Anthology Of French Scientific Prose:

An Anthology of French Scientific Prose John Dunmore, 1973 National Union Catalog , 1973 Includes entries for maps and atlases **New Scientist** , 1973-04 Seeds of Concern David Ronald Murray, 2003 How are genetically modified plants produced Which breeding goals are worthwhile and which are not Can the escape of transferred genes be controlled Why have the first transgenic plants been released without full appreciation of the consequences How dangerous are bacterial proteins produced in plant foods Is anyone monitoring the unexpected effects of gene transfer Will genetically modified plants ever be acceptable to organic growers These are some of the important questions canvassed in this book written with the insight of an experienced Australian plant scientist and conservationist Chemistry, Society and Environment Colin Archibald Russell, Royal Society of Chemistry (Great Britain), 2000 There have been several attempts to write the history of Britain's chemical industry as a whole and countless others concentrating on individual companies Some have looked at the technical aspects of the industry whilst others have addressed economic issues Few have however attempted to analyse the effects of the chemical industry on society in general The current environmental crisis can only be fully understood in the light of its history This is the first such book to look critically at the whole development of industrial chemistry in the UK in the context of its effects on the environment No one from industry government or academia can afford to be unaware of the historical roots of our present dilemma Industrial chemists can take heart from the realization that their predecessors were remarkably aware of the problems and often found satisfactory solutions Industrial chemistry has traditionally been seen as the great polluter Without any attempts at whitewash this book puts the record straight From academic chemist to industrialist to politician Chemistry Society and Environment A New History of the British Chemical Industry will be of relevance to all those concerned with the social and environmental impact of the chemical industry
