Anthology Of Ophthalmologic Classics:

An Anthology of Ophthalmic Classics James Elzar Lebensohn, 1969 *An Anthology of Ophthalmic Classics* James E. Lebensohn (Rucker, C. Wilbur), 1969 **An Anthology of Ophthalmic Classics. Edited, with Comments, Biographical Notes, And portrait Illustrations [by] James E. Lebensohn. Foreword by C. Wilbur Rucker ,1969 Applied Pathology for Ophthalmic Microsurgeons** Gottfried O.H. Naumann, L. Holbach, F.E. Kruse, 2008-04-05 Written and edited by the world famous expert G O H Naumann this textbook delves into the details of ocular structures such as the nuances of morphology surgical anatomy and pathology The text covers unique features of intraocular surgery in closed system and open eye contexts It goes on to cover crucial aspects of restoring the anterior chamber Then it delineates the spectrum of potential complications in pseudo exfoliation syndromes as well as the most vulnerable cell populations Readers are also treated to the features of normal and pathologic wound healing after non mechanical laser and mechanical inventions Brilliant artwork and sketches illustrate the complex pathology **Ophthalmic Pathology of Animals** L. Z. Saunders, L. F. Rubin, 1975-08-22 **The Man Behind the Syndrome** Peter Beighton, Greta Beighton, 2012-12-06 The Man Behind the Syndrome by my friends and colleagues Peter and Greta Beighton is a delightful book which will be read eagerly and with keen intellectual pleasure by all human medical and clinical geneticists The reader with a historical turn of mind will note right away that the book achieves more than the usual entry in a dictionary of scientific biography In addition to the standard professional data it gives a photo and some personal glimpses of the man allowing the reader to appreciate his human qualities as well This volume contains so to speak the cream de la cream namely those in a group whose names are daily on the lips of every practicing clinical geneticist This interesting and instructive book is commended to all in medical genetics and the history of medicine with the highest enthusiasm and gratitude to its authors for undertaking this labor of love A second volume is planned for more recently delineated disorders for which an eponym is not yet widely used **Catalog of Copyright Entries. Third Series** Library of Congress. Copyright Office, 1972 *Molyneux's Problem* M. Degenaar, 2007-08-26 Suppose that a congenitally blind person has learned to distinguish and name a sphere and a cube by touch alone Then imagine that this person suddenly recovers the faculty of sight Will he be able to distinguish both objects by sight and to say which is the sphere and which the cube This was the question which the Irish politician and scientist William Molyneux posed in 1688 to John Locke Molyneux's question has intrigued a wide variety of intellectuals for three centuries Those who have attempted to solve it include Berkeley Reid Leibniz Voltaire La Mettrie Condillac Diderot Miller Helmholtz William James and Gareth Evans This book is the first comprehensive survey of the history of the discussion about Molyneux's problem It will be of interest to historians of both philosophy and psychology Foundations of Ophthalmic Pathology Daniel M. Albert, Carmen A. Puliafito, 1979 **The Person Behind the Syndrome** Greta Beighton, 2012-12-06 A decade after the publication of The Man Behind the Syndrome which was warmly received particularly by medical geneticists

syndromologists and those doctors from many different disciplines with an interest in medical history Peter and Greta Beighton now present the second volume of their work promised ten years ago The length of time which has passed since the publication of the first book gives an inkling of the extraordinary effort involved on the part of the authors in collecting the necessary biographical data and the portraits of their subjects The Person Behind the Syndrome conforms exactly in structure quality and size with the first volume thus facilitating the use of the series Again we find detailed presentations of a hundred people who have given their names to disorders or syndromes which are thought to have a significant genetic or chromosomal component with a photograph or portrait biography commentary on the development of nomenclature and references The reader finds information not only on the doctor and or scientist under discussion but also as in the previous volume on the person behind the name This is followed by brief un illustrated biographies of about seventy mostly younger and in some cases still professionally active personalities *Bibliography of the History of Medicine* ,1972

Ophthalmology; Principles and Concepts Frank W. Newell, John Terry Ernest, 1974 *The History of Ophthalmology: pts. 1a-c.
