Anthropology Of Sport:

The Anthropology of Sport Niko Besnier, Susan Brownell, Thomas F. Carter, 2018 Few activities bring together physicality emotions politics money and morality as dramatically as sport In Brazil s stadiums or parks in China on Cuba s baseball diamonds or rugby fields in Fiji human beings test their physical limits invest emotional energy bet money perform witchcraft and ingest substances making sport a microcosm of what life is about The Anthropology of Sport explores not only what anthropological thinking tells us about sports but also what sports tell us about the ways in which the sporting body is shaped by and shapes the social cultural political and historical contexts in which we live Core themes discussed in this book include the body modernity nationalism the state citizenship transnationalism globalization and gender and sexuality Provided by publisher

The Anthropology of Sport and Human Movement Robert R. Sands, Linda R. Sands, 2012 The evolution of the human species has always been closely tied to the relationship between biology and culture and the human condition is rooted in this fascinating intersection Sport games and competition serve as a nexus for humanity s innate fixation on movement and social activity and these activities have served throughout history to encourage the proliferation of human culture for any number of exclusive or inclusive motivations money fame health spirituality or social and cultural solidarity The study of anthropology as presented in Anthropology of Sport and Human Movement provides a scope that offers a critical and discerning perspective on the complex calculus involving human biological and cultural variation that produces human movement and performance Each chapter of this compelling collection resonates with the theme of a tightly woven relationship of biology and culture of evolutionary implications and contemporary biological and cultural expression

Anthropologica ,2004 *Anthropology in Sporting Worlds* Sean Heath, Benjamin Hildred, Henrike Neuhaus, Thomas Carter, 2025-05-20 To do anthropology in a sporting world one must reckon with the digital As digital technologies become more widespread and increasingly sophisticated people develop new ways to use them when playing watching and learning sport This volume adds to the growing literature in the Anthropology of Sport by framing key debates in the light of this digital context More importantly the authors articulate how apparently trivial contexts such as sport are crucial for exploring the ways human beings incorporate digital technologies in their everyday lives From taekwondo in Argentina to horse riding in Morocco the contributors to this volume explore a diverse range of sports across a variety of global locales Through insightful ethnography they show how fundamental elements of sport including movement competition and values are increasingly mediated by digital technologies Whether it is Sri Lankan cricketers analysing their practice frame by frame English youth swimmers curating their Instagram feeds or women footballers navigating urban spaces safely in Brazil such examples indicate the diverse relationships that exist between sport and the digital Throughout the authors reflect on issues around knowledge collaboration and representation and consider their implications for undertaking anthropological work This reveals how the fundamental relationship between anthropologist and interlocutor continues to change in the digital age This book will be of interest to both students and scholars in anthropology and the social sciences including sociology sports sciences cultural studies geography and history The nuanced yet accessible discussion of method will be useful for students preparing to undertake ethnographic work while the contribution to theoretical debates will aid researchers exploring sport and or the digital The international scope of this volume combined with the broad scope of the arguments therein ensure a wide appeal for many readers
