*Alternate Worlds* James Gunn, 2018-08-24 *Alternate Worlds* was first published in 1975 and became an instant classic winning a Hugo award. This third edition brings the history of science fiction up to date covering developments over the past forty years, a period that has seen the advent of technologies only imagined in the genre's Golden Age. As a literature of change, science fiction has become ever more meaningful, presaging dangers to humanity and, as Alvin Toffler wrote, guarding against the premature arrival of the future. The world has begun to recognize science fiction in many different ways, incorporating its elements in products, visual media, and huge conventions.

*Year Science Changed Everything* Mark O'Connell, 2025-05-06 In 1957, 6,000 scientists from 66 nations achieved the impossible: they erased political borders for 18 months to unlock Earth's greatest mysteries and changed science forever. The International Geophysical Year (IGY) of 1957 marked humanity's first unified effort to understand our planet, launching the space race, discovering the Van Allen radiation belts, and producing groundbreaking climate research that shapes our world today. Through exclusive interviews with modern climate leaders, including the late marine biologist and climate researcher Dr. Wallace J. Nichols, science diplomat and Senior Fellow at the United Nations Institute for Training and Research, Paul Arthur Berkman, Frank Niepold at the National Oceanic and Atmospheric Administration (NOAA), science historian Rebecca Charbonneau, and many more, author Mark O'Connell reveals how this historic collaboration offers a blueprint for tackling today's environmental challenges. Key discoveries from this groundbreaking initiative sparked the space race and satellite technology development, led to the first comprehensive mapping of ocean floors, produced the Antarctic Treaty protecting an entire continent, established the foundation for modern climate science, and created a model for international scientific cooperation. As climate change threatens our planet, *The Year Science Changed Everything* shows how the spirit of global scientific unity that transformed 1957 might be our best hope for safeguarding Earth's future.

*From Hyperspace to Hypertext* Christopher Leslie, 2023-09-25 This book illuminates how science fiction studies can support diversity, equity, and inclusion in science and engineering. Shortly before science fiction got its name, a new paradigm connected whiteness and masculinity to the advancement of civilization. In order to show how science fiction authors supported the social construction of these gender and racial norms and also challenged them, this study analyzes the impact of three major editors and the authors in their orbits: Hugo Gernsback, John W. Campbell Jr., and Judith Merril. Supported by a fresh look at archival sources and the author's experience teaching Science and Technology Studies at universities on three continents, this study demonstrates the interconnections among discourses of imperialism, masculinity, and innovation. Readers gain insights into fighting prejudice.
