Comparative Essays in Early Greek and Chinese Rational Thinking Jean-Paul Reding, 2017-03-02 This collection of essays by Reding in the emergent field of Sino Hellenic studies explores the neglected inchoative strains of rational thought in ancient China and compares them to similar themes in ancient Greek thought right at the beginnings of philosophy in both cultures Reding develops and defends the bold hypothesis that Greek and Chinese rational thinking are one and the same phenomenon Rather than stressing the extreme differences between these two cultures as most other

writings on these subjects Reding looks for the parameters that have to be restored to see the similarities Reding maintains that philosophy is like an unknown continent discovered simultaneously in both China and Greece but from different starting points The book comprises seven essays moving thematically from conceptual analysis logic and categories to epistemology and ontology with an incursion in the field of comparative metaphorology One of the book's main concerns is a systematic examination of the problem of linguistic relativism through many detailed examples **Gaia Matrix** Peter William Champoux,1999 **The Dragons of Tiananmen** Jeffrey F. Housing Inequality in Chinese Cities Youqin Huang, Si-ming Li, 2014-03-05 In recent decades Chinese cities have experienced profound social economic and spatial

transformations In particular Chinese cities have witnessed the largest housing boom in history and unprecedented housing privatization China now is a country of homeowners with more than 70 per cent of urban residents owning homes higher than many developed countries This book shows how China s spectacular housing success is not shared by all social groups with rapidly rising housing inequality and residential segregation increasingly prevalent in previously homogeneous Chinese cities It focuses on the two extremes of the residential landscape and reveals the stark contrast between low income households who live in shacks in so called urban villages and the nouveaux riches who live in exclusive gated villa communities Over four parts the contributors look at the degree to which inequality affects Chinese cities and the extent of residential differentiation housing for the urban poor and in particular housing for migrants from rural China housing for the rapidly expanding Chinese middle class and the new rich and finally governance in residential neighbourhoods Housing Inequality in Chinese Cities presents theoretically informed and empirically grounded research into the polarized residential landscape in Chinese cities and as such will be of great interest to students and scholars of Chinese studies urban geography urban sociology and urban studies
