Another Planet:

Another Planet? D. Patrick Georges, 1999-07-14 You have no financial or medical concerns and you get to be Head of State one day but you got to hand over your kids to their grandparents when they are one year old How would you like to live in such a paradise son Decades after his godfather told him this bizarre story the author a businessman and professor of management with no interest whatsoever in metaphysics felt he could no longer keep to himself such visions of future heaven or hell To write and publish a book is an uphill battle rarely leading to success But to con somebody else to write and publish a book surely would deserve the Nobel Prize in perseverance Such a prize is now posthumously awarded to the author s godfather Anthony It took him a total of 64 years in life and death to make his unstoppable resolve to get this book written and published a reality In 1931 it seemed that Anthony had made it The owner of two thriving businesses he now had time to indulge in his passion in the form of a hobby cars He chanced upon the decaying carcass of a 1918 one ton Ford Model TT truck that a farmer used as a chicken coop The master auto mechanic in him urged him to restore it to its former glory He rented a large garage near the center of town and with a true collector s detachment began scavenging the area for parts Without warning Anthony s happy life started unraveling the following year At first he acted as if absent minded Slowly he started losing interest in his work including his love for cars He started going to work late and leaving early Much to the worry of relatives and close friends he slept every night in the garage while his visits to his fiance s house all but stopped By early 1933 his businesses started sliding into the red Too honest not to pay his workers he defaulted on payments to creditors who soon forced him into bankruptcy As one might expect his would be father in law gave him a royal dressing down and much to his daughters chagrin broke off the engagement When asked what was wrong Anthony would reply vaguely that he was visiting another planet where he saw wondrous things that put life on Earth to shame He began to criticize living and working conditions on Earth both as he knew them by experience and as he learned about them in those days media the press movies theater radio and stories of travelers to other countries At the same time he changed his appearance and behavior to conform to the standards in force on what he called that other planet Needless to say his antics soon earned him the status of the neighborhood idiot His friends even some of his relatives avoided him like the plague while some openly ridiculed him Though far from being convinced about the merits of Anthony s tale the author confessed that as he gained more education and experience he began to notice the conviction with which his godfather talked about his improbable experience No doubt to him it was the real thing There must be some merit in his godfather s tale for two rock solid reasons he concluded First no man with an eighth grade education could dream up sophisticated socio political systems such as those he described as existing on that other planet And second even if he could he would not have been consistent in his storytelling Convinced that his godfather s tale should somehow be preserved though at that time he had no clear reason in mind the author decided to take a week s vacation and debrief Anthony in a comprehensive systematic way much like a

research project Long after Anthony's death and with the encouragement of business associates unwittingly the process started that enabled the author to finally deliver the promise he gave his grossly misunderstood godfather on the latter's death bed to write and publish *Life on Another Planet, Volume II* Pasquale De Marco, 2025-08-14 *Life on Another Planet Volume II* is a thought provoking exploration of the scientific evidence for extraterrestrial life and the implications of finding life on another planet In this book Pasquale De Marco examines the different types of extraterrestrial life that might exist the challenges of finding life on other planets and the potential impact of extraterrestrial life on human society Pasquale De Marco draws on the latest scientific research to provide a comprehensive overview of the search for extraterrestrial life He discusses the different methods that scientists are using to search for life on other planets including spectroscopy direct imaging and radio telescopes Pasquale De Marco also explores the philosophical and ethical implications of finding extraterrestrial life He asks questions such as What would it mean for humanity to discover that we are not alone in the universe How would we react to the discovery of extraterrestrial intelligence What are the ethical responsibilities of humans towards extraterrestrial life *Life on Another Planet Volume II* is a must read for anyone who is interested in the search for extraterrestrial life It is a fascinating and thought provoking book that will challenge your assumptions about life in the universe About the Author Pasquale De Marco is a scientist and writer who has been studying the search for extraterrestrial life for over 20 years He has written extensively on the topic and his work has been published in a variety of scientific journals and popular science magazines If you like this book write a review

Vampires from Another World Simon Bacon, 2021-06-04 This book begins at the intersection of *Dracula* and *War of the Worlds* both published in 1897 London and describes the settings of Transylvania Mars and London as worlds linked by the body of the vampire It explores the vampire from another world in all its various forms as a manifestation of not just our anxieties around alien others but also our alien selves Unsurprisingly many of the tropes these novels generated and particularly the themes they have in common have been used and adapted by vampire narratives that followed From *Nosferatu* to *Alien* *Interstellar* *Stranger Things* and many others this book examines how these narratives have evolved since the end of the nineteenth century Bringing together texts and films from across the 19th 20th and 21st centuries from the far reaches of outer space and the distant future it concludes that the unexpected and the unknown are not always to be feared and that humanity does have the power to write its own future
