Another Modernity A Different Rationality:

Another Modernity Scott Lash, 1999-08-25 This book is Lash's most comprehensive statement in social and cultural theory. It is a book addressed to sociologists and philosophers to students of urban life, modern languages, cultural studies and the visual arts. Alongside the Enlightenment has emerged another modernity. This second modernity has in opposition to the Enlightenment rationality of progress, order, homogeneity and cognition initiated a different rationality of uncertainty, transience, experiment and the unknowable. This second, this other modernity is present in notions of difference and reflexivity so central to the contemporary world view. The logic, however, of such notions can itself lead to the same unhappy abstraction of the first modernity. What is forgotten, Scott Lash argues, is the dimension of the ground. This book consists of explorations into this ground as place, community, belonging, sociality, tradition, life, world as symbol, sensation in the tactile character of the sign. The book addresses the other modernity's forgotten ground. The first and second modernities co-existed in a state of irresolvable tension along the history of western industrial capitalism. This is thrown into crisis, Lash argues, with the turn of the twenty-first century emergence of the global information culture. What are the implications of this explosion of first and second modernities into today's technological culture? When the previously existing third space of difference is exploded into the general indifference of information and communication flows? How might we lead our lives in an age in which difference and indeed the ground itself become primarily a matter for memory, for mourning?

TransUrbanism Joke Brouwer, Arjen Mulder, 2002 *TransUrbanism* is urbanism plus transformation. *TransUrbanism* is urbanism plus globalization. The city is no longer a clearly localizable spatial unit but has transformed into an urban field, a collection of activities instead of a material structure. Cities today are in a state of continuous decomposition but are also continually reorganizing and rearranging themselves, expanding and shrinking. *TransUrbanism* is a design strategy that allows cities to organize themselves as complex systems where small local structures incorporate global flows.

The Future of Social Theory Nicholas Gane, 2004-03-02 The basic concept of society has come under attack: political acts, critical theory, new media and even history itself have undermined what we think of as the social. *The Future of Social Theory* brings together new interviews with the world's leading social theorists on what society means today: Zygmunt Bauman, John Urry, Saskia Sassen, Bruno Latour, Scott Lash, Nikolas Rose, Judith Butler and Francoise Verges. The topics covered include liquid modernization and the individualization of the society, the shift towards global forms of chaos and complexity, the displacement of the social into global city networks, the shift away from a theory of the social to a theory of space, the transformation of society with the rise of new technology, the continuing influence of historical forms of political power, society as a gendered idea and society as a product of Empire.

Theorizing Globalization Marko Ampuja, 2012-07-25 In this work Marko Ampuja offers a critical reassessment of mainstream perspectives on globalization, challenging their media centrism and their lack of historical, materialist analysis of global

capitalism and the power of neoliberalism **Modernity Theory** John Jervis, 2018-12-29 Modernity theory approaches modern experience as it incorporates a sense of itself as modern modernity along with the possibilities and limitations of representing this in the arts and culture generally modernism The book interrogates modernity in the name of a fluid unsettled unsettling modernism As the offspring of the Enlightenment and the Age of Sensibility modernity is framed here through a cultural aesthetics that highlights not just an instrumental exploitative approach to the world but the distinctive configuration of embodiment feeling and imagination that we refer to as civilization in turn both explored and subverted through modernist experimentalism and reflexive thinking in culture and the arts This discloses the rationalizing pretensions that underlie the modern project and have resulted in the sensationalist melodramatic conflicts of good and evil that traverse our contemporary world of politics and popular culture alike This innovative approach permits modernity theory to link otherwise fragmented insights of separate humanities disciplines aspects of sociology and cultural studies by identifying and contributing to a central strand of modern thought running from Kant through Benjamin to the present One aspect of modernity theory that results is that it cannot escape the paradoxes inherent in reflexive involvement in its own history

Multicultural Dialogue Randi Gressgård, 2012-05 As cross cultural migration increases democratic states face a particular challenge how to grant equal rights and dignity to individuals while recognizing cultural distinctiveness In response to the greater number of ethnic and religious minority groups state policies seem to focus on managing cultural differences through planned pluralism This book explores the dilemmas paradoxes and conflicts that emerge when differences are managed within this conceptual framework After a critical investigation of the perceived logic of identity indicative of Western nation states and at the root of their pluralistic intentions the author takes issue with both universalist notions of equality and cultural relativist notions of distinctiveness However without identity is it possible to participate in dialogue and form communities Is there a way out of this impasse The book argues in favor of communities based on nonidentitarian difference developed and maintained through open and critical dialogue

Dallmayr,2007-08-31 The great German novelist Thomas Mann implored readers to resist the persistent and growing militarism of the mid twentieth century To whom should we turn for guidance during this current era of global violence political corruption economic inequality and environmental degradation For more than two millennia the world s great thinkers have held that the ethically good life is the highest purpose of human existence Renowned political philosopher Fred Dallmayr traces the development of this notion finding surprising connections among Aristotelian ethics Abrahamic and Eastern religious traditions German idealism and postindustrial social criticism In Search of the Good Life does not offer a blueprint but rather invites readers on a cross cultural quest Along the way the author discusses the teachings of Aristotle Confucius Nicolaus of Cusa Leibniz and Schiller in addition invoking more recent writings of Gadamer and Ricoeur as guideposts and sources of hope during our troubled times Among contemporary themes Dallmayr discusses are the role of the classics in education proper and improper ways of spreading democracy globally the possibility of transnational citizenship the problem of politicized evil and the role of religion in our predominantly secular culture Dallmayr restores the notion of the good life as a hallmark of personal conduct civic virtue and political engagement and as the road map to enduring peace In Search of the Good Life seeks to arouse complacent and dispirited citizens guiding them out of the distractions of shallow amusements and perilous resentments in the direction of mutual learning and civic pedagogy a direction that will enable them to impose accountability on political leaders who stray from fundamental ethical standards

Mads Daugbjerg, 2014-02-01 In an era cross cut with various agendas and expressions of national belonging and global awareness the nation as a collective reference point and experienced entity stands at the center of complex identity struggles This book explores how such struggles unfold in practice at a highly symbolic battlefield site in the Danish German borderland Comprised of an ethnography of two profoundly different institutions a conventional museum and an experience based heritage center it analyses the ways in which staff and visitors interfere with relate to and literally make sense of the war heritage and its national connotations Borders of Belonging offers a comparative in depth analysis of the practices and negotiations through which history is made and manifested at two houses devoted to the interpretation of one event the decisive battle of the 1864 war in which Otto von Bismarck on his way to uniting the new German Empire led the Prussian army to victory over the Danish Working through his empirical material to engage with and challenge established theoretical positions in the study of museums modernity and tourism Mads Daugbjerg demonstrates that national belonging is still a key cultural concern even as it asserts itself in novel muted and increasingly experiential ways Max Weber and Postmodern Theory

N. Gane, 2002-04-09 This book explores the contemporary nature of Max Weber's work by looking in detail at his key concepts of rationalization and disenchantment Thematic parallels are drawn between Weber's rationalization thesis and the critiques of contemporary culture developed by Jean Francois Lyotard Michel Foucault and Jean Baudrillard It is suggested that these three postmodern thinkers develop and respond to Weber's analysis of modernity by pursuing radical strategies of affirmation and re enchantment Examining the work of these three key thinkers in this way casts new light both on postmodern theory and on Weber's sociology of rationalization Cruising Modernism

Michael Trask, 2018-05-31 Modern society Michael Trask argues in this incisive and original book chose to couch class difference in terms of illicit sexuality Trask demonstrates how sexual science's concept of erotic perversion mediated the writing of both literary figures and social theorists when it came to the innovative and unsettling social arrangements of the early twentieth century Trask focuses on the James brothers in a critique of

pragmatism and anti immigrant sentiment shows the influence of behavioral psychology on Gertrude Stein s work uncovers a sustained reflection on casual labor in Hart Crane s lyric poetry and traces the identification of working class Catholics with deviant passions in Willa Cather s fiction Finally Trask examines how literary leftists borrowed the antiprostitution rhetoric of Progressive era reformers to protest the ascendance of consumerism in the 1920s Viewing class as a restless and unstable category Trask contends American modernist writers appropriated sexology s concept of evasive unmoored desire to account for the seismic shift in social relations during the Progressive era and beyond Looking closely at the fraught ideological space between real and perceived class differences Cruising Modernism discloses there a pervasive representation of sexuality as well

The Economics of Rationality Bill J Gerrard, 2006-04-10 The concept of rationality is the heart of modern economics Neo classical theory seems unable to proceed without assuming a rational agent seeking to find the optimal means to a well defined end Yet many find this uncritical treatment of rationality problematic It takes little account of culture history or creativity and consequently many economists find this insistence on rationality of little use when trying to explain a wide range of economic phenomena Increasingly these include a large number of game theorists and others involved in mainstream theory as well as those typically opposed to neo classicism The Economics of Rationality contains a number of critical perspectives on the treatment of rationality in economics
