within their lives to show it can be powerful destructive and transformative They show that beauty is not always what it appears and can challenge common sense preconceptions as to what is beautiful The range of topics provide an important contribution to ongoing discussions and are testament to both the diversity and complexity of debate the concept engenders across different disciplines

Handbook of Phenomenology and Cognitive Science Daniel Schmicking, Shaun Gallagher, 2009-12-16 This volume explores the essential issues involved in bringing phenomenology together with the cognitive sciences and provides some examples of research located at the intersection of these disciplines The topics addressed here cover a lot of ground including questions about naturalizing phenomenology the precise methods of phenomenology and how they can be used in the empirical cognitive sciences specific analyses of perception attention emotion imagination embodied movement action and agency representation and cognition intersubjectivity language and metaphor In addition there are chapters that focus on empirical experiments involving psychophysics perception and neuro and psychopathologies The idea that phenomenology understood as a philosophical approach taken by thinkers like Husserl Heidegger Sartre Merleau Ponty and others can offer a positive contribution to the cognitive sciences is a relatively recent idea Prior to the 1990s phenomenology was employed in a critique of the first wave of cognitivist and computational approaches to the mind see Dreyfus 1972 What some consider a second wave in cognitive science with emphasis on connectionism and neuroscience opened up possibilities for

phenomenological intervention in a more positive way resulting in proposals like neurophenomenology Varela 1996 Thus brain imaging technologies can turn to phenomenological insights to guide experimentation see e.g. Jack and Roepstorff 2003 Gallagher and Zahavi 2008 The Female Body in Mind Mervat Nasser, Karen Baistow, Janet Treasure, 2007-04-11 The Female Body in Mind introduces new ways of thinking about issues of women's mental health assessment and treatment Its multidisciplinary approach incorporates social psychological biological and philosophical perspectives on the female body The contributions from notable academics in the field of women's mental health examine the relationship between women's bodies society and culture demonstrating how the body has become a platform for women's expression of their distress and anguish The book is divided into six sections all centred on the theme of the body covering The body at risk The hurting body The reproductive body The interactive body Body sensitive therapies The body on my mind All professionals involved in women's mental health will welcome this exploration of the complexities involved in the relationship between women's bodies and their mental health *Women, Body, Illness* Pamela Moss, Isabel Dyck, 2002 This provocative and moving work explores concepts of body and space to better understand the daily lives and struggles of women with chronic illness Moss and Dyck show how such women coping with associated notions of illness health and being female restructure their physical and social environments through the strategies they choose to accommodate disabling illnesses such as chronic fatigue syndrome multiple sclerosis or rheumatoid arthritis Strategies might include disclosing or concealing illness from employers and friends seeking or rejecting emotional support through old friends and new contacts and pursuing or resisting specific diagnoses from the biomedical community Featuring a wealth of original research and personal stories *Women Body Illness* tells the tales of chronically ill women forging networks of support redefining themselves and challenging what it is to be ill

Learning Bodies Julia Coffey, Shelley Budgeon, Helen Cahill, 2016-02-03 *Learning Bodies* addresses the lack of attention paid to the body in youth and childhood studies Whilst a significant range of work on this area has explored gender class race and ethnicity and sexualities all of which have bodily dimensions the body is generally studied indirectly rather than being the central focus This collection of papers brings together a scholarly range of international interdisciplinary work on youth with a specific focus on the body The authors engage with conceptual empirical and pedagogical approaches which counteract perspectives that view young people's bodies primarily as problems to be managed or as sites of risk or deviance The authors demonstrate that a focus on the body allows us to explore a range of additional dimensions in seeking to understand the experiences of young people The research is situated across a range of sites in Australia North America Britain Canada Asia and Africa drawing on a range of disciplines including sociology education and cultural studies in the process This collection aims to demonstrate theoretically empirically and pedagogically the implications that emerge from a reframed approach to understanding children and youth by focusing on the body and embodiment **Critical Bodies** Sarah Riley, 2008-01-15 This book showcases a selection of current work and debates on weight and body management practices

that are being produced from the vibrant arena of critical and postmodern approaches in the social sciences Weight issues have become central to Western understandings of health and identity but analyses of weight and body management have often failed to contextualise weight related issues This timely book addresses this gap by examining three key areas namely representation identities and practice to explore and interrogate how body and weight management subjectivities experiences and practices are constituted within and by the normative discourses of contemporary western culture

Female Body Image in Contemporary Art Emily L. Newman, 2018-05-23 Numerous contemporary artists particularly female artists have chosen to examine the idealization of the female body In this crucial book Emily L Newman focuses on a number of key themes including obesity anorexia bulimia dieting self harm and female body image Many artists utilize their own bodies in their work and in the act of trying to critique the diet industry they also often become complicit as they strive to lose weight themselves Making art and engaging eating disorder communities in real life and online often work to perpetuate the illnesses of themselves or others A core group of artists has worked to show bodies that are outside the norm paralleling the rise of fat activism in the 1990s and 2000s Interwoven throughout this inclusive study are related interdisciplinary concerns including sociology popular culture and feminism Consuming the Body Dawn Woolley, 2024-04-18 Consuming the Body examines contemporary consumerism and the commodified construction of ideal gendered bodies paying particular attention to the new forms of interaction produced by social networking sites Describing the behaviours of an ideal neoliberal subject Woolley identifies modes of discipline forms of pleasure and opportunities for subversion in an exploration of how individuals are addressed and the ways in which they are expected to respond In doing so this book explores the imperfect relationship between our own bodies and the idealized images displayed in contemporary advertising and social media Back cover The Anorexic's Story Mary Petrie, 2000
