Anthropology And Political Economy Theoretical And Asian Perspectives:

Anthropology and Political Economy John Clammer, 1985-09-02 **Anthropology and Political Economy** John Clammer, 1985 **Political Economy from Below** Rob Knowles, 2017-07-05
Communitarian anarchism is a generic form of socialism that denies the need for a state or any other authority over the individual from above and which requires absolute belief that the individual cannot exist outside of a community of others This book suggests that the communitarian anarchists of the nineteenth century developed and articulated a distinct tradition of economic thought The period of this study begins with the first major writing of the French communitarian anarchist Pierre Joseph Proudhon in 1840 and ends with the temporary burial of anarchist theorizing at the beginning of the First World War in 1914 However the tradition of communitarian anarchist economic thought did not end in 1914 The economic thought explored in this book provides a fresh perception of the fragmentation evident in many societies today especially where there is a substantial informal economy

New Directions in Economic Anthropology Susana Narotzky, 1997-04-20 Using an historical perspective Narotzky highlights the interdependent nature of the contemporary world economy and includes case studies of Western societies She gives special emphasis to current issues such as the anthropology of work the informal economy and the cultures of industrialisation *Ancient Andean Political Economy* Charles Stanish, 2014-05-23 For more than two millennia prior to the Spanish conquest the southern region of the central Andes was home to dozens of societies ranging from modest chiefdoms to imperial states Attempts to understand the political and economic dynamics of this complex region have included at least two major theories in Andean anthropology In this pathfinding study Charles Stanish shows that they are not exclusive and competing models but rather can be understood as variations within a larger theoretical framework Stanish builds his arguments around a case study from the Moquegua region of Peru augmented with data from Puno He uses the archaeological household as his basic unit of analysis This approach allows him to reconcile the now classic model of zonal complementarity proposed by John Murra with the model of craft specialization and exchange offered by Maria Rostworowski de Diez Canseco These models of political economy are analyzed with the concepts of economic anthropology in the tradition of Karl Polanyi For students of archaeology Andean studies anthropology and economic history *Ancient Andean Political Economy* will be important reading *Peasants, Capitalism, and the Work of Eric R. Wolf* Mark Tilzey, Fraser Sugden, David Seddon, 2023-08-30 Fifty years after the publication of Eric Wolf's celebrated *Peasant Wars of the Twentieth Century* and forty years after the publication of his path breaking *Europe and the People Without History* this book offers a much needed critical assessment and update of Wolf's contribution to the study of the peasantry and its relationship to capitalism the state and imperialism This book provides a comprehensive evaluation of Wolf's premises methodology and understanding of the peasantry and its relationship to the rise of capitalism and the modern state The authors analyse Wolf's theoretical approach and by building on his work in *Europe and the People Without History* especially argue their own position concerning the

dynamics of the peasantry in relation to capitalism state class and imperialism Further the text aims to answer the agrarian question more widely focusing on agrarian society and the political role of the peasantry in contested transitions to capitalism and to modes beyond capitalism This requires the authors argue an analysis of class struggle and of the resources material and discursive that different classes can bring to bear on this struggle Based on well founded theoretical premises the book focuses on the contested rise of capitalism in the global North the development of core periphery relations in the global political economy and the place of the peasantry in these dynamics The book presents case studies of transitions to agrarian capitalism in the British Isles France Germany Japan and the USA The book will be of great interest to students and researchers in the areas of peasant studies rural politics agrarian studies development and political ecology

Contemporary Urban Japan John Clammer, 2011-08-04 This volume demonstrates a fresh approach to urban studies as well as a new way of looking at contemporary Japan which links economy and society in an innovative way *Culture, Development and Social Theory* John Clammer, 2013-10-10 This important book places culture back at the centre of debates in development studies It introduces new ways of conceptualizing culture in relation to development by linking development studies to cultural studies studies of social movements religion and the notion of social suffering The author expertly argues that in the current world crises it is necessary to recover a more holistic vision of development that creates a vocabulary linking more technical and predominantly economic aspects of development with more humanistic and ecological goals Any conception of post capitalist society he argues requires cultural as well as economic and political dimensions *Business of Civil War* Patience Kabamba, 2013 Within the context of the absence of effective state sovereignty and the presence of numerous armed struggles for power Nande traders have managed to build and protect self sustaining prosperous transnational economic enterprises in eastern Congo This book discusses the commercial enterprises of the Nande trust networks and the subsequent transnational community they have produced thereby challenging the assumption that a weak state or a failed state or even a collapsed state can be presumed to signal a failed society It demonstrates the fact that several sovereignties and property right systems can coexist side by side reinforcing each other an idea which seems inconceivable for those with a normative view of governmental institutions and state sovereignty Rethinking the question of African state formation the study contributes to the formulation of a more rigorously transnational and local paradigms in the study of post colonial African state formations It constitutes an original contribution to critical theory of societal responses to processes of state implosion and the anthropology of new social formations that emerge when states disintegrate especially in war torn Africa The book also discusses issues related to the dynamics of conflict new state formation transnational trade network ethnicity and global political and economic governance In the midst of abundant anti ethnic literature on African studies this study posits that there may be a renewed usefulness and necessity in theorizing the salience and continuing production of ethnic differences in a manner that challenges the notion of ethnicity as merely a devious and divisive invention

of colonialism that must simply be overcome **Kinship, Capitalism, Change** Michael J. Francisconi, 2013-04-11 First Published in 1998 Part of the Native Americans Interdisciplinary Perspectives series this volume looks at the informal economy of the Navajo from 1868 to 1995 In this study Dine is used in place of Navajo when referring to the people Since 1868 three major revolutions have integrated the Dine into the world capitalist system the establishment of military peace resulting in political control by the U S Government which then guaranteed the establishment of trading posts the stock reduction of the 1930 s which resulted in money becoming central to economic life and the importation of highly capital intensive extractive industries onto the Navajo Reservation Difference and Modernity John Clammer, 2010-10-18 The question of postmodernity that has swept Western academic and intellectual circles raises critical comparative questions Do societies that have not experienced the same historical development as the West pass inevitably through modernity into postmodernity or can they skip such stages altogether Japan the only non Western society to develop independently a fully fledged capitalist industrialist economy poses such fundamental questions to social theory Is Japan in fact unique and as such is it a society which escapes the net of conventional sociological abstractions The book questions how special Japanese society really is the limitations of Western social theory in grasping the fullness of this dynamic and a complex Asian society and inquires as to how Japan in turn may speak to social theory and deepen and broaden the principles on which social theory attempts to explore and categorize the social and cultural worlds **Difference & Modernity** John Clammer, 2012-10-12 First Published in 1995 The question of postmodernity that has swept Western academic and intellectual circles raises critical comparative questions Do societies that have not experienced the same historical development as the West pass inevitably through modernity into postmodernity or can they skip such stages altogether Japan the only non Western society to develop independently a fully fledged capitalist industrialist economy poses such fundamental questions to social theory Is Japan in fact unique and as such is it a society which escapes the net of conventional sociological abstractions The book questions how special Japanese society really is the limitations of Western social theory in grasping the fullness of this dynamic and a complex Asian society and inquires as to how Japan in turn may speak to social theory and deepen and broaden the principles on which social theory attempts to explore and categorize the social and cultural worlds **Market Versus Society** Manos Spyridakis, 2018-03-07 This volume addresses the fraught relationship between market and society in times of social and economic crisis exploring how they interact in key social cultural and political arenas on a global scale The contributors examine the neoliberal market in anthropological and ethnographic terms to question whether market logic has won out against social aspects of human existence in a framework of minimal state protection and the devaluation of human labor Fruitfully combining empirical data and theoretical approaches the volume investigates the extent to which ordinary people accept unequal allocations of resources and examines their sense of belonging in an expansive neoliberal economy **Journal of the Institute of Asian Studies** , 1986
