Another Sort Of Truth:

God, Truth, and other Enigmas Mirosław Szatkowski, 2015-07-01 The book *God Truth and other Enigmas* is a collection of eighteen essays that fall under four headings: God's Existence, Non-Existence, Omniscience, Truth, and Metaphysical Enigmas. The essays vary widely in topic and tone. They provide the reader with an overview of contemporary philosophical approaches to the subjects that are indicated in the title of the book. **The Correspondence Theory of Truth** Andrew

Newman, 2002-06-24 This work presents a version of the correspondence theory of truth based on Wittgenstein's *Tractatus* and Russell's theory of truth and discusses related metaphysical issues such as predication, facts, and propositions. Like Russell and one prominent interpretation of the *Tractatus*, it assumes a realist view of universals. Part of the aim is to avoid Platonic propositions, and although sympathy with facts is maintained in the early chapters, the book argues that facts as real entities are not needed. It includes discussion of contemporary philosophers such as David Armstrong, William Alston, and Paul Horwich, as well as those who write about propositions and facts, and a number of students of Bertrand Russell. It will interest teachers and advanced students of philosophy who are interested in the realistic conception of truth and in issues in metaphysics related to the correspondence theory of truth and those interested in Russell and the *Tractatus*. The Nature of Truth, second edition Michael P. Lynch, Jeremy Wyatt, Junyeol Kim, Nathan Kellen, 2021-03-16 The definitive and essential collection of classic and new essays on analytic theories of truth, revised and updated with seventeen new chapters. The question 'What is truth?' is so philosophical that it can seem rhetorical. Yet truth matters especially in a post-truth society in which lies are tolerated and facts are ignored. If we want to understand why truth matters, we first need to understand what it is. *The Nature of Truth* offers the definitive collection of classic and contemporary essays on analytic theories of truth. This second edition has been extensively revised and updated, incorporating both historically central readings on truth's nature as well as up-to-the-moment contemporary essays. Seventeen new chapters reflect the current trajectory of research on truth.

Aristotle on the Nature of Truth Christopher P. Long, 2010-11-22 This book reconsiders the traditional correspondence theory of truth, which takes truth to be a matter of correctly representing objects. Drawing Heideggerian phenomenology into dialogue with American pragmatic naturalism, Christopher P. Long undertakes a rigorous reading of Aristotle that articulates the meaning of truth as a co-operative activity between human beings and the natural world that is rooted in our endeavours to do justice to the nature of things. By following a path of Aristotle's thinking that leads from our rudimentary encounters with things in perceiving through human communication to thinking, this book traces an itinerary that uncovers the nature of truth as ecological justice and finds the nature of justice in our attempts to articulate the truth of things. Truth, Meaning, Experience Anil Gupta, 2011-12-09 This volume reprints eight of Anil Gupta's essays, some with additional material. The essays bring a refreshing new perspective to central issues in philosophical logic, philosophy of language, and epistemology. Gupta argues that logical interdependence is legitimate and that it provides a key to understanding a variety of

topics of interest to philosophers including truth rationality and experience The essays are highly accessible and provide a good introduction to ideas Gupta has been developing over the last three decades **The Truth of the Christian Religion** Hugo Grotius,1786 Truth David Wood,José Medina,2008-04-15 Setting the stage with a selection of readings from importantnineteenth century philosophers this reader on truth puts inconversation some of the main philosophical figures from thetwentieth century in the analytic continental and pragmatisttraditions Focuses on the value or normativity of truth through exposingthe dialogues between different schools of thought Features philosophical figures from the twentieth century inthe analytic continental and pragmatist traditions Topics addressed include the normative relation between truthand subjectivity consensus art testimony power andcritique Includes essays by Kierkegaard Nietzsche James Heidegger Merleau Ponty Wittgenstein Levinas Arendt Foucault Rorty Davidson Habermas Derrida and many others *The Truth Seeker* ,1893 *The True and the Good* Chase B.
