Anthony Caro William Rubin, Anthony Caro, 1975 Anthony Caro holds a particular eminence as the artist who in recent
years has most significantly extended the tradition of constructed sculpture established by Picasso on the eve of World War I
Caro was the first to create large sculptures that spread out along the ground independent of base or pedestal In creating
these pieces he broke with the totemic conventions of Western sculpture still adhered to by Picasso and David Smith in which
the work rises to confront the viewer These consequences were of major import As William Rubin points out The prevailing
horizontality of Caro's sculpture makes available to him configurations hitherto unknown in sculpture The interrelationships
of the ground plan and the vertical structures that rise from it the rhyming the analogies even the puns of this dialogue open
a vast range of choices In effect Caro's approach has enabled him to do something utterly new to work for the first time
modern sculpture in a non pictorial integrally three dimensional manner This internationally esteemed British artist is now
the subject of a comprehensive survey that reviews his early career and penetratingly analyzes his mature work presenting
the entire oeuvre to date against the historical background of twentieth century sculpture During the writing of this study the
author had the benefit of repeated discussions with the artist The book is not only a masterly introduction to Caro's work but
also a valuable scholarly tool complete with chronology bibliography list of exhibitions and extensive notes The abundant
illustrations make this volume the most inclusive pictorial record published on Caro's achievement Back cover **Anthony**
