Anthropology The Colonial Encounter:

Anthropology & the Colonial Encounter Talal Asad, 1973 The papers in this book analyse and document ways in which anthropological thinking and practice have been affected by British colonialism They approach this topic from different points of view and at different levels Each stands as an original contribution to an argument which is only just beginning

Anthropology & the Colonial Encounter Talal Asad, 1973 **Anthropology & the Colonial Encounter** Talal Asad, 1985 We have been reminded time and again by anthropologists of the ideas and ideals of the Enlightenment in which the intellectual inspiration of anthropology is supposed to lie But anthropology is also rooted in an unequal power encounter between the West and the Third World which goes back to the emergence of bourgeois Europe an encounter in which colonialism is merely one historical moment It is this encounter that gives the West access to cultural and historical information about the societies it has progressively dominated and thus not only generates a certain kind of universal understanding but also reenforces the inequalities in capacity between the European and the non European worlds and derivatively between the Europeanized elites and the traditional masses in the Third World From the Introduction page 16

Colonial Subjects Peter Pels, Oscar Salemink, 2000 Probes the relationship between the conditions of colonial modernization and the methods of anthropological knowledge **The Making of Anthropology in East and Southeast Asia** Shinji Yamashita, Joseph Bosco, Jeremy Seymour Eades, 2004 In a path breaking series of essays the contributors to this collection explore the development of anthropological research in Asia The volume includes writings on Japan China Taiwan Korea Malaysia and the Philippines *Fieldwork as a "Colonial Encounter"? The Impact and Dynamics of Fieldwork* Timothy McGlinchey, 2016-05-30 Essay from the year 2015 in the subject Ethnology Cultural Anthropology grade 1 0 Queen s University Belfast School of History and Anthropology course Social Anthropology language English abstract I will explore the impact and dynamics of fieldwork in various settings and seek to illustrate the extent to which the process itself resembles a colonial encounter Before doing so however initial foundations must be laid through the clarification of terms and detailing of context Concerning the role and significance of fieldwork within the context of colonialism there remains considerable debate as well as subjective interpretation in light of its ambiguous contribution to the colonial objective and the motivations behind its implementation *Anthropology & the Colonial Encounter* Talal Asad, 1998 We have been reminded time and again by anthropologists of the ideas and ideals of the Enlightenment in which the intellectual inspiration of anthropology is supposed to lie But anthropology is also rooted in an unequal power encounter between the West and the Third World which goes back to the emergence of bourgeois Europe an encounter in which colonialism is merely one historical moment It is this encounter that gives the West access to cultural and historical information about the societies it has progressively dominated and thus not only generates a certain kind of universal understanding but also reenforces the inequalities in capacity between the European and the non European worlds and derivatively between the Europeanized

Anthropology and Colonialism in Asia Jan van Bremen,Akitoshi Shimizu,2013-03-07 For a time it was almost a cliché to say that anthropology was a handmaiden of colonialism by which was usually meant Western colonialism And this insinuation was assumed to somehow weaken the theoretical claims of anthropology and its fieldwork achievements What this collection demonstrates is that colonialism was not only a Western phenomenon but Eastern as well And that Japanese or Chinese anthropologists were also engaged in studying subject peoples But wherever they were and whoever they were anthropologists always had a complex and problematic relationship with the colonial state The latter saw some anthropologists sympathy for the natives as a threat while on the other hand anthropological knowledge was used for the training of colonial officials The impact of the colonial situation on the formation of anthropological theories is an important if not easily answered question and the comparison of experiences in Asia offered in this book further helps to illuminate this complex relationship

Colonial Encounters in Ancient Iberia Michael Dietler,Carolina López-Ruiz,2009-10-15 During the first millennium BCE complex encounters of Phoenician and Greek colonists with natives of the Iberian Peninsula transformed the region and influenced the entire history of the Mediterranean One of the first books on these encounters to appear in English this volume brings together a multinational group of contributors to explore ancient Iberia s colonies and indigenous societies as well as the comparative study of colonialism These scholars from a range of disciplines including classics history anthropology and archaeology address such topics as trade and consumption changing urban landscapes cultural transformations and the ways in which these issues played out in the Greek and Phoenician imaginations Situating ancient Iberia within Mediterranean colonial history and establishing a theoretical framework for approaching encounters between colonists and natives these studies exemplify the new intellectual vistas opened by the engagement of colonial studies with Iberian history

Anthropology and Colonialism in Asia and Oceania Jan van Bremen,Akitoshi Shimizu,1999 This study demonstrates that colonialism was not only a western phenomenon Japanese and Chinese anthropologists also studied subject peoples Comparison of experiences further helps to illuminate this complex relationship

Introduction (Anthropology and the Colonial Encounter) Talal Asad, **Materializing Colonial Encounters**

François G. Richard, 2015-09-19 This volume investigates the material production and expression of colonial experiences in Africa. It combines archaeological, historical, and ethnographic sources to explore the diverse pathways, practices, and projects constructed by Africans in their engagement with the forces of colonial modernity and capitalism. This volume is situated in ongoing debates in archaeological and anthropological approaches to materiality. In this respect, it seeks to target archaeologists interested in the conceptual issues provoked by colonial enfoldments. It is also concerned with increasing the visibility of relevant African archaeological literature to scholars of colonialism and imperialism laboring in other fields. This book brings together an array of junior and senior scholars whose contributions represent a rich sample of the vibrant archaeological research conducted in Africa today, blending conceptual inspiration with robust fieldwork. The chapters target a variety of cultural, historical, and colonial settings. They are driven by a plurality of perspectives but they are bound by a shared commitment to postcolonial critical and material culture theories. While this book focuses on western and southern Africa, the sub-regions that boast the deepest traditions of historical archaeological research in the continent, attention was also placed on including case studies from traditionally less well-represented areas: East African and Swahili coasts, Madagascar, whose material pasts are nevertheless essential to a wider comprehension of variability and comparability of modern colonial conditions. Consequently, this volume lends a unique, wide-ranging look at African experiences across the tangle of imperial geographies on the continent, with case studies focusing on Anglophone, Francophone, and Dutch-speaking contexts. This volume is an exciting opportunity to present this work to wider audiences and foster conversations with a wide community of scholars about the material fashioning of colonial life relations and configurations of power.

Anthropologists in the Stock Exchange Marc Flandreau, 2016-09-19 Uncovering strange plots by early British anthropologists to use scientific status to manipulate the stock market, *Anthropologists in the Stock Exchange* tells a provocative story that marries the birth of the social sciences with the exploits of global finance. Marc Flandreau tracks a group of Victorian gentleman swindlers as they shuffled between the corridors of the London Stock Exchange and the meeting rooms of learned society, showing that anthropological studies were integral to investment and speculation in foreign government debt and inversely that finance played a crucial role in shaping the contours of human knowledge. Flandreau argues that finance and science were at the heart of a new brand of imperialism born during Benjamin Disraeli's first term as Britain's prime minister in the 1860s. As anthropologists advocated the study of Miskito Indians or stated their views on a Jamaican rebellion, they were in fact catering to the impulses of the stock exchange for their own benefit. In this way, the very development of the field of anthropology was deeply tied to issues relevant to the financial market, from trust to corruption. Moreover, this book shows how the interplay between anthropology and finance formed the foundational structures of late nineteenth-century British imperialism and helped produce essential technologies of globalization as we know it today.

The Ethnography of Vietnam's Central Highlanders Oscar Salemink, 2019-10-18 This book looks at ethnographic

discourses concerning the indigenous population of Vietnam's Central Highlands during periods of christianization, colonization, war and socialist transformation and analyses these in their relation to tribal, ethnic, territorial, governmental and gendered discourses. Salemin's book is a timely contribution to anthropological knowledge as the ethnic minorities in Vietnam have again been the object of fierce academic debate. This is a historically grounded post-colonial critique relevant to theories of ethnicity and the history of anthropology and will be of interest to graduate students of anthropology and cultural studies as well as Vietnam studies.

A Companion to the Anthropology of Africa Roy Richard Grinker, Stephen C. Lubkemann, Christopher B. Steiner, Euclides Gonçalves, 2019-02-06. An essential collection of scholarly essays on the anthropology of Africa offering a thorough introduction to the most important topics in this evolving and diverse field of study. The study of the cultures of Africa has been central to the methodological and theoretical development of anthropology as a discipline since the late 19th century. As the anthropology of Africa has emerged as a distinct field of study, anthropologists working in this tradition have strived to build a disciplinary conversation that recognizes the diversity and complexity of modern and ancient African cultures while acknowledging the effects of historical anthropology on the present and future of the field of study. A Companion to the Anthropology of Africa is a collection of insightful essays covering the key questions and subjects in the contemporary anthropology of Africa with a key focus on addressing the topics that define the contemporary discipline. Written and edited by a team of leading cultural anthropologists, it is an ideal introduction to the most important topics in the field, both those that have consistently been a part of the critical dialogue and those that have emerged as the central questions of the discipline's future. Beginning with essays on the enduring topics in the study of African cultures, A Companion to the Anthropology of Africa provides a foundation in the contemporary critical approach to subjects of longstanding interest. With these subjects as a groundwork, later essays address decolonization, the postcolonial experience and questions of modern identity and definition, providing representation of the diverse thinking and scholarship in the modern anthropology of Africa.

Worldly Provincialism H. Glenn Penny, Matti Bunzl, 2003-03-17. Worldly Provincialism introduces readers to German anthropology during the age of empire and illustrates how the initial motives and interests that gave birth to German anthropology were channeled and shaped by contexts as various as romantic voyages in the South Pacific, the Herero wars in Southwest Africa, open air presentations of exotic peoples in Berlin and prison camps during World War I. It also shows that Germany's unique intellectual traditions, their emphasis on concepts of culture and the late arrival of both the German nation state and the German colonial empire affected their interest in and relationships with non-Europeans. Worldly Provincialism confirms that there is no justification for presupposing that Europeans shared a common cultural code while abroad or for assuming that they would have behaved similarly during their interactions with non-Europeans. Thus we must rethink the relationships among anthropology, colonialism and race. It also forces a rethinking of our understanding of race in the nineteenth century when race science emerged and eclipsed many alternative racial
