Leisure and Liberty in North America Pierre Lagayette, 2008 Depuis Aristote le loisir est un temps libre c est dire propice la r flexion ou la m ditation ce que les Grecs consid raient comme le bien supr me de notre existence Le loisir pour des hommes libres c est l occasion de penser leur libert de choisir la mani re dont il vont assurer le progr s de leur connaissances y compris la connaissance de soi alors m me qu ils sont d barrass s des contraintes de la n cessit le travail et la r ussite sociale Au fil du temps se sont greff es celle de loisir les notions de jeu d amusement ou de r cr ation La libert devient ludique dans ce contexte et l amusement l expression

d'une libre pratique de la vie en société. Autrefois réservée à une élite, le loisir a fini par s'insinuer dans l'ordre social particulièrement en Amérique du Nord où il voulait être plus galitaire et au cours des siècles il s'est imposé comme l'un des pivots principaux de l'American Way of Life. Mais aux idées originelles est venue subrepticement se substituer la logique du gain et de la réussite individuelle. À ceux qui penseraient encore le loisir comme un moyen d'évasion culturelle, l'instrumentalisation des loisirs dans une économie dominée par le profit dément cette idée. Qu'il s'agisse de tourisme, de voyages, de parcs d'attraction ou plus simplement de cinéma ou de gastronomie, tout est prêt à exalter la valeur financière du loisir par ses valeurs esthétiques ou morales. Transformé en simple bien de consommation, le loisir ne cesse d'interroger les questions d'environnement, d'identité ethnique ou de genre. À cet égard, peut-on encore le considérer comme un facteur de libération sociale ou culturelle ? Crée-t-il les conditions favorables à la mise en œuvre d'un niveau de liberté individuelle ou collective plus élevé ? Il reste que le loisir, malgré ses dérives consuméristes, n'en tient pas moins une place grandissante dans l'identité des peuples et dans le flux planétaire des cultures. À ce titre, il nous est aussi vital que le travail dont il est l'inévitable complément. **An**

Anthropology of Learning Cathrine Hasse, 2014-12-05 This book has one explicit purpose to present a new theory of cultural learning in organisations which combines practice based learning with cultural models a cognitive anthropological schema theory of taken for granted connections tied to the everyday meaningful use of artefacts The understanding of culture as emerging in a process of learning open up for new understandings which is useful for researchers practitioners and students interested in dynamic studies of culture and cultural studies of organisations The new approach goes beyond culture as a static essentialist entity and open for our possibility to learn in organisations across national cultures across ethnicity and across the apparently insurmountable local educational differences which makes it difficult for people to communicate working together in an increasingly globalized world The empirical examples are mainly drawn from organisations of education and science which are melting pots of cultural encounters **The Anthropology of Landscape**, 2023 This volume offers anthropological perspectives on landscape a topic of emerging interest for anthropologists geographers art historians and archaeologists It proposes that landscape be conceptualized as a cultural process situated between place and space **Spatial Anthropology** Les Roberts, 2018-06-20 Spatial Anthropology draws together a number of interrelated strands of research focused on landscape place and cultural memory in the north west of England At the core of the book lies an engagement with the methodological opportunities offered by new interdisciplinary frameworks of research and practice that have emerged in the wake of a putative spatial turn in arts and humanities scholarship in recent years The spatial methods explored in the book represent a consolidation of site specific interventions enacted in landscapes located in the north west and beyond Utilising digital tools and geospatial technologies alongside ethnographic performative and autoethnographic modes of spatio cultural analysis spatial anthropology is presented as a geographically immersive and critically reflexive set of practices designed to explore the embodied and increasingly multi faceted spatialities of place

mobility and memory From the radically placeless environment of a motorway traffic island to the affective archipelago of former cinema sites or the songlines and micro geographies of musical memory Spatial Anthropology offers a rich tapestry of landscapes practices and spatial stories that speaks to both the particularities of place and locality as well as the more delocalised topographies of regional national and global mobility

The Anthropology of the Enlightenment Larry Wolff, Marco Cipolloni, 2007-09-04 The modern enterprise of anthropology with all of its important implications for cross cultural perceptions perspectives and self consciousness emerged from the eighteenth century intellectual context of the Enlightenment If the Renaissance discovered perspective in art it was the Enlightenment that articulated and explored the problem of perspective in viewing history culture and society If the Renaissance was the age of oceanic discovery most dramatically the discovery of the New World of America the critical reflections of the Enlightenment brought about an intellectual rediscovery of the New World and thus laid the foundations for modern anthropology The contributions that constitute this book present the multiple anthropological facets of the Enlightenment and suggest that the character of its intellectual engagements acknowledging global diversity interpreting human societies and bridging cultural difference must be understood as a whole to be fundamentally anthropological

Locating the Field Simon Coleman, Peter Collins, 2006-01-01 Are reports of the death of conventional fieldwork in anthropology greatly exaggerated This book takes a critical look at the latest developments and key issues in fieldwork The nature of locality itself is problematic for both research subjects and fieldworkers on the grounds that it now must be maintained and represented in relation to widening and fragmenting social frames and networks Such developments have raised questions concerning the nature of ethnographic presence and scales of comparison From the social space of a cybercafé to cities in India the UK and South Africa among others this book features a wide range of ethnographic studies that provide new ways of looking at the concepts of locality and site
